NEW FACILITIES OR FACILITIES OUT OF ALPHABETICAL ALIGNMENT

V = 135.9, 135.0 mc transmitted. # = Guards same VHF and UHF frequencies facility transmits except 122.2, 135.0 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g., (3)-135.9, 122.1 guards every frequency in group (3) except 135.9, 122.1 mc. (g) = Twr equipped with 121.9 mc or (g.7) = Twr equipped with 121.7 mc for control of ground traffic. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.1 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) .-.. --. -... (LGB in Code).

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciably higher rate of speed than the location identifier.

NAUTICAL MILES - STATUTE MILES: NEW DIMENSIONAL UNIT PROCEDURES: Among the various segments of the aviation industry there are many users of the airspace who desire to use nautical units for speed and distance measurements in their operations while others prefer the use of statute units. A plan designed to best serve the interests of all concerned has been developed and will be placed in effect on October 1, 1954. The plan generally provides that the pilots of all air carrier aircraft and all military aircraft shall use nautical units exclusively in all of their operations whether IFR or VFR. Private and business aircraft pilots, on the other hand, may use either nautical or statute units according to their preference.

Since uniformity is essential to the efficient operation of the Federal Airways System, all CAA facilities (communications stations, airport traffic control towers and air route traffic control centers) will use knots and nautical miles as the standard for all internal operations involving speed and distance values. Also, all normal radio transmissions of speed and distance values by these facilities will be in terms of knots and nautical miles with the exception of visibility which will continue to be reported and transmitted in statute miles Any speed or distance value (except those associated with radar traffic control) will be converted from nautical to statute units by CAA facilities upon receipt of specific requests from pilots of private and business aircraft.

At the present time, surface wind velocity is reported in miles per hour. Beginning October 1, surface wind velocity will be reported in knots. Hence, when surface wind is reported as "west south west eight" it will be eight knots rather than eight miles per hour. This change need be of no great concern to the pilot, however, since, until a velocity of thirty miles per hour or more is reached, the difference between miles per hour and knots is so slight as to be insignificant for all practical purposes. In any case, if the pilot of a private or business aircraft wants the wind velocity in miles per hour, the CAA facility will convert it upon request.

When filing IFR flight plans and conducting IFR flight, distance and speed information submitted to CAA facilities by all pilots should, if possible, be in nautical units since the ground system will operate on the basis of nautical units. If statute units are used by the private or business aircraft pilot, they should be identified as such in each case; i.e., "airspeed 110 miles per hour". The CAA facility will then convert the value to knots for internal use.

(9-7-54)

✓ CHANGES IN INSTRUMENT APPROACH PROCEDURES MINIMUMS: Starting with Volume 9, Number 11 dated August 10, 1954, the Airman's Guide began to publish some instrument approach procedures with the lowest landing and take-off minimums possible under the obstruction clearance requirements of the Regulations of the Administrator, Part 609. These minimums apply to all users except military aircraft and those for whom the Administrator has specificllay authorized other minimums. Further details may be found in the note preceding the Instrument Approach Procedures on page 44 of this issue. However, all users are warned that the lowering of these minimums published in the Airman's Guide does not necessarily imply that obstructions have been lowered or removed.

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSIONS, CONTROL ZONES, and REPORTING POINTS AMENDMENTS: Effective September 28, 1954, civil airways, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red Civil Airway No. 23 (United States-Canadian Border to New York, N.Y.) is amended by changing last portion beginning at Elmira, N.Y., to read: "Elmira, N.Y., radio range station; New York (LaGuardia), N.Y., radio range station to the intersection of the east course of the New York (LaGuardia), N.Y., radio range and the northeast course of the Mitchell AFB, N.Y., radio range." (Note: Southeast course Elmira and northwest course LaGuardia to be realigned concurrently.)

(2) Red Civil Airway No. 63 (Battle Creek, Mich., to the United States-Canadian Border) is amended to read: "From the intersection of the southwest course of the Grand Rapids, Mich., radio range and the west course of the Battle Creek, Mich., radio range via the Battle Creek, Mich., radio range station to the Jackson, Mich., non directional radio beacon. That airspace over United States territory from the intersection of the northwest course of the Detroit, Mich., radio range and the west course of the Sarnia, Ontario, Canada radio range to the Sarnia, Ontario, Canada, radio range station." (Note: Above change deletes portion of Red 63 between Jackson, Mich., H and Warren intersection (intersection east course of former Salem, Mich., VAR and northwest course Windsor range).

(3) Blue Civil Airway No. 63 is amended by changing caption to read: "(Concord, N.H. to Berlin, N. H.)" and further amended to read: "From the Concord, N.H., radio range station via the Laconia, N.H., non directional radio beacon; North Conway, N. H., non-directional radio beacon to the Berlin, N.H., non-direction radio beacon."

CONTROL AREA EXTENSION: (1) (Lafayette, Ind.) is amended to read: "That airspace within 5 miles either side of a line bearing 247° True extending from Purdue University Airport, West Lafayette, Ind., to Blue Civil Airway No. 34."

(2) (Danville, Ill.) is revoked.

(3) (Dover, Delaware) is added to read: "That airspace southwest of Dover within a 25 mile radius of the Dover omnirange station bounded on the northwest by VOR civil airway No. 16 and on the southeast by Red civil airway No. 77; that airspace southeast of Dover bounded on the north by Red civil airway No. 77, on the east by Blue 49, on the southeast by VOR civil airway No. 1 and on the west by VOR civil airway No. 29, excluding the portion which overlaps Danger Area D-12 and Caution Area C-53."

(4) (Berlin, N. H.) is added to read: "Within 5 miles either side of aline bearing 154° True extending from the Berlin Airport to a point 10 miles southeast."

CONTROL ZONES: (1) (Houston, Texas) is amended to read: "Within a 10 mile radius of Houston Municipal Airport, within a 5 mile radius ofEllington Air Force Base, and within 2 miles either side of a direct line extending from the Houston Municipal Airport to the Monument non directional radio beacon."

(2) (Dover, Delaware) is amended to read: "Within a 6 mile radius of the Dover Air Force Base and within 2 miles either side of the southeast course of the Dover AFB radio range extending from the radio range station to a point 10 miles southeast, excluding the portion which overlaps Danger Area D-12."

REPORTING POINTS: (1) Green civil airway No. 2 (Seattle, Wash., to Boston, Mass.) is amended by deleting the following reporting point: "the intersection of the north course of the Salem, Mich., VHF radio range and the east course of the Lansing, Mich., radio range." (Note: due to discontinuance Salem VHF VAR range station)

(2) Red civil airway No. 81 (Lansing, Mich., to Detroit, Mich.) is amended to read: "No reporting point designation." (Note: Above rewrite deletes Chelsea intersection as compulsory reporting point - intersection southeast Lansing and west Salem VAR range courses.)

✓ MINIMUM EN ROUTE IFR ALTITUDES: Effective September 28, 1954, minimums en route IFR altitudes are amended as follows:

From	To	Min. Alt.
(1) Amber Civil Airway No. 7, is amended to read in part:		
Miami, Fla. (LFR)	Bayshore (Int), Fla.	1,400
Bayshore (Int), Fla.	West Palm Beach, Fla.(LFR)	1,500
(2) Red Civil Airway No. 20, is amended to read in part:		
Goodrich (Int), Mich.	*Windsor, Ont., Canada (LFR	2,300
*For that airspace over U.S. territory		
(3) Red Civil Airway No. 68, is amended to read in part:		
Tyler, Tex. (LFR)	Shreveport, La. (LFR)	2,300
(4) Red Civil Airway No. 90, is amended to read:		
Camarillo, Calif. (LFR)	Canoga Park, Calif. (ILS/LOM)	5,000
Canoga Park, Calif. (ILS/LOM	Burbank, Calif. (LFR)	
	(Eastbound)	8,000
	(Westbound)	5,000
(5) Red Civil Airway No. 103, is amended to read in part:		
*Skilak (Int), Alaska	Cleare (Int), Alaska	9,000
*6,100'-Minimum crossing altitude at Skilak (Int), SE-bound		
Cleare (Int), Alaska	Middleton Island, Alaska (LF/RBN)	2,000
(6) Blue Civil Airway No. 27, is amended to read in part:		
Rocky Point (Int), Alaska	King Salmon, Alaska (LFR)	8,300
(7) Blue Civil Airway No. 62, is amended to read in part:		
Detroit, Mich. (FLR)	Flint, Mich. (ILS/LOM	2,500
Flint, Mich. (ILS/LOM	Saginaw, Mich. (LF/RBN)	2,200
(8) Direct Routes-United States, is amended by adding:		
Middleton Island, Alaska (LF/RBN)	Seal (Int), Alaska	2,000
(9) VOR Civil Airway No. 4, is amended to read in part:		
Malad City, Idaho (VOR)	Green River (Int), Wyo.	*13,800
*12,000'- Minimum terrain clearance altitude.		
Green River (Int), Wyo.	Rock Springs, Wyo. (VOR)	10,000
(10) VOR Civil Airway No. 7, is amended to read in part:		
Miami, Fla. (VOR)	*Tamiami (Int), Fla.	
Via W alter.	Via W alter.	1,200
*2,000'-Minimum reception altitude		
Tamiami (Int), Fla.	Ft. Myers, Fla. (VOR)	
Via W alter.	Via W alter.	*2,000
*1,200'- Minimum terrain clearance altitude		
(11) VOR Civil Airway No. 16, is amended to read in part:		
*Salt Flat, Texas. (VOR)	Gore (Int), Texas	10,000
*8,000'-Minimum crossing altitude at Salt Flat (VOR), E-bound		
*Gore (Int), Texas	Wink, Texas, (VOR)	6,000
*7,200'-Minimum crossing altitude at Gore (Int), W-bound		
(12) VOR Civil Airway No. 22, is amended to read in part:		
Tallahassee, Fla. (VOR)	Greenville (Int), Fla.	1,400
Greenville (Int), Fla.	*Genoa (Int), Fla.	**3,000
*3,000'- Minimum reception altitude		
**1,500'- Minimum terrain clearance altitude		
*Genoa (Int), Fla.	Taylor, (Int), Fla.	**2,500
*3,000'- Minimum reception altitude		
**1,300'- Minimum terrain clearance altitude		
*Taylor (Int), Fla.	Jacksonville, Fla. (VOR)	1,300
*1,500'- Minimum reception altitude		
(13) VOR Civil Airway No. 24, is amended to eliminate:		
Jamestown, N. D. (VOR)	Aberdeen, S. D. (VOR)	*3,300
*2,800'- Minimum terrain clearance altitude		
(14) VOR Civil Airway No. 42, is amended to read in part:		
Pullman, Mich. (VOR)	Bedford (Int), Mich.	*3,500
*3,000'- Minimum terrain clearance altitude		
(15) VOR Civil Airway No. 111, is added to read:		
Salinas, Calif. (VOR)	Int. 094° rad. San Francisco, Calif. (VOR) & 032° rad. Salinas, Calif. (VOR)	*7,000
*5,500' - Minimum terrain clearance altitude.		
(16) VOR Civil Airway No. 134, is added to read:		
Evergreen, Ala. (VOR)	Columbus, Ga. (VOR)	*3,500
*2,100'- Minimum terrain clearance altitude		
Columbus, Ga. (VOR)	Atlanta, Ga. (VOR)	2,400
(17) VOR Civil Airway No. 164, is amended to read:		
Grove (Int), Pa.	Wilkes-Barre Scranton, Pa. (LFR)	4,000
Wilkes-Barre Scranton, Pa. (LFR)	*Stillwater (Int), N.J.	**6,000
*Stillwater (Int), N.J.	Caldwell, N.J. (VOR)	**6,000
*6,000' - Minimum reception altitude		
**4,000' - Minimum terrain clearance altitude		

✓ DANGER AREA AMENDMENTS: The following Danger Area Amendments shall be effective as dated, unless otherwise advised:

AMENDMENT NO. 88 to PART 608-DANGER AREAS
(September 14, 1954)

(1) In Section 608.14, the Boullion Mountain, California, area (D-344), published on August 23, 1951, in 16 F.R. 8448 and amended on November 10, 1953, in 18 F.R. 7056, is further amended by changing the "Description of Geographical Coordinates" column to read: " Beginning at latitude 34°41'00", longitude 116°03'00"; thence to latitude 34°35'30", longitude 115°58'00"; thence to latitude 34°33'00", longitude 115°47'00"; thence to latitude 34°25'00", longitude 115°47'00"; thence to latitude 34°25'00", longitude 115°44'00"; thence to latitude 34°14'00", longitude 115°44'00", thence to latitude 34°14'00", longitude 116°17'00"; thence to latitude 34°31'00", longitude 116°27'30" thence to latitude 34°43'00", longitude 116°32'45"; thence to latitude 34°43'00", longitude 116°17'00"; thence to point of beginning."

AMENDMENT NO. 89, TO PART 608-DANGER AREAS
(September 14, 1954)

(1) In Section 608.18, the Pensacola, Florida, area (D-152), published on July 16, 1949, in 14 F.R. 4289, is amended by changing the "Time of Designation" column to read: "VFR only".

(2) In Section 608.18, the Pensacola, Florida, area (D-153), published on July 16, 1949, in 14 F.R. 4289, is amended by changing the "Time of Designation" column to read: "VFR only."

(3) In Section 608.18, the Pensacola, Florida, area (D-154), published on July 16, 1949, in 14 F.R. 4289, is amended by changing the "Time of Designation" column to read: "VFR only", and by changing the "Description by Geographical Coordinates" column to read: "Bounded on the east by longitude 86°48'00", bounded on the west by revised Pensacola Control Area, bounded on the north by Florida Coast, bounded on the south by a line parallel to and 3 nautical miles from the Florida Coast."

AMENDMENT NO. 90 to PART 608-DANGER AREAS
(September 10, 1954)

(1) In Section 608.24, the Manhattan, Kansas, area (D-197), published on July 16, 1949, in 14 F.R. 4291 and amended on June 20, 1953, in 18 F.R. 3561, is further amended by changing the "Designated Altitudes" column to read: "Surface to 25,000 feet MSL."

(2) In Section 608.51, the Del Rio, Texas, Laughlin AFB, area (D-463), published on August 12, 1954, in 19 F.R. 5085, is amended by changing the "Description by Geographical Coordinates" column to read; "Latitude 29°02'00"N, longitude 100°29'00"W; latitude 29° 08'00"N, longitude 100°34'00"W; latitude 29°09'00"N, longitude 100°26'00"W; latitude 29° 05'30"N, longitude 100°28'00"W; latitude 29°02'00"N, longitude 100°29'00"W.

(3) In Section 608.51, the Del Rio, Texas, Laughlin AFB area (D-464), published on August 12, 1954, in 19 F R. 5085, is amended by changing the "Description by Geographical Coordinates"column to read: "Latitude 29°37'00"N, longitude 100°36'30"W; latitude 29°37' 00"N, longitude 100°30'00"W; latitude 29°30'00"N, longitude 100°30'00"W; latitude 29°30' 00"N, longitude 100°36'30"W; latitude 29°37'00", longitude 100°36'30"W

(4) In Section 608.61, the Cook Inlet, Alaska, area (D-347), published on July 21, 1949, in 14 F.R. 1921, and amended on August 11, 1954, in 19 F.R. 5042, is further amended by changing the "Using Agency" column to read: "Alaskan Air Command."

✓ ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are designated , re-designated or cancelled as indicated:

DESIGNATIONS

(1) HAMILTON INTSXN- intersection Covington, Ky. VOR 022°true radial (0° variation) and a bearing 155° true to Cincinnati L/MF range.

(2) ALLIANCE INTSXN- intersection southeast course Akron L/MF with a line bearing 250° on Akron LOM and 070° on Hubbard H facility.

(3) ALDEN,IOWA-intersection of the direct radial between the Mason City -Des Moines, Iowa, omnirange and the radial of the Waterloo, Iowa, omnirange directed toward Sioux City, Iowa, omnirange.

(4) CLAREVILLE- intersection of the NW course of the Corpus Christi LF range and SW course of the Navy Chase (Beeville) LF range.

(5) ACTON, INDIANA - intersection of the 041° mag radial of the Scotland, Ind., and the 121° mag radial of the Indianapolis, Ind., omniranges.

(6) BANTA, INDIANA (VOR) - intersection of the 090° mag radial of the Terre Haute, Ind., omnirange and the 169° mag radial of the Indianapolis, Indiana, omnirange.

(7) BANTA, INDIANA (LFR)- intersection of the south course of the Indianapolis, Ind., LF radio range and the 302° mag bearing from the Atterbury AAF, Indiana, LF radio beacon.

(8) CASTLETON, INDIANA- intersection of the 068° mag radial of the Indianapolis, Ind. omnirange and the back (northeast) course of the Indianapolis, Indiana, ILS localizer.

(9) CLOVERDALE, INDIANA, INTSXN - intersection of the 080° mag radial of the Terre Haute, Indiana, omnirange (V-12S, V-14S), the 231° mag radial of the Indianapolis, Ind., omnirange (V-12S, V-14S) and the 009° mag radial of the Scotland, Indiana, omnirange (V-11W).

(10) FAIRGROUNDS, INDIANA INTSXN - intersection of the 083°mag radial of the Indianapolis, Indiana, omnirange (V-12) and the back (northeast)course of the Indianapolis, Indiana, ILS localizer.

(11) HORTON, INDIANA INTSXN - intersection of the 020° mag radial of the Indianapolis, Indiana, omnirange (V-11) and the 116° mag radial of the Lafayette, Indiana, omnirange (New Victor Airway).

(12) HOUSTON, INDIANA INTSX N- intersection of the 080° mag radial of the Scotland, Indiana, and the 169° mag radial of the Indianapolis, Indiana, omniranges (V-53).

(13) PITTSBORO, INDIANA INTSXN- intersection of the 054° mag radial of the Terre Haute, Indiana, omnirange and the 324° mag radial of the Indianapolis, Indiana, omnirange (V-53).

(14) PARAGON, INDIANA INTSXN - intersection of the 039° mag radial of the Scotland, Indiana omnirange (V-11E) and the 184° mag radial of the Indianapolis, Ind., omnirng (V-53W).

(15) MONROVIA, INDIANA INTSXN - intersection of the 080° mag radial of the Terre Haute, Indiana, omnirange and the front (southwest) course of the Indianapolis, Indiana, ILS localizer.

(16) RIVER, INDIANA INTSXN- intersection of the 103° mag radial of the Indianapolis, Indiana, omnirange and the back (northeast) course of the Indianapolis, Indiana, ILS localizer.

(17) ROSSVILLE, INDIANA INTSXN - intersection of the 078° mag radial of the Lafayette, Indiana, omnirange (V-96) and the 341° mag radial of the Indianapolis, Indiana, omnirange (V-97, V-53E).

(18) RUSHVILLE, INDIANA INTSXN- intersection of the 106° mag radial of the Indianapolis, Indiana, omnirange (V-97E) and the 318° mag radial of the Cincinnati, Ohio omnirange (V-97E) and the new unnumbered Victor Airway between Cincinnati, Ohio and Lafayette, Indiana.

(19) SHELBYVILLE, INDIANA INTSXN- intersection of the 121° mag radial of the Indianapolis, Indiana, omnirange (V-97) and the 031° mag bearing from the Atterbury AAF, Indiana, LF radio beacon.

(20) WABASH, INDIANA- intersection of the 249° mag radial of the Findlay, Ohio, omnirange (redesignated V-14) and the 326° mag radial of the Dayton, Ohio omnirange.

(21) WILBER, INDIANA- intersection of the 090° mag radial of the Terre Haute, Indiana omnirange and the 205° mag radial of the Indianapolis, Indiana omnirange.

REDESIGNATIONS

(22) HARTSVILLE, INDIANA- intersection of the 136° mag radial of the Indianapolis, Indiana and the 355° mag radial of the Louisville, Ky., omniranges (V-51, V-97W) and the 288° mag radial of the Cincinnati, Ohio omnirange (V-97W).

CANCELLATIONS

(23) CAMBRAI, INDIANA- intersection described as the 090° mag radial of the Lafayette, Indiana, and the 341° mag radial of the Indianapolis, Indiana omnirange.

(24) COLDWATER, OHIO- intersection described as the 242° mag radial of the Findlay, Ohio and the 143° mag radial of the Fort Wayne, Indiana.

(25) MARTINSVILLE, INDIANA-intersection described as the 094° mag radial of the Terre Haute, Indiana, and the 169° mag radial of the Indianapolis, Indiana omniranges.

✓ NON-STANDARD HOLDING PATTERNS: Effective immediately the following non-standard holding patterns are established, cancelled or re-designated as indicated:

ESTABLISHED

(1) WICHITA LFR-direction from holding point- N; direction of turn - LEFT - on E side of N leg Wichita LF range; Time - two minutes; minimum altitude - 3000'.

(2) WICHITA LOM - direction of holding pattern - S; direction of turn-LEFT on W side of S crs ILS localizer; Time - one minute; minimum altitude - 2500'.

REDESIGNATED

(1) CLIFTON INTSXN - direction from holding point - SW; direction of turn- RIGHT - E side SW crs Washington, D C., Time - one minute.

(2) NEWTON - direction from holding point: N; direction of turn - LEFT on E side N course of Wichita LFR.

(3) QUANTICO RANGE STATION: direction from holding point - S; direction of turn - RIGHT on E side S crs Quantico, Va., rng. Time - one minute.

CANCELLED

(1) KECHI INTSXN.

(2) VIOLA INTSXN.

✓ SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Adequate buffer zones have been provided for these speeds. It is recommended that all aircraft adhere closely to these restrictions and

(9-7-54)

if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

✓ AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide, Volume 9, Number 12, dated August 24, 1954 as follows:

(1) Page 5, Item (10). CONTROL ZONE (Savannah, Ga.) to read: "and within 2 miles either side of the 245 and 65 degrees true radial of the Savannah omnirange extending from Travis Field to a point 10 miles northeast of the omnirange station." in lieu of the 196 degree radial to 10 miles south.

✓ LOCATION IDENTIFIERS: The following change affects the use of location identifiers:

ISN Williston, N. D. Sloulin Airport (Change from ILS)

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 8, dated May 25, 1954, as follows:

(1) Page 21, under Dist. of Columbia change Washington National Airport - CAA number to NA 8-1336.
(2) Page 22, under Michigan change Lansing WB number to EDgewood 2-6567.
(3) Page 24, under Ohio, Cincinnati WB add telephone number CHerry 6716.
(4) Page 24, under South Carolina - delete Greenville CAA number.
(5) Page 25, under West Virginia delete Elkins WB number 138.
(6) Page 22, under Florida change Tampa CAA number to 80-1661.

✓ INSTRUMENT APPROACH PROCEDURES TO BE SOLD ON SPECIAL SUBSCRIPTION BASIS: Because of a demand for instrument approach information prior to publication in the Airman's Guide or Federal Register, the CAA has made arrangements for the issuance and distribution of individual copies of these procedures on a subscription basis to be delivered once each week. The annual subscription rate has been set at $125.00 per year. For each additional copy mailed to the same address, the annual subscription price will be $25.00. Checks should be made payable to the Treasurer of the United States and mailed to: Sales and Distribution Division, Room 6227, Commerce Department, Washington 25, D.C.

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Austin	Dallas	Roswell	WAC 468
Beaumont	Oklahoma City	WAC 190	WAC 525

A new edition (or new chart) for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, danger area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: - Because of space limitation such items are cited only once. The erection or removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALEXANDER CITY-RUSSELL ARPT: N/S Strip closed - const. (8-12)
ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
**ANNISTON ARPT: 574' (2981'MSL) lgtd TV twr erected 7 mi SSE (158°T) at lat 33-29-06; long 85-48-32. (7-21)
BIRMINGHAM-RADIO: VOR courses 005°-035°; 075°-175° and 195°-265° usable. Arpt apch course unusable within 15 mi; other courses not usable due to roughness and bends. (4-23)
BIRMINGHAM ARPT: 150' temp twr erected adj to fld at lat 33-30-12, long. 86-45-12.(2-12) Caution, tfc operg in area from 165° clockwise thru 235° not visible from ctl twr to distance of 4 miles. (4-15)
EVERGREEN-MIDDLETON FLD: Caution-vehicles and farm equip intermittently crossing rnwys and using taxi strips.
HOLT BCN SITE 60, FTW-ATL: Soon bcn site will be decmsnd. (7-31)
HUNTSVILLE-RADIO: VOR radials 20°-70°; 100°-130°; 150°-210°; 255°-270°, rough and unusable. VOR not usable for apchs to Huntsville Arpt due to roughness, bends and signal cancellation. (4-7)
HUNTSVILLE ARPT: NE/SW Rnwy lgts inop. (2-6)
MOBILE-RADIO: VOR flgt-checked on arwy radials only.
MOBILE-BATES ARPT-TOWER: About Sept 13, ILS will be shut down for approx one week-
** installation of new monitoring equip. (8-19) FLD: 313'(574'MSL) lgtd rdo relay twr erected 49 mi NNW (350°T) at lat 31-23-18; long 88-22-14.(7-9). 326' (516'M SL) lgtd rdo relay twr erected 30 mi NE (25°T) at lat 31-05-36; long. 88-01-51. (7-10) 231' (461'MSL) rdo twr erected 26.5 mi E (80°T) at lat 30-45-20; long 87-47-31. (8-27)
MONTGOMERY-RADIO: DME coverage 130°-230°, 40 mi at 1500'. (5-20)
MONTGOMERY-DANNELLY FLD: Rnwys 3-21 and 15-33 closed. Dips in E/W Rnwy 1500' from E end. (7-19) Use right hand traffic pattern Rnwy 9. (8-23)
**TALLASSEE ARPT: 303' (722'MSL) lgtd rdo twr erected 5.5 mi NNW (330°T) at lat 32-33-27; long 85-55-03. (9-3)
ARIZONA: CHANDLER-WILLIAMS AFB-RADIO: USAF VHF/DF steers unreliable on inbound headings 300° - 080° below 7000' beyond 40 mi from stn. (12-7)
COCHISE-RADIO: DME coverage 15°-35°, 40 mi at 12,000'; 210°-245°, 40 mi at 11,000.(6-30)
DOUGLAS-RADIO: About Sept 15, VOR will be shut down until approx Sept 22 - freq chg from 112.9 mc to 112.6 mc. (8-5)
DOUGLAS-BISBEE-DOUGLAS INTERNATIONAL ARPT: Pilots are cautioned to use maximum length of rnwys for landings and take-offs - due to obstructed view of ends. Take-offs from intersections of rnwys and taxiways prohibited.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 30 to 35 mi on 247° radial and at 35 to 40 mi on 106° radial.
HASSAYAMPA-RADIO: DME coverage 325°-50°, 50 mi at 10,000'; 50°-90°, 50 mi at 5000'; 90°-180°, 50 mi at 7000'; 180°-215°, 50 mi at 4000'; 215°-235°, 50 mi at 6000'; 235°-255°, 40 mi at 6000'; 255°-270°, 50 mi at 6000'; 270°-325°, 50 mi at 8000'. (7-15)
KINGMAN ARPT: Caution-intermittent targent plane testing in vcnty. Rdo controlled acft operating in area NW of fld.
PRESCOTT-RADIO: VOR radials 185°-225° usable dist 40 mi at 10,000'; 135°-145° and 165°-185° usable dist 45 mi at 10,000'.
ARIZONA: TUCSON-RADIO: Only VOR arwy radials flgt-checked. Coverage lmtd to 40 mi at 11,000' 0°-12°, 69°-72° and 330°-346°; 30 mi at 11,000'; 44°-69° and 346°-0°. (7-9) June 14, LF rng shut down for indefinite period - relctn.
TUCSON-DAVIS-MONTHAN AFB-RADIO: USAF VHF/DF lmtd in rng to 30 mi in quads containing inbound headings of 150-210° and 245-275°; rng 50 mi other quads; steers unreliable below 13,000' all quads. (12-23) USAF UHF/DF unreliable 170°-270° below 14,500' at 40 mi; unreliable at min en route alts all quads. UHF/DF inop 0800-0900 each Wed. (2-3)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (2-3)
ARKANSAS: **BENTONVILLE ARPT: 303' (1643'MSL) lgtd rdo twr erected 2-1/8 mi ESE (114°T) at lat 36-20-04; long 94-10-41. (8-27)
FAYETTEVILLE ARPT: Men and equip on fld daylgt hrs. (8-13)
HARRISON ARPT: New NW/SE Rnwy under const. Fld clsd for ngt operns. (3-10)
TEXARKANA-RADIO: VOR 143° radial to Rnwy 13 beyond tolerance due to roughness and bends. (6-10) DME coverage 1900', 50 mi in all quads.
WALNUT RIDGE-RADIO: VOR radials 290°-320° and 120°-150° have severe bends and course roughness. (4-14)
CALIFORNIA: ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.
BAKERSFIELD-RADIO: VOR has slight to moderate scalloping in SE quad 80°-123°. Radials 0, 90, 100, 130, 140, 150, 220, 270, 300 and 330° flgt-checked.
BAKERSFIELD-KERN COUNTY ARPT-TOWER: Effect. Sept 26, twr hrs of opern will be 0600-2200. (9-3)
BLYTHE-RADIO: DME coverage 165°-188°, 45 mi at 7000'; 180°-200°, 30 mi at 6000'; 200°-220°, 45 mi at 6000'; 220°-293°, 50 mi at 9000'; 293°-310°, 30 mi at 9000'; 310°-327° 40 mi at 9000'.
BRAWLEY ARPT: E/W Rnwy clsd-construction. (4-30)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 25 mi.
DAGGETT-RADIO: VOR 113.2 mc. Only arwy radials flgt-checked.
EDWARDS AFB-RADIO: USAF LF rng courses have splits and multiples, unreliable beyond 35 mi. (4-14)
EUREKA COUNTY ARPT: All lgtg fac inop. Length of surfaced rnwy reduced to 1400' and grass strip clsd. Const in progress on and adj to arpt. Caution - use at own risk. (5-29)
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-chkd.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 30 mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 50 mi at 3000'; 350°-10°, 50 mi at 8000'; 10°-30°, 50 mi at 9000'; 30°-120°, 40 mi at 9000'; 120°-150°, 40 mi at 6500'; 150°-335°, over water, not checked. (6-16) Soon DME at VOR site will be discontd. (8-20)
★FRESNO AIR TERMINAL-TOWER: Sept 2, freq 257.8 mc cmsnd. Too late for ANRA.
FURNACE CREEK ARPT, SITE 17, RIV-TDL: Fld closed, const. Mrkd. (8-13)
GASQUET ARPT: N side of strip clsd - const.
KLAMATH-McBETH FLD: Closed-high vegetation. (7-27)
LONG BEACH-RADIO: DME coverage 50 mi as follows: 280°-305°, 5000'; 305°-340°,7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16)
LONG BEACH ARPT: Tfc ctl twr will be relctd in temp structure on SE corner of roof of Admin. Bldg. Durg new twr const twr will not be able to control tfc on areas of ramp, taxiways, rnwys, and fld NW of temp twr, due to non-visibility. (3-4) North lndg mat closed to all opern - rough and hazardous. (4-9) Two 175' lgtd oil derricks - one 1500' W and 1500' N Rnwy 25R; one, 1500' N Rnwy 25L, 1500' S Rnwy 25R and 2500'W Rnwy 16R.
LONG BEACH-EAST LONG BEACH ARPT: Caution - const W side NE/SW Rnwy and S side E/W Rnwy. Land W and N sides respectively. (7-23)
LOS ANGELES-RADIO: VAR visual courses not usable - moderate scalloping N sector.
LOS ANGELES INTERNATIONAL ARPT-TOWER: ILS on Rnwy 25L inoperative; ILS on Rnwy 25R will be operative, but radar monitored apchs not avail until approx Sept. 23.(8-16) FLD: FIDO testing at irregular intervals. Due to non-visibility twr unable to ctl tfc on first 300' and last 600' of Rnwy 34 and last 1000' of Rnwy 29. Equip on and adj to const areas. (6-4)
NEEDLES-RADIO: VOR 40 mi coverage from 5°-15° and 190° - 205° at 8000', and 50° radial at 10,000'.

(9-7-54)

CALIFORNIA: OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 2 mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR maximum usable dist 40 mi N thru E at min instr alt. (1-4) DME coverage 80°-120°, 50 mi at 6000'; 120°-175°, 50 mi at 5000'; 175°-280°, 50 mi at 4000'; 280° 290°, 40 mi at 4000'; 290°-305°, 50 mi at 4000'; 305°-340°, 50 mi at 6000'; 340°-350°, 40 mi at 6000'; 350°-030°, 20 mi at 4000'; 30°-60°, 30 mi at 5000'; 60°-80°, 40 mi at 5000'. (6-2)

OCEANSIDE-HI HI SKY RANCH ARPT: Caution ditch in center of strip. (7-8)

ONTARIO-RADIO: DME coverage 0°-90°, 50 mi at 13,000'; 90°-135°, 50 mi at 9000'; 135°-150°, 30 mi at 7000'; 150°-200°, 20 mi at 7000'; 200°-280°, 40 mi at 7000'; 280°-300°, 50 mi at 9000'; 300°-330°, 50 mi at 13,000'; 330°-350°, 30 mi at 13,000'; 350°-0°, 40 mi at 13,000'.

ONTARIO INTERNATIONAL ARPT-TOWER: ILS LOM reported unreliable for navigational purposes durg hrs of darkness due strong heterodyne interference Mexicali H fac. (5-26)

PALMDALE-RADIO: VOR coverage 120°-150°, 40 mi at 10,000'; 150°-180°, 40 mi at 9000'.

**PALM SPRINGS ARPT: Rnwy lgts now operating automatically on perm schedule. (7-2)

PALO ALTO ARPT: WNW/ESE Rnwy and all dirt areas clsd. Use main NNW/SSE Rnwy 1900' only with extreme caution. Men and equip. on fld. Caution - const. (8-1)

SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Trans & rcvg freq 132.3 mc out of service. (2-9)
SEATTLE-BOEING FLD-TOWER: About Sept 15, ILS OM and LOM will be shut down until approx Sept 30- modernization. (9-3) FLD: All daylight VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Light gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward tower. Heavy acft use main rnwys, taxi strips only, making tfc pat. W of fld at 1000'.

WASHINGTON: SHELTON-RADIO: LF rng on 371 kc has lmtd usable course dist as follows: S course 35 mi, SW and N, 30 mi each.
SPOKANE-RADIO: DME and VOR coverage 36°-152°, 50 mi at 7000'; 152°-224°, 50 mi at 5000'; 224°-264°, 50 mi at 6000'; 264°-36°, 50 mi at 8000'. (6-17)
SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable 300°-70° at 6000'; 70°-90° at 9000'; 90°-140° at 11,000'; 140°-180° and 250°-300° at 12,000'. (4-20) USAF VHF/DF opers 0700-2300 Mon-Fri; 0700-1100 Sat; trng status. (5-27)
SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld. (12-19)
SPOKANE-GEIGER FLD-TOWER: Back course ILS lclzr usable 10 mi with flyable bends. FLD: Caution-const on ramp N of control tower. Mil acft parked adj to taxiway between Rnwy 20 and control twr.
YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.
WEST VIRGINIA: BECKLEY-RALEIGH CO. MEM'L ARPT: 4 poles supporting obstn lgts extending 25' above tree tops from E end E/W Rnwy to S of center line of apch. (5-31)
CHARLESTON-RADIO: VOR coverage 10°-58°, 30 mi at 3000'; 270°-330°, 30 mi at 2500'. Moderate roughness all azimuths. (3-16) DME at VOR site shut down. (3-16)
**CHARLESTON-KANAWHA COUNTY ARPT: 649' (1549' MSL) lgtd TV twr erected 5.2 mi WNW (275°T) at lat. 38-22-36; long 81-42-04. (7-1)
ELKINS-RADIO: LF rng has multiples and fades all courses. (9-10). DME coverage 35°-95°, 50 mi at 6800'; 95°-120°, 40 mi at 6800'; 120°-165°, 30 mi at 6800'; 165°-195°, 40 mi at 6800'; 195°-220°, 50 mi at 6800'; 220°-35°, 50 mi at 5000'. (7-1)
ELKINS ARPT: Taxiway clsd for maint from ramp to end Rnwy 31, approx 50' left side taxiway from intsxn to ramp-very ruf. (8-2)
MARTINSBURG-RADIO: DME coverage 50°-95°, 40 mi at 2500'; 95°-150°, 40 mi at 2000'; 50 mi at all other azimuths at min en route alt. (7-7)
MARTINSBURG ARPT: Glider flying-peak activity expected on weekends and holidays. Serv fac avail 0800 until sunset. (9-6)
MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution-dip midway Rnwy 16-34 covering full width of rnwy. (5-4)
WHITE SULPHUR SPRINGS-RADIO: Private MH fac operg on test basis. Freq: 406 kc. Ident: SSU. Lctd just N of E end rnwy Greenbrier Arpt. Opers 0800-darkness. (6-3)
WISCONSIN: GRANTSBURG-RADIO: VOR has counterclockwise course errors up to .5° in excess of tolerance from azimuth angles 95° thru 125° and clockwise errors up to 1.5° in excess of tolerance at azimuth angles 220° thru 245°. (8-10)
**HAYWARD ARPT: Airport not abandoned. Opened and maintained by Chamber of Commerce.
JANESVILLE-RADIO: VOR courses rough all azimuths within 5 mi of stn. (6-8)
**LAKE TOMAHAWK-DOLHUNS RESORT ARPT: 36'' rotating bcn, clear and green, rotates 6 rpm; cmsnd June 15.
**LONE ROCK ARPT 15, CHI-MPS: Aug 17 Intermediate fld perm discontd. (8-23)
MADISON-TRUAZ FLD-TOWER: Caution - twr rdo reception intermittently blocked out by jet acft run-ups. (6-16) FLD: E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Caution crossing hwy in lndg Rnwys 22, 26, 31. Sod unsafe. Due to non-visibility, twr unable to ctl tfc on first 1000' S end Rnwy 18-36 adj taxiway and all portions of civil and mil ramps. Equip on fld. Caution - lndg jet interceptor acft using tactical left hand over-head appchs at 2300' MSL. (3-30) Overrun lgts S end Rnwy 18-36 inop. (9-1)
**MARSHFIELD ARPT: New NW/SE Rnwy 2800' hard surfaced and soft shoulders. E/W Rnwy 2600' long,dirt. N E/SW Rnwy perm closed giving arpt only 2 rnwys. (8-31)
MILWAUKEE-RADIO: VOR has moderate course roughness in area between 200° and 220°. DME coverage 190°-200°, 40 mi; 200°-190°, 50 mi at min en route alt. (6-11)
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: July 26, VHF/DF recmsnd, not flgt-checked at combined stn/twr. (8-5) Freq 118.5 mc changed to 124.9 mc. ASR cmsnd.(9-3) FLD: Rnwy 13-31 clsd. Rnwy 6-24 clsd 0700-1700. (8-10)
NEENAH-VALLEY ARPT: N/S strip clsd-golf driving range, roadway on end. (8-13)
RHINELANDER-ONEIDA COUNTY ARPT: Grading and paving NW/SE Strip. Men and equip. on fld. (6-22)
WATERTOWN ARPT: NE/SW Strip clsd-const. (5-21)
WAUKESHA-COUNTY ARPT: Caution-E/W Strip under const. Men and equip. on fld. (7-6)
WYOMING: CASPER-RADIO: About Sept 14, ILS will be shut down until approx Sept 24 - modernization. (8-25) ILS glide slope has moderate to severe path roughness above 7300' and beyond 7 mi. Not to be used for auto. pilot apchs.
WYOMING: CHEYENNE-RADIO: DME coverage at 50 mi as follows: 10°-120°, 7300'; 120°-180°, 7500'; 180°-280°, 11,000'; 280°-325°, 10,500'; 325°-340°, 9000'; 340°-010°, 7500'.(5-5)
CHEYENNE-ARPT-TOWER: July 1, ILS shut down until approx Oct. 1 - rnwy construction.
CHEYENNE ARPT: Clsd to transient jet acft till approx Oct. 1, except in emergencies.
GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S Strip soft-clsd to hvy acft.
LARAMIE-RADIO: DME coverage 360°-155°, 50 mi at 11,000'; 155°-225°, 40 mi at 15,000'; 225°-300°, 30 mi at 15,000'; 300°-360°, 50 mi at 11,000'. (7-2)
LARAMIE-BREES FLD: Caution deer on fld. (6-29)
**LINGLE ARPT: Abandoned. (7-16)
ROCK RIVER-RADIO: DME coverage 360°-40°, 50 mi at 11,000'; 40°-110°, 50 mi at 11,300'; 110°-160°,50 mi at 11,000'; 160°-230°, 50 mi at 15,000'; 230°-360°, 50 mi at 12,000'. (7-20)
ROCK SPRINGS ARPT: Caution-first 500' NW end NW/SE Rnwy clsd - marked. (3-18)
SHERIDAN-RADIO: VOR coverage lmtd to approx 40 mi between 150 and 280° and moderate course roughness exists in mountainous area. (4-26)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator (FPDI) centered the omnibearing selector should read 0° with the to-from indication being "From" or the omnibearing selector should read 180° with the to-from indication read "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ± 4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of Sept. 7, 1954, check points or facilitites have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 112.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

NOTICE: Starting with Vol 9 #11, (8-10-54) the Airman's Guide began to publish some instrument approach procedures with the lowest landing and take-off minimums possible under the obstruction clearance requirements of the Regulations of the Administrator, Part 609. Below are the ones contained in this issue. These minimums apply to all users except military aircraft and those for whom the Administrator has specifically authorized other minimums. ILS and GCA (PAR) straight-in landing minimums, formerly published no lower than 400-3/4, may in some instances be lowered to 200-1/2. Straight-in LFR, ADF and VOR landing minimums, formerly no lower than 500-1, may in some instances be lowered to 400-1. There are now three categories of aircraft minimums, namely those for (1) 75 mph or less- 2-engine or less, (2) more than 75 mph - 2-engine or less, and (3) more than 75 mph - more than 2 engine. All users are warned that the lowering of these minimums published in the Airman's Guide does not necessarily imply that obstructions have been lowered or removed.

LOW FREQUENCY RANGE PROCEDURES

When an LFR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

CITY AND STATE / AIRPORT NAME / AIRPORT ELEVATION / CLASS OF FACILITY / FREQ / IDENT / PROCEDURE NO.	INITIAL APPROACH TO FACILITY: FROM	CRS AND DIST.	MIN ALT.	PROCEDURE TURN ( ) SIDE OF FINAL APCH CRS (OUTBND AND INBND) ALTITUDES LIMITING DISTANCES	MIN ALT OVER FACILITY ON FINAL APPROACH COURSE	CRS AND DISTANCE FACILITY TO AIRPORT	CEILING AND VISIBILITY MINIMUMS: CONDITION	TYPE AIRCRAFT: 75 MPH OR LESS	TYPE AIRCRAFT: MORE THAN 75 MPH	IF VISUAL CONTACT NOT ESTABLISHED AT AUTHORIZED LANDING MINIMUMS AFTER PASSING FACILITY WITHIN DISTANCE SPECIFIED BELOW OR IF LANDING NOT ACCOMPLISHED / REMARKS
1	2	3	4	5	6	7	8	9	10	11
SHREVEPORT, LA Downtown Airport 179 SF-RAZ-DTV - SHV Procedure No. 1 Amendment M-6 Supersedes Amdt. NOTICES TO AIRMEN Page 2

VOL. 9, NO. 14 .. SEPTEMBER 21, 1954

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.1 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerour air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) .-.. --. -... (LGB in Code).

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciably higher rate of speed than the location identifier.

NAUTICAL MILES - STATUTE MILES: NEW DIMENSIONAL UNIT PROCEDURES: Among the various segments of the aviation industry there are many users of the airspace who desire to use nautical units for speed and distance measurements in their operations while others prefer the use of statute units. A plan designed to best serve the interests of all concerned has been developed and will be placed in effect on October 1, 1954. The plan generally provides that the pilots of all air carrier aircraft and all military aircraft shall use nautical units exclusively in all of their operations whether IFR or VFR. Private and business aircraft pilots, on the other hand, may use either nautical or statute units according to their preference.

Since uniformity is essential to the efficient operation of the Federal Airways System, all CAA facilities (communications stations, airport traffic control towers and air route traffic control centers) will use knots and nautical miles as the standard for all internal operations involving speed and distance values. Also, all normal radio transmissions of speed and distance values by these facilities will be in terms of knots and nautical miles with the exception of visibility which will continue to be reported and transmitted in statute miles. Any speed or distance value (except those associated with radar traffic control) will be converted from nautical to statute units by CAA facilities upon receipt of specific requests from pilots of private and business aircraft.

At the present time, surface wind velocity is reported in miles per hour. Beginning October 1, surface wind velocity will be reported in knots. Hence, when surface wind is reported as "west south west eight" it will be eight knots rather than eight miles per hour. This change need be of no great concern to the pilot, however, since, until a velocity of thirty miles per hour or more is reached, the difference between miles per hour and knots is so slight as to be insignificant for all practical purposes. In any case, if the pilot of a private or business aircraft wants the wind velocity in miles per hour, the CAA facility will convert it upon request.

When filing IFR flight plans and conducting IFR flight, distance and speed information submitted to CAA facilities by all pilots should, if possible, be in nautical units since the ground system will operate on the basis of nautical units. If statute units are used by the private or business aircraft pilot, they should be identified as such in each case; i.e., "airspeed 110 miles per hour". The CAA facility will then convert the value to knots for internal use.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 8, 1953

(9-21-54)

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.75, domestic; $3.75, foreign; individual copies vary.

✓ SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Entry into and maneuvering within these patterns should be made at speeds within this tolerance as buffer zones have been provided only for these speeds. It is recommended that all aircraft adhere closely to these restrictions and if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

✓ INSTRUMENT APPROACH PROCEDURES TO BE SOLD ON SPECIAL SUBSCRIPTION BASIS: Because of a demand for instrument approach information prior to publication in the Airman's Guide or Federal Register, the CAA has made arrangements for the issuance and distribution of individual copies of these procedures on a subscription basis to be delivered once each week. The annual subscription rate has been set at $125.00 per year. For each additional copy mailed to the same address, the annual subscription price will be $25.00. Checks should be made payable to the Treasurer of the United States and mailed to: Sales and Distribution Division, Room 6227, Commerce Department, Washington 25, D.C.

✓ CHANGES IN INSTRUMENT APPROACH PROCEDURES MINIMUMS: Starting with Volume 9, Number 11 dated August 10, 1954, the Airman's Guide began to publish some instrument approach procedures with the lowest landing and take-off minimums possible under the obstruction clearance requirements of the Regulations of the Administrator, Part 609. These minimums apply to all users except military aircraft and those for whom the Administrator has specifically authorized other minimums. Further details may be found in the note preceding the Instrument Approach Procedures on page 20 of this issue. However, all users are warned that the lowering of these minimums published in the Airman's Guide does not necessarily imply that obstructions have been lowered or removed.

✓ FLIGHTS INTO REMOTE AREAS OF CANADA: Information received by the Office of Aviation Safety indicated that U.S. pilots are disregarding fundamental safety considerations when flying into or over the remote areas of Canada. The chief safety considerations being transgressed by U.S. pilots are: Failure to carry proper emergency equipment, failure to file a flight plan, failure to notify proper authorities of any changes, and failure to close flight plans.

Prior to commencing a flight into unsettled territory, U.S. pilots should obtain advice and information on the emergency equipment and flight procedures from the nearest office of the Department of Transport, Civil Aviation Division. The addresses are:

District Superintendent
Air Regulations, 401 Winch Building
Vancouver, B.C.

District Superintendent
Air Regulations, 260 Richmond St., W.
Toronto, Ontario

District Superintendent
Air Regulations, 320 Blowey
Henry Building
Edmonton, Alberta

District Superintendent
Air Regulations, Trans-Atlantic Building
Montreal Airport, Dorval, P. Q.

District Superintendent
Air Regulations 612 Power Building
Winnipeg, Manitoba

District Superintendent
Air Regulations, P.O. Box 42,
Moncton, N. B.

Particulars given should include name of pilot and number of passengers, registration markings and type of aircraft, radio equipment carried, point of intended entry, itinerary and point of intended departure.

✓ DANGER AREA AMENDMENTS: The following Danger Area Amendment shall be become effective on October 7, 1954:

AMENDMENT NO. 91 to PART 608-DANGER AREAS

A danger area to be known as the Mamainse Point, Ontario, Canada, danger area has been recommended by the AirCoordinating Committe, Airspace Subcommittee. This danger area lies partly in Canada and partly in the United States and will have the following over-all description: From latitude 47°16'00", longitude 84°48'00"; thence to latitude 47°20'00", longitude 84°44'00"; thence to latitude 47°14'55", longitude 84°31'30"; thence to latitude 46°52'30", longitude 84°51'30"; thence to latitude 46°48'50", longitude 84°54'15"; thence to latitude 46°54'00", longitude 85°07'00"; thence to latitude 46°58'15", longitude 85°03'30"; thence along an arc 25,000 yds radius centered at latitude 47°03'10", longitude 84°46'00"; thence to the point of beginning.

That portion of the danger area lying within Canada will be designated by the Canadian Government. That portion of the area lying within the United States, is hereby designated as the Camp Lucas, Michigan danger area (Mamainse Point, Ontario, Canada) and will include all the airspace described below:

In Section 608.30 a Camp Lucas, Michigan area, (Mamainse Point, Ontario, Canada) (D-467) is added to read: Name: Camp Lucas, Michigan (Mamainse Point, Ontario, Canada). Description: Beginning at latitude 46°52'30", longitude 84°51'30"; thence to latitude 46°48'50", longitude 84°54'15"; thence to latitude 46°54'00", longitude 85°07'00"; thence to latitude 46°58'15", longitude 85°03'30"; thence to the point of beginning. Altitudes: Surface to 45,000 feet MSL. Using Agency: Camp Lucas, Michigan.

✓ LOCATION IDENTIFIERS: The following changes affect the use of location identifiers:

AHZ	Natchez, Miss., REP (change from NTZ)
BKH	Mana, Kauai, T. H., Bonham AFB (name change)
EVM	Eveleth, Minn., Virginia Airport (assignment)
LHD	Lake Hood (Anchorage), Alaska (assignment)
LNR	Lone Rock, Wis., REP (change from Int. Field)
MPZ	Minneapolis, Kans., Radiobeacon (assignment)
OAB	Falmouth, Mass., Otis Radiobeacon (assignment)
RKI	Rock Island (Wenatchee), Wash. (assignment)
RMY	Aguadilla, P. R., Ramey Radiobeacon (assignment)
SXZ	Slide Mountain, Nev. (deletion)
TLX	Toledo, Ohio, Express Airport (Assignment)
EA	Empress, Alta. (assignment)
OV	Oakville, Man. (assignment)
WS	Wesleyville, Nfld. (assignment)

✓ MINIMUM EN ROUTE IFR ALTITUDES: Effective October 12, 1954, minimum en route IFR altitudes are amended as follows:

From	To	Min. Alt.
(1) Green Civil Airway No. 2, is amended to read in part:		
Buffalo, N. Y. (LFR)	East Pembroke (Int), N.Y.	1,900
East Pembroke (Int), N.Y.	Rush (Int), N.Y.	2,100
Rush (Int), N.Y.	Rochester, N.Y. (LFR)	2,000
(2) Amber Civil Airway No. 7, is amended to read in part:		
Woodstock (Int), Conn.	Bedford, Mass. (LF/RBN)	2,400
Bedford, Mass. (LF/RBN)	Boston, Mass. (LFR)	1,700
(3) Red Civil Airway No. 63, is amended to delete:		
Jackson, Mich.	Salem, Mich. (VAR)	2,500
Salem, Mich. (VAR)	Warren (Int), Mich.	2,700
(4) Red Civil Airway No. 63, is amended to read in part:		
Battle Creek, Mich. (LFR)	Jackson, Mich. (LF/RBN)	2,300
(5) Blue Civil Airway No. 15, is amended to read in part:		
Akron, Ohio (ILS/LOM)	Alliance (Int), Ohio	2,300
Alliance (Int), Ohio	Hubbard, Ohio (LF/RBN)	3,000
(6) Blue Civil Airway No.62, is amended to read in part:		
Detroit, Mich. (LFR)	White Lake (Int), Mich.	2,500
White Lake (Int), Mich.	Flint, Mich. (ILS/LOM)	2,200
(7) Blue Civil Airway No. 63, is amended by adding:		
Laconia, N.H. (LF/RBN)	North Conway, N.H. (LF/RBN)	6,000
North Conway, N.H. (LF/RBN)	Berlin, NH (LF/RBN)	8,000
(8) VOR Civil Airway No. 4, is amended to read in part:		
Kansas City, Mo. (VOR) via N alter.	*Tina (Int), Mo. via N alter.	**3,000
*Tina (Int), Mo. via N alter.	Columbia, Mo. (VOR) via N alter.	**4,900

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONES, AND REPORTING POINT AMENDMENTS: Effective 0001 EST, October 12, 1954, unless otherwise advised these are amended in whole or in part as follows:

(1) Blue civil airway No. 36 is amended by changing caption to read: (Akron, Colo. to Kimball, Nebr.) From the Akron, Colo., radio range station to the intersection of the north course of the Akron, Colo., radio range and the east course of the Cheyenne, Nebr., radio range." (Note: Above deletes portion of Blue 36 from Ranch intersection to Akron rng stn).

(2) VOR civil airway No. 4 (Seattle, Wash. to Washington, D.C.), is amended by deleting that portion which read: "via the intersection of the Kansas City omnirange 076° true and the Columbia omnirange 291° true radials, " and substituting the following in lieu thereof: via the intersection of the Kansas City omnirange 076° true and the Columbia omnirange 292° true radials."

(3) VOR civil airway No. 10 (Pueblo, Colo., to New York, N.Y.) is amended by deleting the portion which reads: "via the intersection of the Kansas City Omnirange 076° true and the Kirksville omnirange 227° true radials;" and substituting the following in lieu thereof: "via the intersection of the Kansas City omnirange 076° true and the Kirksville omnirange 225° true radials."

(4) VOR civil airway No. 12 (Palmdale, Calif., to Philadelphia, Pa.), is amended by changing all after the Anthony, Kans., omnirange station to read; "Anthony, Kans., omnirange stn, including a north alternate via the intersection of the Anthony omnirange 030° true and the Wichita omnirange 253° true radials and also a south alternate via the intersection of the Anthony omnirange 078° true and the Wichita omnirange 194° true radials; Emporia, Kans. omnirange station, including a north alternate via the intersection of the Wichita omnirange 046° true and the Emporia omnirange 259° true radials; Kansas City, Mo., omnirange station, including north alternate; Columbia, Mo., omnirange station, including a south alternate and also a north alternate via the intersection of the Kansas City omnirange 076° true and the Columbia omnirange 292° true radials; St. Louis, Mo., omnirange station, including a north and a south alternate; Vandalia, Ill., omnirange station, including a north alternate via the intersection of the St. Louis omnirange 050° true and the Vandalia omnirange 279° true radials; Terre Haute, Ind. omnirange station including a north alternate; Indianapolis, Ind., omnirange station, including a north alternate; Dayton, Ohio, omnirange station, including a north alternate; Columbia, Ohio, omnirange station, including a north alternate via the intersection of the Dayton omnirange 060° true and the Columbus omnirange 281° true radials; Wheeling, W. Va., omnirange station; Pittsburgh, Pa., omnirange station; Harrisburg, Pa., omnirange station to the West Chester, Pa., omnirange station, including a north alternate via the intersection of the Harrisburg omnirange 086° true and the West Chester omnirange 304° true radials."

(5) VOR civil airway No. 24, (Aberdeen, S. Dak., to Redwood Falls, Minn.) is amended to read: "From the Aberdeen, S. Dak., omnirange station via the Watertown, S. Dak., omnirange station, including a north alternate; to the Redwood Falls, Minn., omnirange station, including a north alternate via the intersection of the Watertown omnirange 085° true and the Redwood Falls omnirange 305° true radials."

(6) VOR civil airway No. 30 (Milwaukee, Wis., to New York, N.Y.) is amended to read: "From the Milwaukee, Wis., omnirange station via the Pullman, Mich., omnirange station, including a south alternate; Litchfield, Mich., omnirange station; Waterville, Ohio, omnirng station, intersection of the Waterville omnirange 111° true radial and the west course of the Wellington, Ohio, VAR station; Wellington, Ohio, VAR station; intersection of the east course of the Wellington, Ohio, VAR station and the Youngstown omnirange 250° true radial; Youngstown, Ohio, omnirange station; Philipsburg, Pa., omnirange station; Selinsgrove, Pa., omnirange station; Allentown, Pa., omnirange station to the point of intersection of the Allentown omnirange 088° true and the Wilton, Conn., omnirange 233° true radials. From the Idlewild, N.Y., omnirange station to the point of intersection of the Idlewild omnirange 082° true and the Riverhead, N.Y., omnirange 180° true radials."

(7) VOR civil airway No. 47 (Louisville, Ky., to Detroit, Mich.) is amended by changing

all before the Findlay, Ohio, omnirange station to read: "From the Louisville, Ky., omnirng station via the intersection of the Louisville omnirange 356° true and the Cincinnati omnirng 241° true radials; Cincinnati, Ohio omnirange station; Dayton, Ohio omnirange station, including a west alternate via the intersection of the Cincinnati omnirange 004° true and the Dayton omnirange 227° true radials; Findlay, Ohio omnirange station, including a west alternate."

(8) VOR civil airway No. 50 (St. Joseph, Mo., to Peoria, Ill.) is amended to read: "From the St. Joseph, Mo., omnirange station via the Kirksville, Mo., omnirange station; Quincy, Ill., omnirange station, including a south alternate via the intersection of the Kirksville omnirng 121° true and the Quincy omnirange 258° true radials; to the point of intersection of the Pontiac, Ill., omnirange 258° true and the Bradford, Ill., omnirange 188° true radials."

(9) VOR civil airway No. 68 (Albuquerque, N. Mex., to Brownsville, Texas) is amended by changing all before the Roswell, N. Mex., omnirange station to read: " That airspace over United States territory from the Albuquerque, N. Mex., omnirange station via the Corona, N. Mex., omnirange station, including a north alternate via the intersection of the Albuquerque omnirange 103° true and the Corona omnirange 328° true radials and also a south alternate via the intersection of the Albuquerque omnirange 169° true and the Corona omnirange 272° true radials; Roswell, N. Mex., omnirange station, including a north alternate."

(10) VOR civil airway No. 78 (Huron, S. Dak., to Minneapolis, Minn.) is amended to read: "From the Huron, S. Dak., omnirange station via the Watertown, S. Dak., omnirange station, including a south alternate; to the Minneapolis, Minn., omnirange station."

(11) VOR civil airway No. 91 (New York, N.Y., to Plattsburg, N.Y.) is amended to read: "From the Idlewild, N.Y., omnirange station via the point of intersection of the Idlewild omnirange 042° true and the Wilton omnirange 185° true; Wilton, Conn., omnirange station; Poughkeepsie, N.Y., omnirange station; Albany, N.Y., omnirange station to the Plattsburg, N.Y., omnirange station."

(12) VOR civil airway No. 116, is amended by changing the caption to read: (Kansas City, Mo., to New York, N.Y.) and by changing all before the Litchfield, Mich., omnirange station to read: " From the Kansas City, Mo., omnirange station via the Quincy, Ill., omnirange stn to the point of intersection of the Quincy omnirange 055° true and the Bradford, Ill., omnirng 188° true radials. From the Peoria, Ill., radio range station via a point at latitude 41°10'00" north, longitude 88°57'00" west; Naperville, Ill., omnirange station; South Bend, Ind., omnirange station; Litchfield, Mich., omnirange station, including a north alternate;"

(13) VOR civil airway No. 140 is amended by chaning the caption to read: (Tulsa, Okla., to New York, N.Y.) and by changing all before the Corbin, KY., VAR station to read: "From the Tulsa, Okla., omnirange station via the Fayetteville, Ark., omnirange station; Flippin, Ark., omnirange station; Walnute Ridge, Ark., omnirange statin; Dyersburg, Tenn., omnirange station; Nashville, Tenn., omnirange station; intersection of the Nashville omnirange 059° true radial and the Corbin VAR west aural course; Corbin, Ky., VAR station."

(14) VOR civil airway No. 166 (Martinsburg, W. Va., to Philadelphia, Pa.) is added to read "From the Martinsburg, W. Va., omnirange station to the West Chester, Pa., omnirange station."

(15) VOR civil airway No. 167 (New York, N.Y. to Hartford, Conn.) is added to read: "From the point of intersection of the Colts Neck, N.J., omnirange 151° true and the Idlewild omnirange 195° true radials via the Idlewild, N.Y., omnirange station to the Hartford, Conn., omnirange station."

CONTROL AREA EXTENSIONS: (1) (Winslow, Ariz.) is amended to read: "Within 5 miles either side of the north and south courses of the Winslow radio range extending from the radio range station to points 25 miles north and south, and within 5 miles either side of the 314° and 134° true radials of the Winslow omnirange extending from the omnirange station to points 25 miles northwest and southeast."

(2) (Greenville, Miss.) is added to read: "That airspace within a 25 mile radius of the Greenville, Miss., AFB radio range station."

CONTROL AREAS: (1) VOR Civil Airway No. 116 (Kansas City, Mo., to New York, N.Y) is amended to read: "All of VOR civil airway No. 116, including north alternates."

(2) VOR Civil Airway No. 140 (Tulsa, Okla., to New York, N.Y.) is amended to read: "All of VOR civil airway No. 140.".

(3) VOR Civil Airway No. 166 (Martinsburg, W. Va., to Philadelphia, Pa.) is added to read: "All of VOR civil airway No. 166."

(4) VOR Civil airway No. 167 (New York, N.Y. to Hartford, Conn.) is added to read: "All of VOR civil airway No. 167."

CONTROL ZONES: (1) Five Mile Radius Zone) is amended by adding the following airport: Greensville, Miss, Greenville AFB.

(2) (Fort Worth, Texas) is amended by changing the portion on the north course of the radio range to read: "within 2 miles either side of the Fort Worth radio range extending from the radio range station to a point 10 miles north" in lieu of "to the Haslet fan marker."

REPORTING POINTS: (1) Red civil airway No. 14 (Lone Rock, Wis., to Louisville, Ky.) is amended by deleting the following reporting point: "the intersection of a line bearing 52° true from the Lafayette, Ind., non-directional radio beacon and the northwest course of the Indianapolis, Ind., radio range."

(2) (Domestic VOR reporting points) is amended by adding the following reporting point: "Gore intersection: the intersection of the Culberson, Texas omnirange 012° true and the Salt Flat, Texas., omnirange 085° true radials."

ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are established:

(1) HOPKINS INTERSECTION - the intersection of the 338° magnetic radial of the Vero Beach, Florida, VOR and the 130° magnetic radial of the Orlando, Florida VOR.

(2) ARETZ, IND., INTERSECTION - the intersection of the northwest course of the Indianapolis, Indiana, LF radio range and 050° magnetic bearing from the Lafayette, Indiana radio beacon.

(3) WAVERLY INTERSECTION - intersection of Flat Rock, Va., VOR 139° magnetic radial with Norfolk, Va., VAR west course.

(4) HUDSON INTERSECTION - the intersection of Gardner, Massachusetts, VOR 074° magnetic radial with Concord, New Hampshire, VOR direct radial to Boston, Massachusetts, VOR.

(5) LAKE MOHAVE INTERSECTION (VHF)-intersection of the 142° radial magnetic of the Las Vegas, Nev., VOR and the 053° radial magnetic of the Daggett, Calif. VOR.

(6) EAST SCRANTON INTERSECTION -Formed by the realigned LaGuardia LFR northwest course with Wilkes-Barre-Scranton LFR northeast course.

(7) MEADOWBROOK INTERSECTION - formed by the realigned LaGuardia LFR northwest course with Teterboro ILS northeast (back) course.

(8) YONKERS INTERSECTION - formed by the realigned LaGuardia LFR northwest course with Newark LFR northeast course.

(9) RIDGEWOOD INTERSECTION - formed by the realigned LaGuardia LFR northwest course with Poughkeepsie LFR southwest course.

(10) CLAREVILLE INTERSECTION -intersection of the NW crs of the Corpus Christi LF rng and the SW crs of Navy Chase (Beeville) LFR.

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide as indicated below:

(1) Correct Volume 9, Number 8 dated June 29, 1954-Page 4 - MEA's Item 12. Change Blue civil airway No. 35, to read: Red Civil Airway No. 35.

(2) Correct Volume 9, Number 13 dated September 7, 1954, Page 27 - MEA's Item 17- Change Grove (Int), Pa., to read: Grover (Int), Pa.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 8, dated May 25, 1954, as follows:

(1) Page 22. Monroe, Louisiana change CAA telephone number to: 2-6560.
(2) Page 23, under North Carolina, change Charlotte WB telephone number to: EX-9-1019.
(3) Page 25, under Texas, change San Antonio CAA telephone number to: CApitol 6-4661.
(4) Page 21, under Arizona, change Yuma CAA telephone number to: SU-3-4501.

AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Albuquerque	Shreveport	WAC 408
Corpus Christi	Dallas-Ft. Worth Local	WAC 409
Del Rio	WAC 135	WAC 469

A new edition (or new chart) for the charts listed is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

✓ ADDITONAL ON-REQUEST REPORTING POINTS: Effective immediately the following on request reporting points are established or re-described:

(1) SNAPPER INTERSECTION - intersection of 013° magnetic radial of West Palm Beach, Florida and 042° magnetic radial of Vero Beach, Florida VOR. Minimum reception altitude 8000 feet.

(2) LENORE, ILL. INTERSECTION - intersection 332° magnetic radial Pontiac VOR and 225°magnetic Naperville (VOR)

(3) EXCELLO, MO., INTERSECTION - direct radial between Kansas City, Mo. and Quincy, Ill. and direct radial between Kirksville, Mo. and Columbia, Mo. (VOR)

(4) WARREN, MO., INTERSECTION - direct radial between Kansas City, Mo. and Quincy, Ill and 114° magnetic radial of Kirksville, Mo. (VOR)

REDESCRIBED:

(1) TINA INTERSECTION - direct radial between Kansas City, Mo (VOR) and Quincy, Ill., (VOR) and 219° magnetic radial Kirksville, Mo. (VOR)

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, danger area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: - Because of space limitation such items are cited only once. The erection or removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALEXANDER CITY-RUSSELL ARPT: N/S Strip closed - const. (8-12)
ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
**ANNISTON ARPT: 574' (2981'MSL) lgtd TV twr erected 7 mi SSE (158°T) at lat 33-29-06; long. 85-48-32. (7-21)
BIRMINGHAM-RADIO: VOR courses 005°-035°; 075°-175° and 195°-265° usable. Arpt apch course unusable within 15 mi; other courses not usable due to roughness and bends. (4-23)
BIRMINGHAM ARPT: 150' temp twr erected adj to fld at lat 33-30-12, long. 86-45-12. (2-13) Caution, tfc operg in area from 165° clockwise thru 235° not visible from ctl twr to distance of 4 miles. (4-15)
EVERGREEN-MIDDLETON FLD: Caution-vehicles and farm equip intermittently crossing rnwys and using taxi strips.
**HOLT BCN SITE 60, FTW-ATL: Bcn site discontd. (9-14)
HUNTSVILLE-RADIO: VOR radials 20°-70°; 100°-130°; 150°-210°; 255°-270°, rough and unusable. VOR not usable for apchs to Huntsville Arpt due to roughness, bends and signal cancellation. (4-7)
MOBILE-RADIO: VOR flgt-checked on arwy radials only.

ALABAMA: **MOBILE-BATES ARPT: 313' (574'MSL) lgtd rdo relay twr erected 49 mi NNW (350°T) at lat 31-23-18; long. 88-22-14. (7-9) 326' (516'MSL) lgtd rdo relay twr erected 30 mi NE (25°T) at lat 31-05-36; long. 88-01-51. (7-10) 231' (461'MSL) rdo twr erected 26.5 mi E (80°T) at lat 30-45-20; long. 84-47-31. (8-27)
MONTGOMERY-RADIO: DME coverage 130°-230°, 40 mi at 1500'. (5-20)
**MONTGOMERY-DANNELLY FLD: 823' (1483'MSL) lgtd twr erected 20 mi S (170°T) at lat 32-01-15; long. 86-20-56. (9-16) Rnwys 3-21 and 15-33 closed. Dips in E/W Rnwy 1500' from E end. (7-19) Use right hand traffic pattern Rnwy 9. (8-23)
ARIZONA: CHANDLER-WILLIAMS AFB-RADIO: USAF VHF/DF steers unreliable on inbound headings 300° - 080° below 7000' beyond 40 mi from stn. (12-7)
COCHISE-RADIO: DME coverage 15°-35°, 40 mi at 12,000'; 210°-245°, 40 mi at 11,000'.
★DOUGLAS-RADIO: Sept 15, VOR freq chgd from 112.9 mc to 112.6 mc.
DOUGLAS-BISBEE-DOUGLAS INTERNATIONAL ARPT: Pilots are cautioned to use maximum length of rnwys for landings and take-offs due to obstructed view of ends. Take-offs from intersections of rnwys and taxiways prohibited.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 30 to 35 mi on 247° radial and at 35 to 40 mi on 106° radial.
HASSAYAMPA-RADIO: DME coverage 325°-50°, 50 mi at 10,000'; 50°-90°, 50 mi at 5000'; 90°-180°, 50 mi at 7000'; 180°-215°, 50 mi at 4000'; 215°-235°, 50 mi at 6000'; 235°-255° 40 mi at 6000'; 255°-270°, 50 mi at 6000'; 270°-325°, 50 mi at 8000'. (7-15)
KINGMAN ARPT: Caution-intermittent target plane testing in vcnty. Rdo controlled acft operating in area NW of fld.
PRESCOTT-RADIO: VOR radials 185°-225° usable dist 40 mi at 10,000'; 135°-145° and 165°-185° usable dist 45 mi at 10,000'.
TUCSON-RADIO: Only VOR arwy radials flgt-checked. Coverage lmtd to 40 mi at 11,000' 0°-12°, 69°-72° and 330°-346°; 30 mi at 11,000'; 44°-69° and 346°-0°. (7-9) June 14, LF rng shut down for indefinite period - relctn.
TUCSON-DAVIS-MONTHAN AFB-RADIO: USAF VHF/DF lmtd in rng to 30 mi in quads containing inbound headings of 150-210° and 245-275°; rng 50 mi other quads; steers unreliable below 13,000' all quads. (12-23) USAF UHF/DF unreliable 170°-270° below 14,500' at 40 mi; unreliable at min en route alts all quads. UHF/DF, inop 0800-0900 each Wed. (2-3)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (2-3)
ARKANSAS: FAYETTEVILLE ARPT: Men and equip. on fld daylgt hrs. (8-13)
HARRISON ARPT: New NW/SE Rnwy under const. Fld clsd for ngt operns. (3-10)
TEXARKANA-RADIO: VOR 143° radial to Rnwy 13 beyond tolerance due to roughness and bends. (6-10) DME coverage 1900', 50 mi in all quads.
WALNUT RIDGE-RADIO: VOR radials 290°-320° and 120°-150° have severe bends and course roughness. (4-14)
CALIFORNIA: ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.
BAKERSFIELD-RADIO: VOR has slight to moderate scalloping in SE quad 80°-123°. Radials 0, 90, 100, 130, 140, 150, 220, 270, 300 and 330° flgt-checked.
★BAKERSFIELD-KERN COUNTY ARPT-TOWER: Effect. Sept 26, twr hrs of opern will be 0600-2200. (9-3)
BLYTHE-RADIO: DME coverage 165°-188°, 45 mi at 7000'; 180°-200°, 30 mi at 6000'; 200°-220°, 45 mi at 6000'; 220°-293°, 50 mi at 9000'; 293°-310°, 30 mi at 9000'; 310°-327°, 40 mi at 9000'.
BRAWLEY ARPT: E/W Rnwy clsd-construction. (4-30)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 25 mi; 350°-90°, 30 mi at 7000'; 50 mi at 8000'. (9-15)
DAGGETT-RADIO: VOR 113.2 mc. Only arwy radials flgt-checked.
EDWARDS AFB-RADIO: USAF LF rng courses have splits and multiples, unreliable beyond 35 mi. (4-14)
**ESCONDIDO ARPT: Abandoned. (9-1)
EUREKA COUNTY ARPT: All lgtg fac inop. Length of surfaced rnwy reduced to 1400' and grass strip clsd. Const in progress on and adj to arpt. Caution-use at own risk. (5-29)
★FILLMORE-RADIO: Sept 16, VOR cmsnd. Freq: 112.5 mc. Ident: FIM. Lctd at lat 34-21-24; long. 118-52-49. Variation: 15° 45'. Elev: 219'. Class: VORW. DME cmsnd at same site. VOR and DME coverage 320°-355°, 40 mi at 11,000'; 280°-320°, 30 mi at 11,000'.
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

CALIFORNIA: FORTUNA-RADIO: VOR has light to moderate scalloping beyond 30 mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 50 mi at 3000'; 350°-10°, 50 mi at 8000'; 10°-30°, 50 mi at 9000'; 30°-120°, 40 mi at 9000'; 120°-150°, 40 mi at 6500'; 150°-335°, over water, not checked. (6-16) Soon, DME at VOR site will be discontd.
FRESNO AIR TERMINAL: Rnwy 7-25 closed until approx April 1, 1955. (9-15)
FURNACE CREEK ARPT, SITE 17, RIV-TDL: Fld closed, const. Mrkd. (8-13)
GASQUET ARPT: N side of strip clsd - const.
KLAMATH-McBETH FLD: Closed - high vegetation. (7-27)
LONG BEACH-RADIO: DME coverage 50 mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16)
**LONG BEACH ARPT: 135' lgtd temp oil derrick erected 2500' W Rnwy 16R and 850' N Rnwy 25L. (9-3) North lndg mat closed to all opern - rough and hazardous. (4-9) Two 175' lgtd oil derricks - one 1500' W and 1500' N Rnwy 25R; one 1500' N Rnwy 25L, 1500' S Rnwy 25R and 2500' W Rnwy 16R. (8-23)
LONG BEACH-EAST LONG BEACH ARPT: Caution - const W side NE/SW Rnwy and S side E/W Rnwy. Land W and N sides respectively. (7-23)
LOS ANGELES-RADIO: VAR visual courses not usable - moderate scalloping N sector.
LOS ANGELES INTERNATIONAL ARPT-TOWER: ILS on Rnwy 25L inoper; ILS on Rnwy 25R will be oper, but radar monitored apchs not avail until approx Sept 23. (8-16) FLD: FIDO testing at irregular intervals. Due to non-visibility twr unable to ctl tfc on first 300' and last 600' of Rnwy 34 and last 1000' of Rnwy 29. Equip. on and adj to const areas.
NEEDLES-RADIO: VOR 40 mi coverage from 5°-15° and 190°-205° at 8000', and 50° radial at 10,000'.
NEEDLES ARPT 25A, LAX-AMA: No fuel until about Nov. 1. (9-17)
OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 2 mi of the fld. Exercise extreme caution in these areas.
OAKLAND-RADIO: VOR maximum usable dist 40 mi N thru E at min instr alt. (1-14) DME coverage 80°-120°, 50 mi at 6000'; 120°-175°, 50 mi at 5000'; 175°-280°, 50 mi at 4000'; 280°-290°, 40 mi at 4000'; 290°-305°, 50 mi at 4000'; 305°-340°, 50 mi at 6000'; 340°-350°, 40 mi at 6000'; 350°-030°, 20 mi at 4000'; 30°-60°, 30 mi at 5000'; 60°-80°, 40 mi at 5000'.
OCEANSIDE-HI HI SKY RANCH ARPT: Caution ditch in center of strip. (7-8)
ONTARIO-RADIO: DME coverage 0°-90°, 50 mi at 13,000'; 90°-135°, 50 mi at 9000'; 135°-150°, 30 mi at 7000'; 150°-200°, 20 mi at 7000'; 200°-280°, 40 mi at 7000'; 280°-300°, 50 mi at 9000'; 300°-330°, 50 mi at 13,000'; 330°-350°, 30 mi at 13,000'; 350°-0°, 40 mi at 13,000'.
ONTARIO INTERNATIONAL ARPT-TOWER: ILS LOM reported unreliable for navigational purposes durg hrs of darkness due strong heterodyne interference Mexicali H fac. (5-26)
PALMDALE-RADIO: VOR coverage 120°-150°, 40 mi at 10,000'; 150°-180°, 40 mi at 9000'.
**PALM SPRINGS ARPT: Rnwy lgts now operating automatically on perm schedule. (7-2)
**PALO ALTO ARPT: Old rnwys clsd. New NNE/SSW 2500' strip open. Tfc pat to N Right turn. Pattern alt: 800'. (9-8)
PASO ROBLES-RADIO: DME coverage 315°-45°, 50 mi at 7000'; 45°-105°, 50 mi at 5000'; 105°-125°, 50 mi at 6000'; 125°-190°, 50 mi at 5000'; 190°-220°, 50 mi at 6000'; 220°-235°, 40 mi at 6000'; 235°-245°, 30 mi at 6000'; 245°-270°, 40 mi at 6000'; 270°-315°, 50 mi at 5000'. (6-15)
PORTERVILLE ARPT: Electric Ear controlling lights, inop.
RED BLUFF-RADIO: DME coverage 180°-208°, 30 mi at 9000'; 208°-217°, 30 mi at 10,000'; 217°-235°, 40 mi at 10,000'; 235°-360°, 50 mi at 10,000'. (6-14)
RIALTO-MORROW ARPT: Closed on Sunday - Drag races. (7-28)
**ROSEMEAD-PASADENA-ROSEMEAD ARPT: Name changed to Fletcher Arpt. (8-9)
SACRAMENTO-RADIO: VOR usable dist 245°-260°, 45 mi at 3000'. (6-1) DME coverage 10°-100°, 50 mi at 9000'.
**SACRAMENTO-HANNAM ARPT: Abandoned. (8-20)
SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 mi. (5-20)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 40 mi at min instr alt. DME coverage 20°-44°, 30 mi at 7000'; 44°-49°, 20 mi at 7000'; 49°-90°, 30 mi at 7000'; 90°-130°, 50 mi at 7000'; 130°-145°, 30 mi at 7000'; 145°-153°, 20 mi at 7000'; 153°-180°, 30 mi at 7000'; 180°-225°, 50 mi at 7000'; 225°-300°, 50 mi at 5000'; 300°-20°, 50 mi at 7000'. (5-27)
**SAN CARLOS ARPT: Reinstated. Type: P. Lat 37-31; long. 122-15. Lctn: 1 NNE. Elev: 6' No. of rnwys: 1. Lngst rnwy & facs: 24-S1-80,87 oct. Rem: Levee S. (6-8)

**PORT ORCHARD-SOUTH PORT ORCHARD ARPT: 1000' (MSL) lgtd TV twr erected 7 mi NE (63°T) at lat. 47-28-43, long. 122-32-32. (7-26)
**PUYALLUP-VALLEY ARPT: Abandoned. (6-16)
SEATTLE-AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Trans & rcvg freq 132.3 mc out of service. (9-17)
SEATTLE-BOEING FLD-TOWER: Sept 17, ILS LOM shut down until approx Oct 2- modernization; OM shut down indefinitely. (9-17) About Oct 5, ILS glide slope will be shut down for 4 days-major repairs. FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat. W of fld at 1000'.
SHELTON-RADIO: LF rng on 371 kc has lmtd usable course dist as follows: S course 35 mi, SW and N, 30 mi each.
SPOKANE-RADIO: DME and VOR coverage 36°-152°, 50 mi at 7000'; 152°-224°, 50 mi at 5000'; 224°-264°, 50 mi at 6000'; 264°-36°, 50 mi at 8000'. (6-17)
SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable 300°-70° at 6000'; 70°-90° at 9000'; 90°-140° at 11,000'; 140°-180° and 250°-300° at 12,000'. (4-20) USAF VHF/DF opers 0700-2400 Mon-Fri; 0700-1200 Sat; trng status. (5-27)
SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld. (12-19)
SPOKANE-GEIGER FLD-TOWER: Back course ILS lclzr usable 10 mi with flyable bends. FLD: Caution-const on ramp N of control tower. Mil acft parked adj to taxiway between Rnwy 20 and control tower.
★TACOMA-McCHORD FLD-TOWER: Effect. Sept 22, apch ctl will be operd by CAA. Trans: and rcvs: 121.5, 120.1, 243.0, 121.1, 137.88, 363.8 mc. Rcvs: 3023.5 kc.
YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123, 161, 191, 298, 321 and 336° radials at min terrain clearance alts.
WEST VIRGINIA: BECKLEY-RALEIGH CO. MEM'L ARPT: 4 poles supporting obstn lgts extending 25' above tree tops from E end E/W Rnwy to S of centerline of apch.
CHARLESTON-RADIO: VOR coverage 10°-58°, 30 mi at 3000'; 270°-330°, 30 mi at 2500'; Moderate roughness all azimuths. (3-16)
**CHARLESTON-KANAWHA COUNTY ARPT: 649' (1549' MSL) lgtd TV twr erected 5.2 mi WNW (275°T) at lat. 38-22-36, long. 81-42-04. (7-1)
ELKINS-RADIO: LF rng has multiples and fades all courses. DME coverage 35°-95°, 50 mi at 6800'; 95°-120°, 40 mi at 6800'; 120°-165°, 30 mi at 6800'; 165°-195°, 40 mi at 6800'; 195°-220°, 50 mi at 6800'; 220°-35°, 50 mi at 5000'. (7-1)
ELKINS ARPT: Small hole 2' long, 2" deep approx 150 yards from Rnwy 31 on right side edge taxiway leading from ramp. (9-16)
MARTINSBURG-RADIO: DME coverage 50°-95°, 40 mi at 2500'; 95°-150°, 40 mi at 2000'; 50 mi at all other azimuths at min en route alt. (7-7)
MARTINSBURG ARPT: Glider flying peak activity expected on week ends and holidays. Serv fac avail 0800 until sunset. (9-6)
MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution-dip midway Rnwy 16-34 covering full width of rnwy. (5-4)
WHITE SULPHUR SPRINGS-RADIO: Private MH fac operg on test basis. Freq: 406 kc. Ident: SSU. Lctd just N of E end rnwy Greenbrier Arpt. Opers 0800-darkness. (6-3)
WISCONSIN: **BARABOO-BELL AERO ARPT: Attended 7 days per week. Rnwys rolled during snow season. (9-16)
**CHAFFEY: 250' micro-wave twr erected at lat 46-24-26, long. 92-10-12. (8-31)
GRANTSBURG-RADIO: VOR has counterclockwise course errors up to .5° in excess of tolerance from azimuth angles 95°-125° and clockwise errors up to 1.5° in excess of tolerance at azimuth angles 220°-245°. (8-10) About Sept 21, VOR will be shut down until approx Oct 1- modernization. (9-10)
**GRANTSBURG 7, MPS-QT ARPT: 205' (1192' MSL) lgtd rdo relay twr erected 6 mi SSE (170°T) at lat. 45-42-33, long. 92-38-38. (8-31)
**HAYWARD ARPT: Airport not abandoned. Opened and maintained by Chamber of Commerce.
JANESVILLE-RADIO: VOR courses rough all azimuths within 5 mi of stn. (6-8)
**LAKE TOMAHAWK-DOLHUNS RESORT ARPT: 36" rotating bcn, clear and green, rotates 6 rpm; cmsnd June 15.
MADISON-TRUAX FLD-TOWER: Caution-twr rdo reception intermittently blocked out by jet acft run-ups. (6-16) FLD: E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Caution crossing hwy in lndg Rnwys 22, 26, 31. Sod unsafe. Due to non-visibility twr unable to ctl tfc on first 1000' S end Rnwy 18-36 adj taxiway and all portions of civil and mil ramps. Equip. on fld. Caution- lndg jet interceptor acft using tactical left hand overhead appchs at 2300' MSL. Overrun lgts S end Rnwy 18-36 inop. (9-1)
**MARSHFIELD ARPT: New NW/SE Rnwy 2800' hard surfaced and soft shoulders. E/W Rnwy 2600' long, dirt. NE/SW Rnwy perm closed giving arpt only 2 rnwys. (8-31)
MILWAUKEE-RADIO: VOR has moderate course roughness in area between 200° and 220°. DME coverage 190°-200°, 40 mi; 200°-190°, 50 mi at min en route alt. (6-11)
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: July 26, VHF/DF recmsnd, not flgt-checked at combined stn/twr. (8-5) FLD: Rnwy 13-31 clsd. Rnwy 6-24 clsd 0700-1700.
NEENAH-VALLEY ARPT: N/S strip clsd-golf driving range, roadway on end. (8-13)
RHINELANDER-ONEIDA COUNTY ARPT: Grading and paving NW/SE Strip. Men and equip on fld. (6-22)
**SPOONER COMMERCIAL ARPT: 250' micro-wave twr erected 21 mi ESE (115°T) at lat 46-01-44, long. 92-18-29. (8-31)
WATERTOWN ARPT: NE/SW Strip clsd-const. (5-21)
WAUKESHA-COUNTY ARPT: Caution-E/W strip closed, Sept. 26. (9-9)
WYOMING: CASPER-RADIO: Soon, ILS will be shut down for-modernization. ILS glide slope has moderate to severe path roughness above 7300' and beyond 7 mi. Not to be used for auto. pilot apchs.
CHEYENNE-RADIO: DME coverage at 50 mi as follows: 10°-120°, 7300'; 120°-180°, 7500'; 180°-280°, 11,000'; 280°-325°, 10,500'; 325°-340°, 9000'; 340°-010°, 7500'. (5-5)
CHEYENNE ARPT-TOWER: July 1, ILS shut down until approx Oct. 1- rnwy const. FLD: Clsd to transient jet acft till approc Oct. 1, except in emergencies.
**DOUGLAS ARPT: Lgts perm turned off on 150' twr lctd 4.5 mi SE (125°T) at lat. 42-42-30, long. 105-18-00. (9-16)
GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S Strip soft-clsd to hvy acft.
LARAMIE-RADIO: DME coverage 360°-155°, 50 mi at 11,000'; 155°-225°, 40 mi at 15,000' 225°-300°, 30 mi at 15,000'; 300°-360°, 50 mi at 11,000'. (7-2)
LARAMIE-BREES FLD: Caution deer on fld. (6-29)
**LINGLE ARPT: Abandoned. (7-16)
ROCK RIVER-RADIO: DME coverage 360°-40°, 50 mi at 11,000'; 40°-110°, 50 mi at 11,300' 110°-160°, 50 mi at 11,000'; 160°-230°, 50 mi at 15,000'; 230°-360°, 50 mi at 12,000'.
ROCK SPRINGS ARPT: Caution-first 500' NW end NW/SE Rnwy clsd-marked. (9-10)
SHERIDAN-RADIO: VOR coverage lmtd to approx 40 mi between 150 and 280° and moderate course roughness exists in mountainous area.
PUERTO RICO: ★SAN JUAN ARPT-TOWER: Sept 8, trans & rcvrs 243.0 and 257.8 mc cmsnd.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator (FPDI) centered the omnibearing selector should read 0° with the to-from indication being "From" or the omnibearing selector should read 180° with the to-from indication read "To" Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ± 4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of Sept. 21, 1954 , check points or facilitites have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 112.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

NOTICE: **Starting with Vol 9 #11, (8-10-54) the Airman's Guide began to publish some instrument approach procedures with the lowest landing and take-off minimums possible under the obstruction clearance requirements of the Regulations of the Administrator, Part 609. Below are the ones contained in this issue. These minimums apply to all users except military aircraft and those for whom the Administrator has specifically authorized other minimums. ILS and GCA (PAR) straight-in landing minimums, formerly published no lower than 400-3/4, may in some instances be lowered to 200-1/2. Straight-in LFR, ADF and VOR landing minimums, formerly no lower than 500-1, may in some instances be lowered to 400-1. There are now three categories of aircraft minimums, namely those for (1) 75 mph or less- 2-engine or less, (2) more than 75 mph - 2-engine or less, and (3) more than 75 mph - more than 2 engine. All users are warned that the lowering of these minimums published in the Airman's Guide does not necessarily imply that obstructions have been lowered or removed.**

VHF OMNIRANGE (TVOR) PROCEDURES

When a TVOR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

LOW FREQUENCY RANGE PROCEDURES

When an LFR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY FREQ IDENT PROCEDURE NO.	INITIAL APPROACH TO FACILITY			PROCEDURE TURN ( ) SIDE OF FINAL APCH CRS (OUTBND AND INBND.) ALTITUDES. LIMITING DISTANCES	MIN ALT OVER FACILITY ON FINAL APPROACH COURSE	CRS AND DISTANCE FACILITY TO AIRPORT	CEILING AND VISIBILITY MINIMUMS			IF VISUAL CONTACT NOT ESTABLISHED AT AUTHORIZED LANDING MINIMUMS AFTER PASSING FACILITY WITHIN DISTANCE SPECIFIED BELOW OR IF LANDING NOT ACCOMPLISHED: REMARKS

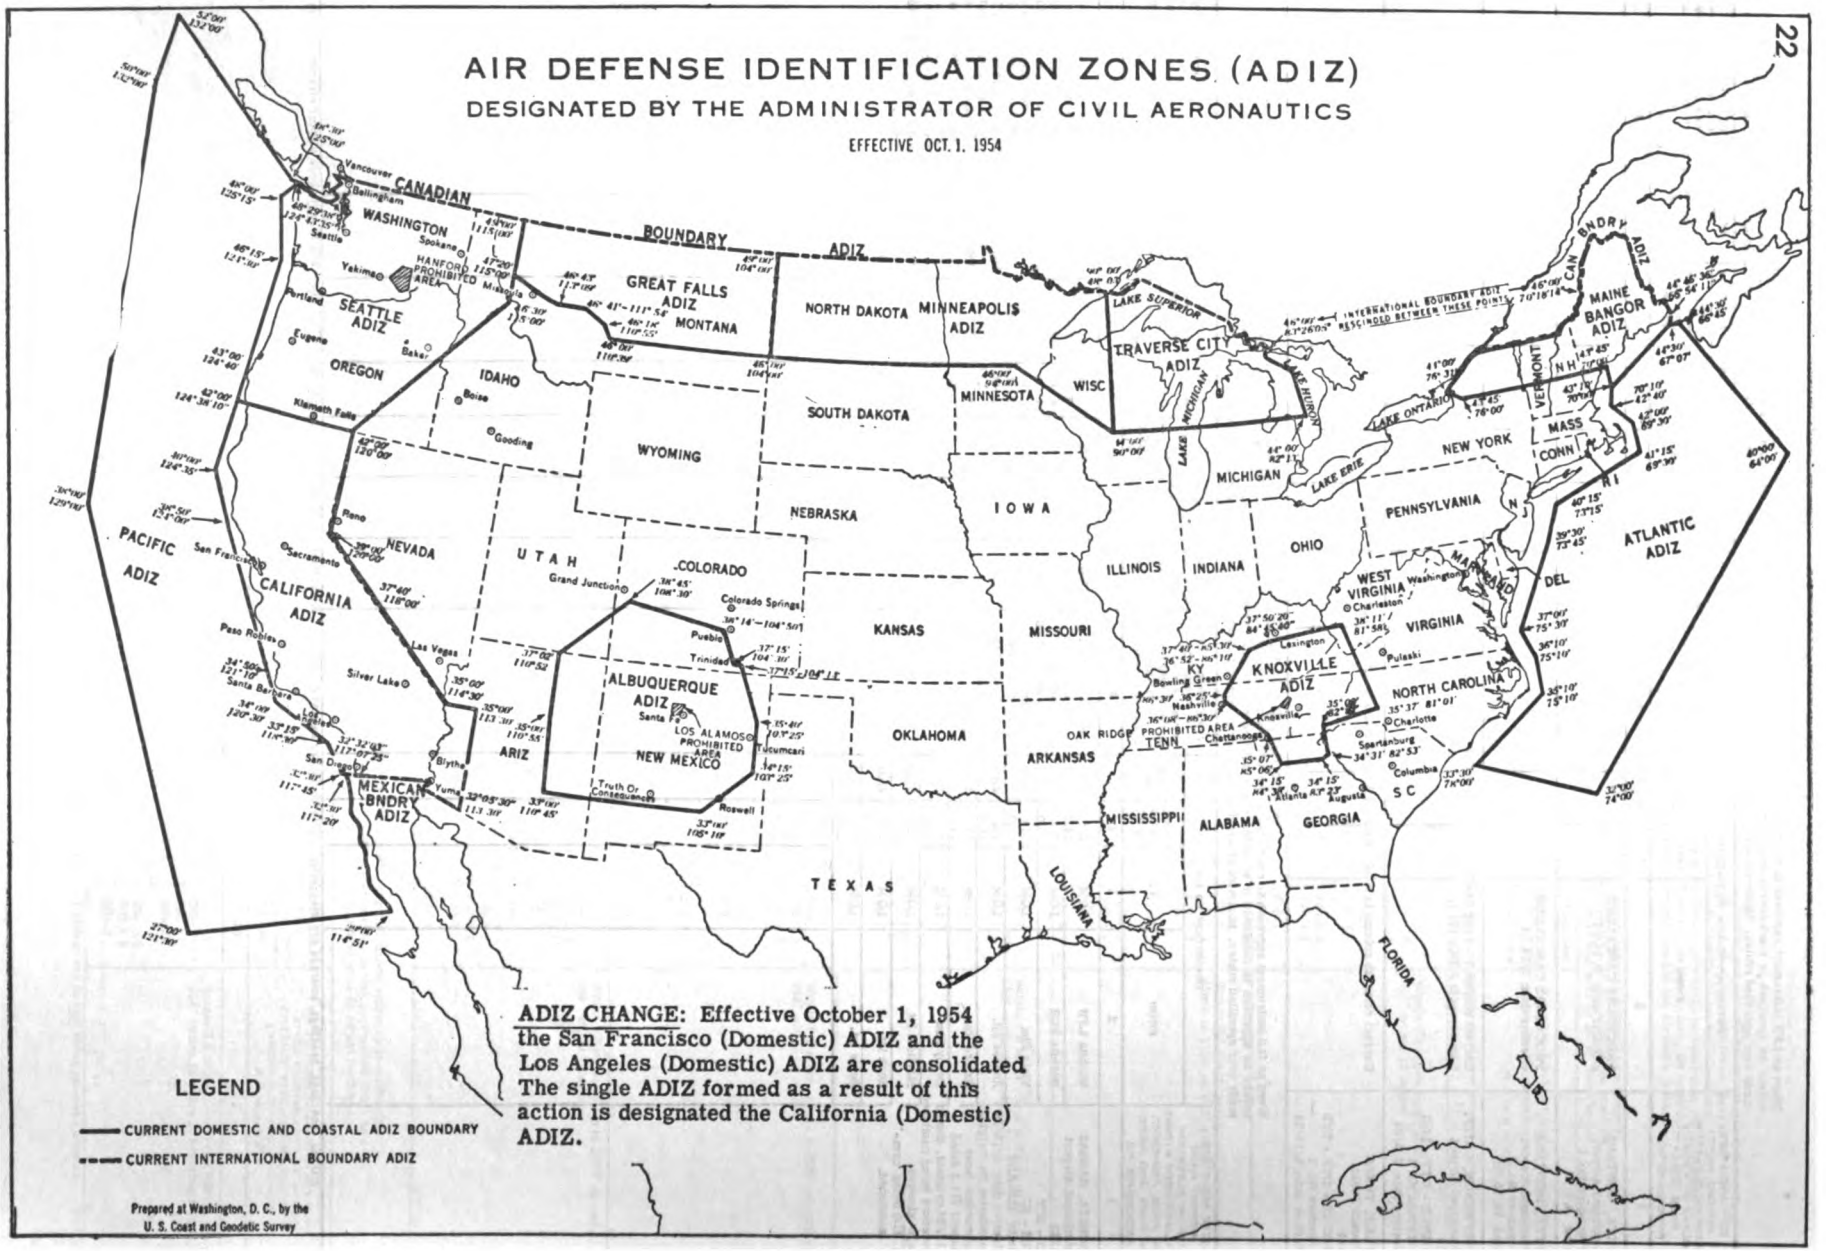
AIR DEFENSE IDENTIFICATION ZONES (ADIZ)

DESIGNATED BY THE ADMINISTRATOR OF CIVIL AERONAUTICS

EFFECTIVE OCT. 1, 1954



ADIZ CHANGE: Effective October 1, 1954 the San Francisco (Domestic) ADIZ and the Los Angeles (Domestic) ADIZ are consolidated. The single ADIZ formed as a result of this action is designated the California (Domestic) ADIZ.

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:

Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic. (7-19) = Hours of operation, i.e., 0700-1900
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data

* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
Cl. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled

DME. . Distance Measuring Equipment
FM. . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . .VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . Compass locator when installed at outer marker site
LVOR. . Low power VOR (with standby equipment)
MH. . . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . . .Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . Low frequency omni-drectional range
MRA. . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . .VHF outer marker
P . . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (6-24)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(10-5-54)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway The final approach flight path on a precisionscope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Flight Information Manual.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below as well as in "Air Navigation Radio Aids" section under proper location.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When a receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion.
After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible
Civil Minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: This service to aircraft encountering severe weather condition may be obtained by requesting radar advisory through an appropriate ground station or direct ARTC communication. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY." All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas: Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles and the Knoxville Air Defense Identification Zone.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc and 3023.5 kc. Transmit and guard 121.5 mc all locations.

DIRECTORY OF AIRPORTS - LEGEND

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.
2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.
3. When city and airport names are identical, the airport name is omitted to conserve space.
4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport).
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not qualifying as "Public Use" (See definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

✱ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

U: Unicom (Aero Advisory Station transmitting and receiving on 122.8 mc). Operates during airport hours only.

FUEL OCTANE

F1: 80 oct., at least
F2: 80/87 oct., and lower
F3: 91/96 oct., and lower
F4: 100/130 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) -... --. -... (LGB in Code).

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciably higher rate of speed than the location identifier.

NAUTICAL MILES - STATUTE MILES: NEW DIMENSIONAL UNIT PROCEDURES: Among the various segments of the aviation industry there are many users of the airspace who desire to use nautical units for speed and distance measurements in their operations while others prefer the use of statute units. A plan designed to best serve the interests of all concerned has been developed and will be placed in effect on October 1, 1954. The plan generally provides that the pilots of all air carrier aircraft and all military aircraft shall use nautical units exclusively in all of their operations whether IFR or VFR. Private and business aircraft pilots, on the other hand, may use either nautical or statute units according to their preference.

Since uniformity is essential to the efficient operation of the Federal Airways System, all CAA facilities (communications stations, airport traffic control towers and air route traffic control centers) will use knots and nautical miles as the standard for all internal operations involving speed and distance values. Also, all normal radio transmissions of speed and distance values by these facilities will be in terms of knots and nautical miles with the exception of visibility which will continue to be reported and transmitted in statute miles. Any speed or distance value (except those associated with radar traffic control) will be converted from nautical to statute units by CAA facilities upon receipt of specific requests from pilots of private and business aircraft.

At the present time, surface wind velocity is reported in miles per hour. Beginning October 1, surface wind velocity will be reported in knots. Hence, when surface wind is reported as "west south west eight" it will be eight knots rather than eight miles per hour. This change need be of no great concern to the pilot, however, since, until a velocity of thirty miles per hour or more is reached, the difference between miles per hour and knots is so slight as to be insignificant for all practical purposes. In any case, if the pilot of a private or business aircraft wants the wind velocity in miles per hour, the CAA facility will convert it upon request.

When filing IFR flight plans and conducting IFR flight, distance and speed information submitted to CAA facilities by all pilots should, if possible, be in nautical units since the ground system will operate on the basis of nautical units. If statute units are used by the private or business aircraft pilot, they should be identified as such in each case; i.e., "airspeed 110 miles per hour". The CAA facility will then convert the value to knots for internal use.

SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Entry into and maneuvering within these patterns should be made at speeds within this tolerance as buffer zones have been provided only for these speeds. It is recommended that all aircraft adhere closely to these restrictions and if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

INSTRUMENT APPROACH PROCEDURES TO BE SOLD ON SPECIAL SUBSCRIPTION BASIS: Because of a demand for instrument approach information prior to publication in the Airman's Guide or Federal Register, the CAA has made arrangements for the issuance and distribution of individual copies of these procedures on a subscription basis to be delivered once each week. The annual subscription rate has been set at $125.00 per year. For each additional copy mailed to the same address, the annual subscription price will be $25.00. Checks should be made payable to the Treasurer of the United States and mailed to: Sales and Distribution Division, Room 6227, Commerce Department, Washington 25, D.C.

✓ CHANGES IN INSTRUMENT APPROACH PROCEDURES MINIMUMS: Starting with Volume 9, Number 11 dated August 10, 1954, the Airman's Guide began to publish some instrument approach procedures with the lowest landing and take-off minimums possible under the obstruction clearance requirements of the Regulations of the Administrator, Part 609. These minimums apply to all users except military aircraft and those for whom the Administrator has specificllay authorized other minimums. Further details may be found in the note preceding the Instrument Approach Procedures on page 89 of this issue. However, all users are warned that the lowering of these minimums published in the Airman's Guide does not necessarily imply that obstructions have been lowered or removed.

FLIGHTS INTO REMOTE AREAS OF CANADA: Information received by the Office of Aviation Safety indicated that U.S. pilots are desregarding fundamental safety considerations when flying into or over the remote areas of Canada. The chief safety considerations being transgressed by U.S. pilots are: Failure to carry proper emergency equipment, failure to file a flight plan, failure to notify proper authorities of any changes, and failure to close flight plans.

Prior to commencing a flight into unsettled territory, U.S. pilots should obtain advice and information on the emergency equipment and flight procedures from the nearest office of the Department of Transport, Civil Aviation Division. The addresses are:

District Superintendent
Air Regulations, 401 Winch Building
Vancouver, B.C.

District Superintendent
Air Regulations, 260 Richmond St., W.
Toronto, Ontario

District Superintendent
Air Regulations, 320 Blowey
Henry Building

Air Regulations 612 Power Building
Winnipeg, Manitoba

District Superintendent
Air Regulations, P.O. Box 42,
Moncton, N. B.

Particulars given should include name of pilot and number of passengers, registration markings and type of aircraft, radio equipment carried, point of intended entry, itinerary and point of intended departure.

✓ DANGER AREA AMENDMENTS: The following Danger Area Amendments shall be effective as dated, unless otherwise advised:

AMENDMENT NO. 92 to PART 608-DANGER AREAS
(October 17, 1954)

(1) In section 608.24, the Manhattan, Kansas, area (D-197), published on July 16, 1949, in 14 F.R. 4291 and amended on June 20, 1953, in 18 F.R. 3561 and on September 10, 1954, in 19 F.R. 5861, is further amended by changing the "Designated Altitudes" column to read: "Surface to 30,000 feet MSL."

(2) In Section 608.14, the San Pedro, California, area (D-292), published on July 16, 1949, in 14 F.R. 4287, is rescinded.

(3) In Section 608. 57, a Camp Williams, Wisconsin, area (D-468), is added to read: Name: Camp Williams, Wisconsin; Description: East boundary: longitude 89°59'W; west boundary: longitude 90°07'W; north boundary: latitude 44°16'N; south boundary: latitude 44° 12'N. Altitudes: 12,000 feet; Time of designation: Day VFR except during summer training months when day and night VFR. Special NOTAMS will be issued prior to time of night use during summer training. Using Agency: National Guard Bureau, Camp Williams, Wisconsin.

AMENDMENT NO. 93 to PART 608-DANGER AREAS
(October 21, 1954)

(1) In Section 608.14, the Camp Beale, California, area (D-265), published on July 16, 1949, in 14 F.R. 4288, is amended by changing the "Designated Altitudes" column to read: "20,000 feet MSL."

✓ LOCATION IDENTIFIERS: The following changes affects the use of location identifiers:

MJV	Mojave, Calif., Meyer Field (name change)
SFF	Spokane, Washington, Felts Field (assignment)

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 8, dated May 25, 1954, as follows:

(1) Page 24, under Pennsylvania change Pittsburgh CAA telephone number to read: SP-1-2833.

(2) Page 26, change address and telephone listing for Elmhurst, Ill to read: St. Charles, Illinois, telephone 490.

(3) Page 44, correct Harrisonburg Station WSVA coordinates to read: 2 miles west at latitude 38-27-05, longitude 78-54-30.

(4) Page 24, under South Carolina change Greenville CAA telephone number to read: 3-4522.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 9, Number 11, dated August 10, 1954 as follows:

(1) Page 29, Item (3) change New York, N.Y., (LaGuardia) WB number to: NE-9-7570

✓ MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are authorized to be effective with realignment Blackstone, Richmond and Chincoteague LFR's, October 26, 1954:

From	To	Min Alt.
(1) Red civil airway No. 51, is amended to read in part:		
Dinwiddie (Int), Va.	Langley, Va. (LFR)	1,500
(2) Blue civil airway No. 23, is amended to read in part:		
Norfolk (Navy), Va. (LFR)	Chincoteague (NAS), Va. (LFR)	1,500
(3) Red civil airway No. 33, is amended to read in part:		
Buckroe Beach (Int), Va.	Richmond, Va. (LFR)	1,500
(4) Green civil airway No. 6, is amended to read in part:		
Blackstone, Va. (LFR)	Richmond, Va. (LFR)	1,500

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSIONS, CONTROL ZONE, AND REPORTING POINTS AMENDMENTS: Effective October 26, 1954, civil airways, control area extensions, control zones, control areas and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Green civil airway No. (Laredo, Tex., to Norfolk, Va.) is amended between Blackstone, Va. and Norfolk, Va., to read: "Blackstone, Va., radiio range station; the intersection of the east course of the Blackstone, Va., radio range and the southwest course of the Richmond, Va., radio range excluding the portion which overlaps Camp Pickett dagner area D-44; Richmond, Va., radio range station; Norfolk, Va., radio range station to the Norfolk Municipal Airport, Norfolk, Va." (Note: Blackstone northeast course to be swung 22° clockwise concurrently).

(2) Amber civil airway No. 9, (Charleston, S.C., to Norfolk, Va.) is amended by changing the portion which reads: "(excluding the portions between 11,000 feet and 16,000 feet and between 21,000 feet and 45,000 feet above mean sea level, during the hours of darkness which lie within the Cherry Point, N. C., night danger area (D-125)." to read: "(excluding the portions between 11,000 feet and 16,000 feet and between 23,000 feet and 45,000 feet above mean sea level, during the hours of darkness, which lie within the Cherry Point, N. C. night danger area (D-125)".

(3) Red civil airway No. 19, (Detroit, Mich., to Norfolk, Va) is amended by adding a last portion to read: "thence to the Norfolk, Va., Navy radio range station excluding the portion which overlaps Plum Tree Island danger area (D-49)." (Note: Above adds a portion from the Gwynn intersection to Norfolk Navy range station).

(4) Red Civil airway No. 33, is amended by changing caption to read: (Norfolk, Va., to Boston, Mass) and changing the portion before the Gordonsville, Va., radio range station to read: "From the intersection of the east course of the Langley, Va., AFB radio range and the north course of the Norfolk, Va., Navy radio range via the Langley, Va., AFB radio range station excluding the portion which overlaps the Plum Tree Island danger area D-49; Richmond, Va., radio range station; Gordonsville, Va., radio range station; " etc. (Note: Above adds a portion from Buckroe Beach intersection to Richmond range station. Richmond southeast course to be swung concurrently to lie on Langley AFB range station.)

(5) Red civil airway No. 51, (Blackstone, Va., to Norfolk, Va.) "From the intersection of the east course of the Blackstone, Va., radio range and the southwest course of the Richmond Va., radio range via the intersection of the east course of the Blackstone, Va., radio range and the west course of the Langley, Va., AFB radio range to the Langley, Va., AFB radio range station excluding the portion which overlaps Plum Tree Island danger area (D-49)".

(6) Blue civil airway No. 23 (Norfolk, Va., to Chincoteague, Va.) "From the Norfolk, Va., Navy radio range station to the Chincoteague, Va., Navy radio range station excluding the portions which overlaps Chincoteague Inlet danger area D-45 and Ship Shoal Island danger area D-47." (Note: South course of Chincoteague to be swung concurrently to lie on Norfolk Navy radio range station).

VOR AIRWAYS: (1) VOR civil airway No. 27, (Santa Barbara, Calif., to Seattle, Wash.) is amended by changing all after the Hoquiam, Wash., omnirange station to read: "Hoquiam, Wash., omnirange station to the Seattle, Wash., omnirange station, excluding the portion above 14,500 feet above mean sea level which lies beneath, and which conflicts with, the Olympic Danger area (D-241).

(2) VOR civil airway No. 89 (Cheyenne, Wyo., to Rapid City, S. Dak.) From the Cheyenne, Wyo., omnirange station via the Chadron, Nebr., omnirange station, including an east alternate via the intersection of the Cheyenne omnirange 054° true and the Chadron omnirange 197° true radials; to the Rapid City, S. Dak., omnirange station, including an east alterante and excluding the portion which overlaps the Scenic Danger area (D-190).

(3) VOR civil airway No. 168 (unassigned).

(4) VOR civil airway No. 169 (Sidney, Nebr., to Rapid City, S. Dak.) "From the Sidney, Nebr., omnirange station via the intersection of the Disney omnirange 335° true and the Chadron omnirange 197° true radials; Chadron, Nebr., omnirange station; to the Rapid City, S. Dak., omnirange station, including an east alternate and excluding the portion which overlaps the Scenic Danger Area (D-190).

CONTROL AREAS: (1) Red civil airway No. 33, is amended by changing caption to read: "(Norfolk, Va., to Boston, Mass.) All of red civil airway No. 33."

(2) Red civil airway No. 51, (Blackstone, Va., to Norfolk, Va.) All of red civil airway No. 51."

(3) Blue civil airway No. 23, is added to read: "(Norfolk, Va., to Chincoteague, Va.) All of blue civil airway No. 23."

(4) VOR civil airway No. 89 (Cheyenne, Wyo., to Rapid City, S. Dak.) is amended to read: "All of VOR civil airway No. 89 including east alternates."

(5) VOR civil airway No. 168 (unassigned).

(6) VOR civil airway No. 169, (Sidney, Nebr., to Rapid City, S. Dak.) is added to read: "All of VOR civil airway No. 169 including an east alternate."

CONTROL AREA EXTENSIONS: (1) (Detroit, Mich.) is amended to read: "That airspace within a 15 mile radius of the Detroit omnirange station including the airspace north of Detroit-Wayne Major Airport bounded on the west by Green civil airway No. 2, on the north by Red civil airway No. 63, on the east by Red civil airway No. 20, and on the south by a line extending from a point at latitude 42°30'30", longitude 83°24'49" to a point at latitude 42°32'00", longitude 83°13'35".

(2) (Norfolk, Virginia) is amended to read: "That airspace within a 55 mile radius of a point located at latitude 36°57'44", longitude 76°24'44", excluding the airspace which overlaps all danger areas, warning areas and caution areas and excluding the portion below 2000 feet beyond the shoreline of the United States."

(3) (Jackson, Mich.) is amended to read: "Within 5 miles either side of a 313° true bearing extending from the Jackson, Mich., nondirectional radio beacon to a point 25 miles northwest."

(4) CONTROL ZONES: (1) (Manchester, N. H.) is amended to read: "Within a 3 mile radius of Grenier AFB and within 2 miles either side of lines bearing 337° true and 157° true from the Manchester nondirectional radio beacon extending from the Grenier AFB control zone to a point 10 miles southeast of the non directional radio beacon." (Note: coordinates of relocated Manchester H facility: latitude 42°52'16", longitude 71°23'44".)

REPORTING POINTS: (1) Red civil airway No. 51, (Blackstone, Va., to Norfolk, Va.) is added to read: "No reporting point designation."

(2) Blue civil airway No. 23 (Norfolk, Va., to Chincoteague, Va.) is added to read: "No reporting point designation."

Domestic VOR reporting points is amended by adding the following reporting points to read: Grants, N. Mexico., omnirange station; Bradford, Ill., omnirange station; Scottsbluff Intersection - the intersection of the Cheyenne, Wyo., omnirange 054° true and the Sidney, Nebraska., omnirange 335° true radials. and by revoking the following reporting point: Delaware Springs Intersection - the intersection of the Salt Flat, Texas, omnirange/ 085° true and the Carlsbad, N. Mexico, omnirange 215° true radials.

✓ ON REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are designated, re-designated, re-described or cancelled as indicated:

DESIGNATIONS:

(1) GWYNNE INTSXN - the intersection Norfolk Navy LFR north course with Tappahannock LFR southeast course.

(2) DINWIDDIE INTSXN - the intersection Blackstone LFR realigned east course with Richmond LFR soutwest course.

(3) CHELSEA, MICH.,INTSXN - the intersection southeast course of Lansing (LFR), Mich. 082° magnetic and 262° magnetic Jackson, Michigan LF/Rbn.

(4) HOPKINS, FLA., INTSXN - the intersection 338° magentic Vero Beach (VOR) and 130° magnetic Orlando, Fla. (VOR).

(5) CYNTHIANA, IND., INTSXN - intersection of the 010° magnetic radial of the Evansville, Indiana, omnirange and the 111° magnetic bearing toward the Evansville, Indiana outer compass locator.

(6) DECKER, IND. INTSXN - the intersection of the 010° magnetic radial of the Evansville. Indiana, omnirange and the 232° magnetic radial of the Scotland, Indiana, omnirange.

(7) ST. MARKS, IND. INTSXN - the intersection of the 062° magnetic radial of the Evansville, Indiana, omnirange and the 172° magnetic radial of the Scotland, Indiana omnirange.

(8) NEWBURGH, IND., INTSXN - the intersection of the 077° magnetic radial of the Evansville, Indiana, omnirange and a 324° magnetic bearing toward the Evansville, Indiana. outer compass locator.

(9) SOUTH EVANSVILLE, IND., INTSXN - the intersection of the 095° magnetic radial of the Evansville, Indiana, omnirange and a 015° magnetic bearing toward the Evansville, Indiana, outer compass locator.

REDESIGNATE:

(1) BACONS CASTLE INTSXN - to be formed by Norfolk LFR northwest course with Langley LFR west course.

REDESCRIBE:

(1) SALEM INTSXN - Hartford, Connecticut, VOR 142° magnetic with Norwich, Connecticut VOR 236° magnetic radials.

(2) SAYBROOK INTSXN - Wilton, Connecticut, VOR 102° magnetic with Riverhead, New York, VOR 055° magnetic radials.

CANCEL

(1) BRADFORD INTSXN! intersection north Peoria and NE Burlington

---

✓ AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY AREA BOUNDARY AMENDMENTS: Effective Immediately .

(1) The Memphis-St. Louis ARTC boundary is located 25 miles east of the Flippen, Ark. VOR.

(2) The Memphis-St. Louis Flight Advisory Boundary is established: Beginning at a point 50 miles southeast of the Ft. Smith, Ark., VOR on VOR civil airway No. 74 thence to a point 25 miles east of the Flippin, Ark., VOR on VOR civil airway number 140 thence to a point 20 miles southwest of the Farmington, Mo., VOR on VOR civil airway number 69.

(3) The Pittsburgh-Washington ARTC boundary is located on Victor 144 between the Morgantown and Front Royal omniranges at a point thirty-five statute miles southeast of the Morgantown omniranges.

RELOCATED

(1) The Pittsburgh-Washington ARTC boundary has been relocated on Victor 44 between the Morgantown and Martinsburg omniranges from its present location to a point 35 statute miles east of the Morgantown omnirange.

✓ NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS - The following abbrevia tions have been adopted for use in the Airman's Guide: "n miles" or "n mi" for nautical miles; "s miles" or "s mi" for statute miles.

(10-5-54)

AERONAUTICAL CHART CORRECTIONS: Correct Charlotte Sectional Chart, dated August 1, 1954 and WAC No. 410 dated, July 20, 1954 to read: Pittsboro, N. C., reporting point, shown at latitude 35°39', longitude 79°06' (intersection of SE course of Greensboro LF radio range and a line bearing 260° magnetic from Raleigh VOR), should be shown at latitude 35°43', longitude 79°16' (intersection of southeast course of Greensboro LF radio range and a line bearing 260° magnetic from Raleigh LF radio range.).

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editons of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Douglas	Phoenix	WAC 406
El Paso	San Diego	WAC 407
Los Angeles	Brownsville Local	WAC 471
Mt. Whitney		

A new edition (or new chart) for the charts listed below is now available for issue. Former prints should be destroyed or stampled "OBSOLETE FOR USE IN AVIATION".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, danger area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: - Because of space limitation such items are cited only once. The erection or removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALEXANDER CITY-RUSSEL ARPT: N/S Strip closed - const. (8-12)
ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
**ANNISTON ARPT: 574' (2981' MSL) lgtd TV twr erected 6.1 n mi SSE (158° T) at lat 33-29-06; long. 85-48-32. (7-21)
BIRMINGHAM-RADIO: VOR courses 005°-035°; 075°-175° and 195°-265° usable. Arpt apch course usable within 13 n mi; other courses not usable due to roughness and bends.
EVERGREEN-MIDDLETON FLD: Caution-vehicles and farm equip. intermittently crossing rnwys and using taxi strips.
HUNTSVILLE-RADIO: VOR radials 20°-70°; 100°-130°; 150°-210°; 255°-270°, rough and unusable. VOR not usable for apchs to Huntsville Arpt due to roughness, bends and signal cancellation. (4-7)
MOBILE-RADIO: VOR flgt-checked on arwy radials only.
**MOBILE-BATES ARPT: 313' (574' MSL) lgtd rdo relay twr erected 42.6 n mi NNW (350°T) at lat 31-23-18, long. 88-22-14. (7-9) 326' (516' MSL) lgtd rdo relay twr erected 26.1 n mi NE (25° T) at lat 31-05-36, long. 88-01-51. (7-10) 231' (461' MSL) rdo twr erected 23 n mi E (80° T) at lat 30-45-20, long. 87-47-31. (8-27)
MONTGOMERY-RADIO: DME coverage 130°-230°, 35 n mi at 1500'. (5-20)
**MONTGOMERY-DANNELLY FLD: 823' (1483' MSL) lgtd twr erected 17.4 n mi S (170° T) at lat 32-01-15, long. 86-20-56. (9-16) Rnwys 3-21 and 15-33 closed. Dips in E/W Rnwy 1500' from E end. (7-19) Use right hand traffic pattern Rnwy 9. (8-23) Acft lndg and taking off are cautioned to avoid the Maxwell AFB tfc pattern and control zone. (9-23)
TUSKEGEE-MOTON FLD: Caution - pipeline across rnwy. (10-1)
ARIZONA: CHANDLER-WILLIAMS AFB-RADIO: USAF VHF/DF steers unreliable on inbound headings 300°-080° below 7000' beyond 40 n mi from stn. (12-7)
COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11,000'.
DOUGLAS-BISBEE-DOUGLAS INTERNATIONAL ARPT: Pilots are cautioned to use maximun length of rnwys for landings and take-offs - due to obstructed view of ends. Take-offs from intersections of rnwys and taxiways prohibited.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radials.
HASSAYAMPA-RADIO: DME coverage 325°-50°, 43 n mi at 10,000'; 50°-90°, 43 n mi at 5000'; 90°-180°, 43 n mi at 7000'; 180°-215°, 43 n mi at 4000'; 215°-235°, 43 n mi at 6000'; 235°-255°, 35 n mi at 6000'; 255°-270°, 43 n mi at 6000'; 270°-325°, 43 n mi at 8000'.
KINGHAM ARPT: Caution-intermittent target plane testing in vcnty. Rdo controlled acft operating in area NW of fld.
PRESCOTT-RADIO: VOR radials 185°-225° usable dist 35 n mi at 10,000'; 135°-145° and 165°-185° usable dist 39 n mi at 10,000'.

ARIZONA: TUCSON-RADIO: VOR and DME coverage lmtd to 35 n mi at 11,000' 0°-12°, 69°-72° and 330°-346°; 26 n mi at 11,000'; 44°-69° and 346°-0°. (7-9) June 14, LF rng shut down for indefinite period - relctn.

TUCSON-DAVIS-MONTHAN AFB-RADIO: USAF VHF/DF lmtd in rng to 30 n mi in quads containing inbound headings of 150°-210° and 245°-275°; rng 50 n mi other quads; steers unreliable below 13,000' all quads. (12-23) USAF UHF/DF unreliable 170°-270° below 14,500' at 40 n mi; unreliable at min en route alts all quads. UHF/DF inop 0800-0900 each Wed. (2-3)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (2-3)

ARKANSAS: FAYETTEVILLE ARPT: Men and equip on fld daylgt hrs. (8-13)

HARRISON ARPT: New NW/SE Rnwy under const. Fld clsd for ngt operns. (3-10)

**LITTLE ROCK-ADAMS ARPT: 100' (500' MSL) lgtd microwave twr erected 2 n mi (225°T) at lat. 34-41-38; long. 92-15-19. (9-17)

TEXARKANA-RADIO: VOR 143° radial to Rnwy 13 beyond tolerance due to roughness and bends. (6-10) DME coverage 1900', 43 n mi in all quads.

WALNUT RIDGE-RADIO: VOR radials 290°-320° and 120°-150° have severe bends and course roughness. (4-14)

CALIFORNIA: ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

BAKERSFIELD-RADIO: VOR has slight to moderate scalloping in SE quad 80°-123°. Radials 0, 90, 100, 130, 140, 150, 220, 270, 300 and 330° flgt-checked.

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 180°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'.

BRAWLEY ARPT: E/W Rnwy clsd-construction. (4-30)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'. (9-15)

DAGGETT-RADIO: VOR 113.2 mc. Only arwy radials flgt-checked.

EDWARDS AFB-RADIO: USAF LF rng courses have splits and multiples, unreliable beyond 35 n mi. (4-14)

EUREKA COUNTY ARPT: All lgt fac inop. Length of surfaced rnwy reduced to 1400' and grass strip clsd. Const in progress on and adj to arpt. Caution - use at own risk. (5-29)

FILLMORE-RADIO: DME and VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17) About Oct 16, DME will be shut down (9-22)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked. (6-16)

FRESNO AIR TERMINAL: Rnwy 7-25 closed until approx April 1, 1955. (9-15)

FURNACE CREEK ARPT, SITE 17, RIV-TDL: Fld closed, const. Mrkd. (8-13)

GASQUET ARPT: N side of strip clsd-const.

KLAMATH-McBETH FLD: Closed-high vegetation. (7-27)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; -4-°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'.(6-16)

LONG BEACH ARPT: North lndg mat closed to all opern - rough and hazardous.(4-9) Two 175' lgtd oil derricks - one 1500' W and 1500' N Rnwy 25R; one, 1500' N Rnwy 25L, 1500' S Rnwy 25R and 2500' Rnwy 16 R. (8-23)

LONG BEACH-EAST LONG BEACH ARPT: Caution - const W side NE/SW Rnwy and S side E/W Rnwy. Land W and N sides respectively. (7-23)

LOS ANGELES-RADIO: VAR visual courses not usable - moderate scalloping N sector.(5-11)

LOS ANGELES INTERNATIONAL ARPT-TOWER: ILS on Rnwy 25L inoperative; ILS on Rnwy 25R will be operative, but radar monitored apchs not avail until later date. FLD:FIDO testing at irregular intervals. Due to non-visibility twr unable to ctl tfc on first 300' and last 600' of Rnwy 34 and last 1000' of Rnwy 29. Equip. on and adj to const areas. (6-4)

NEEDLES-RADIO: VOR 35 n mi coverage from 5° - 15° and 190° - 205° at 8000', and 50° radial at 10,000'.

OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. TFC operg in VFR wea should avoid vcnty of

CALIFORNIA: Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR maximum usable dist 35 n mi N thru E at min instr alt. (1-14) DME coverage 80°-120°, 43 n mi at 6000'; 120°-175°, 43 n mi at 5000'; 175°-280°, 43 n mi at 4000'; 280°-290°, 35 n mi at 4000'; 290°-305°, 43 n mi at 4000'; 305°-340°, 43 n mi at 6000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'; 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'. (6-3)

OCEANSIDE-HI HI SKY RANCH ARPT: Caution ditch in center of strip. (7-8)

ONTARIO-RADIO: DME coverage 0°-90°, 43 n mi at 13,000'; 90°-135°, 43 n mi at 9000'; 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 280°-300°, 43 n mi at 9000'; 300°-330°, 43 n mi at 13,000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. (6-12)

ONTARIO-INTERNATIONAL ARPT-TOWER: ILS LOM reported unreliable for navigational purposes durg hrs of darkness due strong heterodyne interference Mexicali H fac.(5-26)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'.

PASO ROBLES-RADIO: DME coverage 315°-45°, 43 n mi at 7000'; 45°-105°, 43 n mi at 5000'; 105°-125°, 43 n mi at 6000'; 125°-100°, 43 n mi at 5000'; 190°-220°, 43 n mi at 6000'; 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'; 270°-315°, 43 n mi at 5000'. (6-15)

PORTERVILLE ARPT: Electric Ear controlling lights, inoperative.

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'; 235°-360°, 43 n mi at 10,000'. (6-14)

RIALTO-MORROW ARPT: Closed on Sunday - Drag races. (7-28)

SACRAMENTO-RADIO: VOR usable dist 245°-260°, 39 n mi at 3000'. (6-1) DME coverage 10°-100°, 43 n mi at 9000'.

SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 mi. (5-20)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'. (5-27)

SAN DIEGO-RADIO: VOR has light to moderate scalloping in all quads. Arwy radials and radials 0, 80, 100, 140, 150, 270, 300, 310 and 320° flgt-checked.

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 100°-120°, 43 n mi at 7000'; 120°-160°, 43 n mi at 6000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 50001; 225°-265°, 26 n mi at 5000'; 265°-345°, 43 n mi at 5000'; 345°-010°, 35 n mi at 4000'. (6-15)

NORFOLK-RADIO: Visual courses VAR slightly rough.

NORFOLK ARPT-TOWER: About Oct 11, ASR will be shut down until approx Oct 25 - modernization. All radar procedures suspended for this period. (9-20) ASR PPI apchs not avail to Rnwy 22, 31, 13. (8-6)

PULASKI-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'. (7-7)

RICHMOND-RADIO: About Oct 26, SE course LF rng will be realigned from 310° to 303°.

RICHMOND-BYRD FLD: Due to non-visibility twr unable to ctl tfc on N and S portions of N/S taxiway parallel to rnwy 2-20. Caution soft shoulders rnwy 6-24. (5-6)

ROANOKE-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W taxi strip. (2-18)

WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area & lakes.

BELLINGHAM-RADIO: VOR radial 280°, on Vancouver B.C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.

BREMERTON-KITSAP COUNTY ARPT: The first 2,000' Rnwy 1 closed to all Naval acft.

ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown prohibited area; 150°-175°, 26 n mi at 5500';175°-260°, 43 n mi at 10,000';260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'. (6-21)

EPHRATA-RADIO: DME and VOR coverage;124°-209°, unknown prohibited area; 227°-280°, 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.

EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160° below 9000'. USAF UHF/DF steers unreliable 160°-310° clockwise below 7000'; 025°-098° below 9000' due terrain limitatio ns.

MOSES LAKE-LARSON AFB-RADIO: USAF VHF/DF unreliable 050°-110°, below 7000'; 110°-240° below 4000'; 240°-315° below 3500'. (1-13)

WASHINGTON: OTHELLO ARPT: Caution-unlgtd power line approx 50' high E end-unmrkd.

**PORT ORCHARD-SOUTH PORT ORCHARD ARPT: 1000' (MSL) lgtd TV twr erected 6.1 n mi NE (63°T) at lat. 47-28-43; long. 122-32-32. (7-26)

PULLMAN-MOSCOW ARPT: Lighting inoperative. (9-21)

SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Trans & rcvg freq 132.3 mc out of service. (9-17)

SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat. W of fld at 1000'. (9-28)

SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: Sept 17, ILS LOM shut down for modernization; OM shut down indefinitely. (9-17) About Oct 6, ILS glide slope will be shut down for 4 days - major repairs. (10-4)

SHELTON-RADIO: LF rng on 371 kc has lmtd usable course dist as follows: S course 30 n mi, SW and N 26 n mi each.

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7,000'; 152°-224°, 43 n mi at 5000'; 224°-264°, 43 n mi at 6000', 264°-36°, 43 n mi at 8000'. (6-17)

SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable 300°-70° at 6000'; 70°-90° at 9000'; 90°-140° at 11,000'; 140°-180° and 250°-300° at 12,000'. (4-20)

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld. (12-19)

SPOKANE-GEIGER FLD-TOWER: Back course ILS lclzr usable 9 n mi with flyable bends. FLD: Caution--construction on ramp N of control tower. Mil acft parked adjacent to taxiway between Rnwy 20 and control tower. Men and equipment working on appchs to Rnwy 2-20. (9-24)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.

WEST VIRGINIA: BECKLEY-RALEIGH CO. MEM'L ARPT: 4 poles supporting obstn lgts extending 25' above tree tops from E end E/W Rnwy to S of centerline of apch. (5-31)

CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (3-16)

**CHARLESTON-KANAWHA COUNTY ARPT: 649' (1549'MSL) lgtd TV twr erected 4.5 n mi WNW (275°T) at lat 38-22-36; long. 81-42-04. (7-1)

ELKINS-RADIO: LF rng has multiples and fades all courses. DME coverage 35°-95°, 43 n mi at 6800'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)

ELKINS ARPT: Small hole 2' long, 2" deep approx 150 yds from Rnwy 31 on right side edge taxiway leading from ramp. (9-16)

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'. (7-7)

MARTINSBURG ARPT: Glider flying-peak activity expected on week-ends and holidays. Serv fac avail 0800 until sunset. (9-6) Const 28' hangar 500' E of centerline and 1100' from S end Rnwy 35, lgtd. (9-24)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution-dip midway Rnwy 16-34 covering full width of rnwy. (5-4)

WISCONSIN: GRANTSBURG-RADIO: VOR has counterclockwise course errors up to 5° in excess of tolerance from azimuth angles 95°-125° and clockwise errors up to 1.5° in excess of tolerance at azimuth angles 220°-245°.(8-10) Sept 21, VOR shut down until approx Oct 7, - modernization. (10-1)

JANESVILLE-RADIO: VOR courses rough all azimuths within 4 n mi of stn. (6-8)

MADISON-TRUAX FLD-TOWER: Caution- twr rdo reception intermittently blocked out by jet acft run-ups. (6-16) FLD: E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Caution crossing hwy in lndg Rnwys 22,26,31. Sod unsafe. Due to non-visibility twr unable to ctl tfc on first 1000' S end Rnwy 18-36 adj taxiway and all portions of civil and mil ramps. Equip. on fld. Caution-lndg jet interceptor acft using tactical left hand over-head appchs at 2300' MSL. (3-30) Overrun lgts S end Rnwy 18-36 inop. (9-1)

MILWAUKEE-RADIO: VOR has moderate course roughness in area between 200° and 220°. DME coverage 190°-200°, 35 n mi; at min en route alt. (6-11)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: July 26, VHF/DF recmsnd, not flgt-checked at combined stn/twr. (8-5) About Oct 15, ASR will be cmsnd. (9-27) FLD: Rnwy 13-31 clsd, Rnwy 6-24 clsd 0700-1700. (8-10)

(10-5-54)

WISCONSIN: NEENAH-VALLEY ARPT. N/S Strip clsd-golf driving range, roadway on end.
RHINELANDER-ONEIDA COUNTY ARPT. Grading and paving NW/SE Strip. Men and equip. on fld. (6-22)
SIREN-BURNETT COUNTY ARPT. All lgtg fac inop. (10-1)
WATERTOWN ARPT. NE/SW Strip clsd-const. (5-21)
WAUKESHA-COUNTY ARPT. Caution-E, W Strip closed, Sept 26. (9-9)
WYOMING: CASPER-RADIO Sept 28, ILS lclzr and glide slope shut down until approx Oct. 13-modernization. ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs.
CHEYENNE ARPT. Clsd to transient jet acft, except in emergencies.
GILLETTE ARPT. 50-75' W shoulder 1500' from N end N/S Strip soft-clsd to hvy acft.
LARAMIE-RADIO. DME coverage 155°-225°, 35 n mi at 15,000', 225°-300°, 26 n mi at 15,000'. (7-2)
LARAMIE-BREES FLD. Caution deer on fld. (6-29)
ROCK RIVER-RADIO. DME coverage 360°-40°, 43 n mi at 11,000', 40°-110°, 43 n mi at 11,300', 110°-160°, 43 n mi at 11,000' 160°-230°, 43 n mi at 15,000' 230°-360°, 43 n mi at 12,000'. (7-20)
ROCK SPRINGS ARPT. Caution-first 500' NW end NW/SE Rnwy clsd-marked. (9-10)
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150 and 280° moderate course roughness exists in mountainous area (4-26)

Dates on Instrument Approach and Landing Charts

The Coast and Geodetic Survey is now publishing Instrument Approach and Landing Charts prior to the effective date if they portray a new or revised procedure. This is done in order to provide users with charts by the effective date of the procedure. These charts carry the effective date of the new procedure and therefore are dated in advance. Pilots are cautioned to retain and use current editions up to the date appearing on the new chart.

If for any reason there is a delay or advance in the effective date of the new procedure, an appropriate NOTAM will be issued to that effect.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods. (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface, or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator (FPDI) centered the omnibearing selector should read 0° with the to-from indication being "From" or the omnibearing selector should read 180° with the to-from indication read "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ± 4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of October 5, 1954, check points or facilitites have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 112.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal) 112.0 mc)
**Miami (International 112.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

NOTICE: **Starting with Vol 9 #11, (8-10-54) the Airman's Guide began to publish some instrument approach procedures with the lowest landing and take-off minimums possible under the obstruction clearance requirements of the Regulations of the Administrator, Part 609. Below are the ones contained in this issue. These minimums apply to all users except military aircraft and those for whom the Administrator has specifically authorized other minimums. ILS and GCA (PAR) straight-in landing minimums, formerly published no lower than 400-3/4, may in some instances be lowered to 200-1/2. Straight-in LFR, ADF and VOR landing minimums, formerly no lower than 500-1, may in some instances be lowered to 400-1. There are now three categories of aircraft minimums, namely those for (1) 75 mph or less- 2-engine or less, (2) more than 75 mph - 2-engine or less, and (3) more than 75 mph - more than 2 engine. All users are warned that the lowering of these minimums published in the Airman's Guide does not necessarily imply that obstructions have been lowered or removed.**

LOW FREQUENCY RANGE PROCEDURES

When an LFR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerour air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) -.-. --. -... (LGB in Code).

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciably higher rate of speed than the location identifier.

NAUTICAL MILES - STATUTE MILES: NEW DIMENSIONAL UNIT PROCEDURES: Among the various segments of the aviation industry there are many users of the airspace who desire to use nautical units for speed and distance measurements in their operations while others prefer the use of statute units. A plan designed to best serve the interests of all concerned has been developed and will be placed in effect on October 1, 1954. The plan generally provides that the pilots of all air carrier aircraft and all military aircraft shall use nautical units exclusively in all of their operations whether IFR or VFR. Private and business aircraft pilots, on the other hand, may use either nautical or statute units according to their preference.

Since uniformity is essential to the efficient operation of the Federal Airways System, all CAA facilities (communications stations, airport traffic control towers and air route traffic control centers) will use knots and nautical miles as the standard for all internal operations involving speed and distance values. Also, all normal radio transmissions of speed and distance values by these facilities will be in terms of knots and nautical miles with the exception of visibility which will continue to be reported and transmitted in statute miles. Any speed or distance value (except those associated with radar traffic control) will be converted from nautical to statute units by CAA facilities upon receipt of specific requests from pilots of private and business aircraft.

At the present time, surface wind velocity is reported in miles per hour. Beginning October 1, surface wind velocity will be reported in knots. Hence, when surface wind is reported as "west south west eight" it will be eight knots rather than eight miles per hour. This change need be of no great concern to the pilot, however, since, until a velocity of thirty miles per hour or more is reached, the difference between miles per hour and knots is so slight as to be insignificant for all practical purposes. In any case, if the pilot of a private or business aircraft wants the wind velocity in miles per hour, the CAA facility will convert it upon request.

When filing IFR flight plans and conducting IFR flight, distance and speed information submitted to CAA facilities by all pilots should, if possible, be in nautical units since the ground system will operate on the basis of nautical units. If statute units are used by the private or business aircraft pilot, they should be identified as such in each case; i.e., "airspeed 110 miles per hour". The CAA facility will then convert the value to knots for internal use.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 8, 1953 (10-19-54)

***

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS - The following abbreviations have been adopted for use in the Airman's Guide: "n miles" or "n mi" for nautical miles; "s miles" or " s mi" for statute miles.

SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Entry into and maneuvering within these patterns should be made at speeds within this tolerance as buffer zones have been provided only for these speeds. It is recommended that all aircraft adhere closely to these restrictions and if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

INSTRUMENT APPROACH PROCEDURES TO BE SOLD ON SPECIAL SUBSCRIPTION BASIS: Because of a demand for instrument approach information prior to publication in the Airman's Guide or Federal Register, the CAA has made arrangements for the issuance and distribution of individual copies of these procedures on a subscription basis to be delivered once each week. The annual subscription rate has been set at $125.00 per year. For each additional copy mailed to the same address, the annual subscription price will be $25.00. Checks should be made payable to the Treasurer of the United States and mailed to: Sales and Distribution Division, Room 6227, Commerce Department, Washington 25, D.C.

✓ IFR FLIGHTS ABOVE TWENTY-NINE THOUSAND FEET: Effective November 1, 1954, the odd-thousand foot altitude levels will be used for IFR flights above 29,000 feet unless prior coordination has been effected with air traffic control. This method of altitude assignment, adopted in conjunction with the military request for two thousand feet altitude separation for all flights at or above 30,000 feet, is designed to permit a more orderly and expeditious flow of air traffic within the airspace affected.

✓ RECORDED WEATHER INFORMATION ON ARCOLA, VIRGINIA, L/MF RANGE: On October 15, a continuous recorded voice broadcast of the latest available aviation weather and Notices to Airmen information was started over the Arcola, Virginia, L/MF range (233kcs). This is an experimental service sponsored jointly by the U.S. Weather Bureau and the Civil Aeronautics Administration. It is intended to improve the dissemination of weather and Notices to Airmen information through continuous broadcasting on the voice channels of certain navigational aids. The boardcast at Arcola contains flying weather forecasts for the area within 250 statute miles of Washington, radar weather reports, pilot's weather reports as available, reports of conditions observed by surrounding weather stations and Notices to Airmen concerning field conditions and radio aids. During the experimental period the service will be in operation during the hours 0600-1800 EST. This broadcast is interruptible for transmissions to specific aircraft desiring to obtain reply on this channel. Pilot comment on the new service is desired so that the form and content of the broadcast can be best suited to the needs of pilots. Comments may be sent to the Washington Office of the CAA (Office of Federal Airways) or to Chief, U. S. Weather Bureau, Washington.

✓ TEMPORARY AIRSPACE RESERVATIONS FOR ATLANTIC FLEET EXERCISES: The following temporary airspace reservations will be established as follows:

(a) 210001Z October to 032400Z November. From 45-30N 50W along the inner New York OAC boundary to 35N 73W to 35N 50W to origin. Sea level to 6,000.

(b) 140001Z November to 192400Z November. From 39N 73W along the inner boundaries of the New York and Miami OAC to 28N 78W to 28N 65W to 39N 65W to origin. Sea level to 6,000 and 23,000 to 40,000, excluding that area within a 100 n mi radius of Bermuda

(c) Special Notice exercise area within 100 n mi radius of 34-31-50N, 77-20W exclusive of Airways and the area west ofCivil Airway Amber 9 120401Z to 130400Z November and 140401Z to 210400Z November. Bogue Sound-Onslow Beach with air intercept simulated bombing and strafing from sea level to 35,000 feet. Hazardous to non-participating aircraft.

(d) Special Notice exercise area 140001Z November to 190500Z November. Air intercept, simulated bombing and strafing from sea level to 35,000 feet within the following area: From 32N 71W to 36-30N 74-30W to 34-20N 77-20W to 32-30N 78W to 29N 74W to origin. Hazardous to non-participating aircraft

(e) From 200500Z to 210500Z October; 100501Z to 190500Z November; 030500Z to 040500Z November; 200401Z to 210400Z November. From a point on the east coast of North Carolina at 36-20N to 36-20N 74-17W to 37-40N 74-17W thence west to coast line and along the coast to the point of origin. Sea level to 5,000 inclusive.

(f) From 200500Z to 210500Z October; 030500Z to 040500Z November; 100500Z to 110500Z November; 190500Z to 210500Z November. From a point 41N 70W to 40N 70W to 40N 72W to southern boundary control area extension 1169 thence along that boundary to 41-08N 70-24W thence to point of origin. Sea level to 4,000 feet.

(g) 190500Z to 230500Z October; 090500Z to 160500Z November. From a point 43N 65W to 40-43N 69-12W latitude and longitude, thence to South Island reporting point, thence to Cape May, thence along coastline to a point on the N.C. coast at 34-40N 77W, to 33N 77W, to 34N 73W, to 40N 65W, thence to point of origin. Sea level to 4,000 feet except control area extension surface to 2,000 feet inclusive.

(h) 250500Z October to 090500Z November. A point on the North Carolina coast 79W to 32N 79W, to 32N 76W, to 34N 74W to 37-40N 74W, thence west to coast line, thence along the coast to point of origin. Sea level to 4,000 except in control area extensions, surface to 2,000.

✓ LOCATION IDENTIFIERS: The following changes affects the use of location identifiers:

HEZ	Natchez, Miss., Adams County Airport (Change from REP NTZ AHZ)
HPA	Dallas, Texas, Highland Park Airport (Assignment)
HWY	Dallas, Texas, Highway 77 Airport (Assignment)
MPT	Mayport, Fla., ALF (Assignment)
NOT	Lutz, Fla., REP (Deletion)
OPK	Orchard Park, N. Y., AAF (Assignment)
PKC	Dallas, Texas, Park Cities Airport (Assignment)
ROA	Roanoke, Va., Woodrum Airport (Name change)
WRK	Dallas, Texas, White Rock Airport (Assignment)
GQ	Gananoque, Ont. (Assignment)

FLIGHTS INTO REMOTE AREAS OF CANADA: Information received by the Office of Aviation Safety indicates that U.S. pilots are desregarding fundamental safety considerations when flying into or over the remote areas of Canada The chief safety considerations being transgressed by U.S. pilots are: Failure to carry proper emergency equipment, failure to file a flight plan failure to notify proper authorities of any changes, and failure to close flight plans.

Prior to commencing a flight into unsettled territory, U. S. pilots should obtain advice and information on the emergency equipment and flight procedures from the nearest office of the Department of Transport, Civil Aviation Divsion. The addresses are:

District Superintendent
Air Regulations, 401 Winch Building
Vancouver B. C.

District Superintendent
Air Regulations, 260 Richmond St., W.
Toronto, Ontario

District Superintendent
Air Regulations, 320 Blowey Henry Building
Edmonton Alberta

District Superintendent
Air Regulations, Trans-Atlantic Building
Montreal Airport, Dorval, P. Q.

District Superintendent
Air Regulations 612 Power Building
Winnipeg Manitoba

District Superintendent
Air Regulations P.O. Box 42
Moncton, N. B.

Particulars given should include name of pilot and number of passengers, registration markings and type of aircraft radio equipment carried point of intended entry, itinerary and point of intended departure

---

✓ FLIGHT INFORMATION MANUAL CORRECTION: Correct Flight Information Manual, Volume 8, dated May 25, 1954, as follows:

(1) Page 21 under Florida change Pensacola CAA telephone number to read: HE 8-4390.

(2) Page 22, under Massachusetts change Boston WB telephone number to read: EA 7-4032, effective approximately November 15, 1954.

(3) Page 23 under North Carolina change Elizabeth City class to read: CAA instead of WB

(4) Page 23, under Montana, delete Custer CAA facility.

(5) Page 23, under Minnesota, change Minneapolis WB telephone number to read: DUpont 4635.

(6) Page 24, under Rhode Island, change Providence WB telephone number to read: REgent 7-3700.

(7) Page 25, under Washington, delete OFACS, and change to read: Seattle CAA telephone number CH-6701, CH-4200.

(8) Page 85, under "L" delete listing Logan Co. Sterling, Colo.

(9) Page 93, under "S" correct listing to read: Sterling-Logan County, Colorado.

DANGER AREA AMENDMENTS: The following Danger Area Amendments shall be effective as dated, unless otherwise advised:

AMENDMENT NO. 94, to PART 608-DANGER AREAS
(October 26, 1954)

(1) In Section 608.41 the Cherry Point, North Carolina, No. 2, area, (D-125), published on April 21, 1949, in 14 F.R. 1913, and on July 16, 1949, in 14 F.R. 4287, and amended on August 16, 1950, in 15 F.R. 5429 and on November 8, 1952 in 17 F.R. 10139 and on December 3, 1952, in 17 F.R. 10903, is further amended by changing the "Designated Altitudes" column to read: " From 11,000 feet MSL to 45,000 feet MSL. During the hours of darkness, that portion overlapping Amber civil airway No. 9 shall include only that airspace from 11,000 feet to 16,000 feet and from 23,000 feet to 45,000 feet ASL."

AMENDMENT NO. 95, to PART 608-DANGER AREAS
(November 8, 1954)

(1) In Section 608.49, the South Wellfleet, Massachusetts area, (D-22), published on April 21, 1949, in 14 F.R. 1917, and amended on July 27, 1949, in 14 F R. 4665, and on March 11, 1950, in 15 F.R, 1329 and on March 6, 1951, in 16 F.R. 2051, and on July 19, 1951, in 16 F.R. 6915, and on August 11, 1954, in 19 F.R. 5041, is further amended by changing the "Using Agency" column to read: " First Army".

(2) A new section 608.64 for Island of Guam is added: In this section, the Agat Bay area, (D-474) is established: Name: Agat Bay. Description: Beginning at latitude 13°26'N, longitude 144°38' E, thence along a line approximately 1/2 n mile off shore Guam to latitude 13° 15'N, longitude 144° 45'E, to latitude 13°10'N, longitude 144° 45'E, to 13° 10'N, longitude 144° 30'E, to 13° 26'N, longitude 144°30'E, to 13°26'N, longitude 144°38'E, point of beginning. Altitude: Surface to 1000 feet. Time of Use: Continuous VFR only Activity: Low altitude drops of non-explosives. Using Agency: NAS, Agana, Guam.

(3) In Section 608.64, (Island of Guam) the Farallon De Medinilla area, (D-476) is established: Name: Farallon De Medinilla, (Island of Guam). Description: Beginning at latitude 16°08'N, longitude 146°10'E; thence to latitude 15°55'N, longitude 146°10'E; thence to latitude 15°55'N, longitude 146°00'E; thence to latitude 16°08'N, longitude 146°00'E; thence to point of beginning. Altitude: Surface to unlimited. Time of Use: Continuous. Activity: Bombing. Controlling Agency: NAS, Agana, Guam. Using Agency: USAF.

(4) In Section 608.64, (Island Of Guam), the Nafatan Rock area, (D-478) is established: Name: Nafatan Rock. Description: Within a radius of 5 n miles of latitude 14°50'00"N, longitude 145°32'00"E. Altitude: Surface to 3000 feet MSL. Time of Use: Continuous. Activities: Low altitude bombing. Controlling Agency: NAS Agana, Guam.

CIVIL AIRWAY, CONTROL AREA EXTENSIONS, CONTROL ZONES AND REPORTING POINT AMENDMENTS: Effective November 9, 1954, civil airways, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red civil Airway No. 87 (Hawaiian Islands) is amened to read: "From the intersection of northwest course of the Port Allen, T.H. radio range and a point 100 statute miles northwest of the Port Allen, T.H., radio range station via the Port Allen, T.H., radio range station; the intersection of the southeast course of the Port Allen, T.H., radio range and the southwest course of the Honolulu, T.H., radio range; Honolulu, T.H., radio range station; Maui, T.H., radio range station; the intersection of the southeast course of the Maui, T.H., radio range and the north course of the Hilo, T.H., radio range; Hilo, T.H. radio range station to the intersection of the east course of the Hilo, T.H., radio range and a point 100 statute miles east of the Hilo, T.H., radio range station." (NOTE: Above adds small portions to Red 87 between Makai intersection and the Honolulu range station and between the Kuku Point intersection and the Hilo range station, eliminating small breaks in the airway thereby achieving a reduction in wordage of ACT clearances and simplification of flight plan filing.)

(2) Blue Civil Airway No. 38 (Petersburg, Alaska to United States-Canadian Border) is amended to read: "That airspace over United States territory from the Petersburg, Alaska radio range station via the intersection of the northwest course of the Petersburg, Alaska, radio range and the southeast course of the Gustavus, Alaska, radio range; Gustavus, Alaska radio range station; Haines, Alaska non directional radio beacon to the Whitehorse, Y.T., radio range station."

(3) Blue civil airway No. 44 is amended by changing the caption to read: (Indianapolis, Ind., to United States-Canadian Border) and by deleting the portion which reads: "From the Advance, Mo., radio range station to the Paducah, Ky., non directional radio beacon."

(4) Blue civil airway No. 79 is amended by changing the caption to read: (Annette Island, Alaska to United States-Canadian Border) and further amended to read: "That airspace over United States territory from the intersection of the south course of the Annette Island, Alaska radio range and the United States-Canadian Border via the Annette Island, Alaska radio range station; Petersburg, Alaska radio range station; Haines, Alaska non directional radio beacon to the Pon Lake, Y.T., Canada, non directional radio beacon."

CONTROL AREAS: (1) Red civil airway No. 15 (Reno, Nev., to Phoenix, Ariz.) is amended to read: "From the intersection of the northeast course of the Rneo, Nev., radio range and the northwest course of the Fallon, Nev., radio range to a line extended at right angles through a point 25 statute miles southeast of the Fallon, Nev., radio range station. From the Las Vegas, Nev., radio range station. to the Phoenix, Ariz., radio range station." (Note: Fallon, Nev., radio range courses to be realigned concurrently as follows: North course to 191° true, southeast course to 320° true, southwest course to 027° true, northwest course to 118° true-all inbound. Red 15 airway automatically follows the Fallon NW course realignment).

(2) Blue civil airway No. 38 (Petersburg, Alaska to United States-Canadian Border). "All of Blue civil airway No. 38."

(3) Blue civil airway No. 44 is amended by changing caption to read: (Indianapolis, Ind., to United States-Canadian Border). "All of Blue civil airway No. 44."

(4) Blue civil airway No. 79 is amended by changing caption to read: (Annette Island, Alaska to United States-Canadian Border). "All of Blue civil airway No. 79."

CONTROL AREA EXTENSION: (1) (Fallon, Nev.) is added to read: "Within a 10 statute mile radius of the Fallon, Nev., radio range station excluding the portion which overlaps Fallon danger area D-268, and within 5 statute miles either side of the north course of the Fallon radio range extending from the radio range station to a point 25 statute miles north." (Note: North course of Fallon to be aligned to 191° true inbound concurrently).

CONTROL ZONES: (1) Five statute miles radius zones is amended by adding the following airport: Fallon, Nev.: Fallon NAAS.

(2) (Huron, S. Dak.) is amended by adding the following portion to present control zone: "and within 2 statute miles either side of the Huron ILS localizer Northwest course extending from the localizer to a point 12 statute miles northwest of the outer marker."

(3) (Sacramento, Calif.) is amended by adding the following portion to present control zone: "and within 2 statute miles either side of a line bearing 358° true extending from McClellan AFB to Red civil airway No. 76."

REPORTING POINTS: (1) Red civil airway No. 41 (Yakutat, Alaska to Gustavus, Alaska). "No reporting point designation".

(2) Red civil airway No. 64 (United States-Canadian Border to Annette Island, Alaska). "No reporting point designation."

(3) Blue civil airway No. 38 is amended by changing caption to read: (Petersburg, Alaska to United States-Canadian Border). "The intersection of the southeast course of the Gustavus, Alaska radio range and the northeast course of the Sitka, Alaska radio range; Gustavus, Alaska radio range station."

(4) Blue civil airway No. 44 is amended by changing the caption to read; (Indianapolis, Ind., to United States-Canadian Border).

(5) Blue civil airway No. 79 is amended by changing the caption to read: (Annette Island, Alaska to United States-Canadian Border) and further amended to read: "Annette Island, Alaska radio range station; Petersburg, Alaska radio range station; the intersection of the northeast course of the Sitka, Alaska radio range and the northwest course of the Petersburg, Alaska radio range; Haines, Alaska non directional radio beacon".

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows effective October 26, 1954.

(1) The references to the section numbers of the Red civil airway minimum en route IFR altitudes, which appeared in amendments 69 through 74, inclusive, are corrected as follows: (a) In amendment 69 (19 F.R. 4468) the section numbers in paragraphs 3 through 5 and the corrected numbers therefor in the sequence in which they appear as as follows: Section 610.301 corrected to 610.201; Section 610.368 corrected to 610.268; Section 610.396 corrected to 610.296. (b) In amendment 70 (19 F.R. 4717) the section numbers in paragraphs 3 through 6 and the corrected numbers therefor in the sequences in which they appear are as follows: Section 610.325 corrected to 610.225; Section 610.355 corrected to 610.255; Section 610.368 corrected to 610.268; Section 610.401 corrected to 610.301. (c) In amendment 71 (19 F.R. 5128) the section numbers in paragraphs 4 through 8 and the corrected numbers therefor in the sequence in which they appear are as follows: Section 610.304 corrected to 610.204; Section 610.310 corrected to 610.210; Section 610.357 corrected to 610.257; Section 610.374 corrected to 610.274; Section 610.383 corrected to 610.283. (d) In amendment 72 (19 F.R. 5477) the section numbers in paragraphs 7 through 17 and the corrected numbers therefor in the sequence in which they appear are as follows: Section 610.302 corrected to

610.202; Section 610.302 corrected to 610.202; Section 610.310 corrected to 610.210; Section 610.320 corrected to 610.220; Section 610.325 corrected to 610.225; Section 610.330 corrected to 610.230; Section 610.334 corrected to 610.234; Section 610.348 corrected to 610.248; Section 610.365 corrected to 610.265; Section 610.368 corrected to 610.268; Section 610.377 corrected to 610.277. (e) In Amendment 73 (19 F.R. 5884) the section numbers in paragraph 2 through 5 and the corrected numbers therefor in the sequence in which they appear are as follows: Section 610.320 corrected to 610.220; Section 610.368 corrected to 610.268; Section 610.390 corrected to 610.290; Section 610.403 corrected to 610.303. (f) In Amendment 74 (19 F.R. 6177) the section numbers in paragraphs 3 and 4 and the corrected numbers therefor in the sequence in which they appear are as follows: Section 610.363 corrected to 610.263; Section 610.363 corrected to 610.263.

From	To	Min Alt.
(2) Red Civil Airway No. 13, is amended to read in part:		
Wilkes-Barre, Pa. (LFR)	Stewart AFB, N.Y. (LF/RBN)	3,500
Stewart AFB, N.Y. (LF/RBN)	Poughkeepsie, N.Y. (LFR)	3,000
(3) Red Civil Airway No. 18, is amended to read in part:		
Stockwell (Int), Ind.	Cincinnati, Ohio (LFR)	2,300
(4) Red Civil Airway No. 19, is amended to read in part:		
Int. N crs Richmond, Va. (LFR) & NW crs Tappahannock, Va. (LFR)	Gwynn (Int), Va.	1,500
Gwynn (Int,)Va.	Norfolk (Navy), Va. (LFR)	1,500
(5) Red Civil Airway No. 33 is amended to read in part:		
Branchville (Int),N.J.	Stewart AFB, N.Y. (LF/RBN)	3,000
(6) Red Civil Airway No. 33, is amended by adding:		
Buckroe Beach (Int), Va.	Richmond, Va. (LFR)	1,500
(7) Red Civil Airway No. 51, is added to read:		
Dinwiddie (Int), Va.	Langley, Va. (LFR)	1,500
(8) Blue Civil Airway No. 23, is added to read:		
Norfolk (Navy),Va. (LFR)	Chincoteague (Navy), Va. (LFR)	1,500
(9) Blue Civil Airway No. 36, is amended to delete:		
Ranch (Int), Colo.	Akron, Colo. (LFR)	6,000

CHANGES IN INSTRUMENT APPROACH PROCEDURES MINIMUMS: Starting with Volume 9, Number 11, dated August 10, 1954, the Airman's Guide began to publish some instrument approach procedures with the lowest landing and take-off minimums possible under the obstruction clearance requirements of the Regulations of the Administrator, Part 609. These minimums apply to all users except military aircraft and those for whom the Administrator has specifically authorized other minimums.

ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are established, cancelled or redescribed:

(1) NESBITT INTERSECTION (Integrated) - the intersection of the Memphis 182° magnetic radial and the 090° magnetic bearing from the Bruins MH facility.

(2) CUBA INTERSECTION (VHF) - the intersection of the Memphis 340° magnetic and the Dyersburg 213° magnetic radials.

(3) FISHERVILLE INTERSECTION (VHF) - the intersection of the Memphis 063° magnetic and the Dyersburg 190° magnetic radials.

(4) COLT INTERSECTION (VHF) - the intersection of the Memphis 269° magnetic and the Walnut Ridge 165° magnetic radials.

(5) OKEMAH INTERSECTION (LFR) - the intersection of the east course of the Oklahoma City range and the 200° magnetic bearing from the Tulsa LFR.

(6) WINGS INTERSECTION - the intersection Westchester, Pa., VOR en route radial on V3 to Belle Mead intersection (Colts Neck VOR 304° with Caldwell VOR 228° magnetic radials) with Allentown, Pa, VOR direct radial.

(7) BARDSTOWN INTERSECTION - the intersection Louisville VOR en route radial on V5E with Lexington VOR 258° true radial.

(10-19-54)

(8) FLOYDSBURG INTERSECTION - the intersection Louisville VOR en route radial on V5 to Cincinnati VOR with Lexington VOR 295° true radial.

(9) JEFFERSONVILLE INTERSECTION - the intersection Louisville VOR en route radial on V53 to Indianapolis with Louisville ILS northeast (back) course.

(10) FRANKFORT INTERSECTION - the intersection Louisville VOR and Lexington VOR radials which form V4N plus the Cincinnati VOR radial direct to this intersection.

(11) LEBANON INTERSECTION - the intersection Louisville VOR en route radial on V5 to Bowling Green with Lexington VOR 263° true radial.

(12) WADSWORTH LF INTERSECTION - the intersection of the northeast course of the Reno, Nevada LF range and the northwest course of the Fallon, Nevada LF range.

(13) SHEPPARDS INTERSECTION-the intersection Danville,Virginia VOR en route radial on V39 (031°mag radial) with a direct bearing from Richmond, Virginia, LFR station to Lynchburg, Virginia, LFR station.

(14) MORVEN INTERSECTION - the intersection Blackstone, Virginia LFR north course with a direct bearing from Richmond, Virginia, LFR station to Lynchburg, Virginia LFR station.

(15) HAYTERS GAP VHF INTERSECTION - the intersection of the Tri-City 013° magnetic and the Pulaski 262° magnetic radials.

(16) DONALDSONVILLE VHF INTERSECTION - the intersection of the New Orleans 272° magnetic and the Baton Rouge 140° magnetic radials.

(17) ARCOLA VHF INTERSECTION - the intersection of the Houston 217° magnetic and the Galveston 283° magnetic radials.

(18) ANDRAU INTEGRATED INTERSECTION - the intersection of the Houston 281° magnetic radial and the 011° magnetic bearing from the Andrau Airpark radio beacon.

(19) NORRIS VHF INTERSECTION - the intersection of the Crossville 063° magnetic and the Knoxville 347° magnetic radials.

(20) HILTON VHF INTERSECTION - the intersection of the Tri-City 311° magnetic and the Knoxville 054° magnetic radials.

(21) PAWHUSKA VHF INTERSECTION - the intersection of the Tulsa 311° magnetic and the Ponca City 080° magnetic radials.

(22) COWETA VHF INTERSECTION - the intersection of the Tulsa 114° magnetic and the Neosho 224° magnetic radials.

(23) CHELSEA VHF INTERSECTION - the intersection of the Tulsa 056° magnetic and the Fayetteville, Arkansas, 276° magnetic radials.

(24) PRYOR VHF INTERSECTION - the intersection of the Tulsa 083° magnetic and the Neosho 224° magnetic radials.

(25) BEGGS VHF INTERSECTION - the intersection of the Tulsa 198° magnetic and the McAlester, Oklahoma 330° magnetic radials.

(26) EMORY VHF INTERSECTION - the intersection of the Sulphur Springs, Texas, 200° magnetic and the Quitman, Texas 262° magnetic radials.

(27) HUNTINGTOWN INTERSECTION - the intersection Baltimore, Maryland VOR direct radial to Huntingtown, Maryland, "MH" facility with Washington TVOR direct radial to Huntingtown "MH" facility.

(28) ALLIANCE INTERSECTION - the intersection Akron, Ohio LFR southeast course with the bearing (250° magnetic) from the Hubbard, Ohio "MH" facility.

(29) TENINO INTERSECTION - the intersection of the southwest course of the McChord, Washington LF range and the south course of the Shelton, Washington LF range.

(30) CAMDEN INTERSECTION - the intersection Dayton, Ohio VOR 228° magnetic with Cincinnati VOR 004 magnetic.

(31) CHATHAM INTERSECTION - the intersection Allentown VOR 097° magnetic en route radial on V6 with Caldwell, New Jersey, VOR direct radial to Belle Mead intersection. (Allentown VOR 121° with Caldwell VOR 228° magnetic radials).

REDESCRIBED:

(1) NESBITT LF INTERSECTION - the intersection of the south course of the Memphis LFR and the 090° magnetic bearing from the Bruins MH facility

CANCEL

(1) PARKERSBURG INTERSECTION
(2) WEST POINT INTERSECTION
(3) HYDE PARK INTERSECTION
(4) HACKENSACK INTERSECTION

✓ NON-STANDARD HOLDING PATTERNS: Effective immediately the following non standard holding patterns are established:

(1) Memphis, Tenn. ILS outer marker compass locator - Hold west of the fix 266° magnetic inbound course 086° magnetic. Right turns-one minute pattern, minimum altitude 1700 feet.

(2) Memphis LFR - Hold NE on the NE course. Inbound bearing to fix 240° magnetic. Right turns- one minute pattern, minimum altitude 1800 feet.

(3) Red Fork FM- Intersection of the SW course of the Tulsa LF range and the 264° magnetic bearing from the Tulsa ILS outer marker compass locator. Holding will be accomplished SW of the intersection. Inbound bearing to the fix 039° magnetic with left turns in a two-minute pattern, minimum altitude 2400 feet.

(4) LEBANON INTERSECTION - Hold on Louisville radial south of intersection, left turn, 2 minute pattern, minimum holding altitude 3,000 feet MSL.

✓ DATES ON INSTRUMENT APPROACH AND LANDING CHARTS: The Coast and Geodetic Survey is now publishing Instrument Approach and Landing Charts prior to the effective date if they portray a new or revised procedure. This is done in order to provide users with charts by the effective date of the procedure. These charts carry the effective date of the new procedure and therefore are dated in advance. Pilots are cautioned to retain and use current editions up to the date appearing on the new chart. If for any reason there is a delay or advance in the effective date of the new procedure, an appropriate NOTAM will be issued to that effect.

✓ HAZARDOUS TERRAIN DATA ON WAC 1278: WAC 1278, 4th revised edition, November 1953 aero date, contains certain hazardous terrain data. East of 45° east elevations exist which are from 100 to 2,270 feet higher than elevations now shown or indicated by contours and gradient tints. New high elevations which should be added are as follows: 6,660 at 21° 52' South, 47° 10' East; 5,266 at 22° 51' South, 46° 23' East; 4,108 at 22° 19' South, 46° 08' East; 3,822 at 23° 29' South, 47° 11' East. Earlier editions still in current use should also be corrected.

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, WAIT UNTIL LISTED AS AVAILABLE BEFORE ORDERING.

Elko	Reno	WAC 404
Klamath Falls	San Diego Local	WAC 405
Mt. Shasta	San Francisco Local	WAC 522
Pocatello	WAC 364	

A new edition (or new chart) for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) • Month and day item was reported.
** • New or revised airport, danger area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ • New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: • Because of space limitation such items are cited only once. The erection or removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALEXANDER CITY-RUSSELL ARPT: N/S Strip closed - const. (8-12)
ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
**ANNISTON ARPT: 574' (2981' MSL) lgtd TV twr erected 6.1 n mi SSE (158° T) at lat 33-29-06, long. 85-48-32. (7-21)
BIRMINGHAM-RADIO: VOR courses 005°-035°; 075°-175° and 195°-265° usable. Arpt apch course usable within 13 n mi; other courses not usable due to roughness and bends. (4-23)
**BIRMINGHAM ARPT: Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft including T-6. This corrects Directory of Airports, Airgi Vol.9, No.15.

ALABAMA: **CHICKASAW ARPT: Abandoned. (10-1)
EVERGREEN-MIDDLETON FLD: Caution-vehicles and farm equip. intermittently crossing rnwys and using taxi strips.
HUNTSVILLE-RADIO: VOR radials 20°-70°; 100°-130°; 150°-210°;255°-270°, rough and unusable. Courses between rng and arpt unusable due to roughness, bends and signal cancellation. (10-7)
MOBILE-RADIO: VOR flgt-checked on arwy radials only.
MONTGOMERY-RADIO: DME coverage 130°-230°, 35 n mi at 1500' (5-20)
**MONTGOMERY-DANNELLY FLD: 823' (1483' MSL) lgtd twr erected 17.4 n mi S (170°T) at lat 32-01-15, long. 86-20-56. (9-16) Rnwys 3-21 and 15-33 closed. Dips in E/W Rnwy 1500' from E end. (7-19) Use right hand tfc pat Rnwy 9. (8-23) Acft lndg and taking off are cautioned to avoid the Maxwell AFB traffic pattern and control zone. (9-23) Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard Hangar (10-8)
TUSCALOOSA-VAN DE GRAAFF FLD: Three 200' twrs lctd 2 n mi E - lgts inop. intermittently. (10-3)
TUSKEGEE-MOTON FLD: Caution - pipeline across rnwy. (10-1)
ARIZONA: CHANDLER-WILLIAMS AFB-RADIO: USAF VHF/DF steers unreliable on inbound headings 300°-080°, below 7000' beyond 40 n mi from stn. (12-7)
COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11,000'.
DOUGLAS-BISBEE-DOUGLAS INTERNATIONAL ARPT: Pilots are cautioned to use maximum length of rnwys for landings and take-offs - due to obstructed view of ends. Take-offs from intersections of rnwys and taxiways prohibited.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: DME coverage 325°-50°, 43 n mi at 10,000'; 50°-90°, 43 n mi at 5000'; 90°-180°, 43 n mi at 7000'; 180°-215°, 43 n mi at 4000'; 215°-235°, 43 n mi at 6000'; 235°-255°, 35 n mi at 6000'; 255°-270°, 43 n mi at 6000'; 270°-325°, 43 n mi at 8000'. (7-15)
KINGMAN ARPT: Caution-intermittent target plane testing vcnty. Rdo controlled acft operg in area NW of fld.
★PRESCOTT-RADIO VOR radials 185°-225° usable dist 35 n mi at 10,000'; 135°-145° and 165°-185° usable dist 39 n mi at 10,000'. Oct. 18, trans. freq. 122.2 mc cmsnd.
TUCSON-RADIO: VOR and DME coverages lmtd to 35 n mi at 11,000'; 360°-12°, 69°-72° and 330°-346°; 26 n mi at 11,000, 44°-69° and 346°-360°. (7-9) June 14, LF rng shut down for indefinite period - relctn.
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF/DF lmtd in rng to 30 n mi in quads containing inbound headings of 150°-210° and 245°-275°; rng 50 n mi other quads; steers unreliable below 13,000' all quads (12-23) USAF UHF/DF unreliable 170°-270° below 14,500' at 40 n mi; unreliable at min en route alts all quads. UHF/DF inop 0800-0900 each Wed. (2-3)
YUMA COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (2-3)
ARKANSAS: FAYETTEVILLE ARPT: Men and equip. on fld daylgt hrs. (8-13)
HARRISON ARPT: New NW/SE Rnwy under const. Fld clsd for ngt operns. (3-10)
TEXARKANA-RADIO: VOR 143° radial to Rnwy 13 beyond tolerance due to roughness and bends. (6-10) DME coverage 1900', 43 n mi in all quads.
WALNUT RIDGE-RADIO: VOR radials 290°-320° and 120°-150° have severe bends and course roughness. (4-14)
CALIFORNIA: ARCATA-RADIO: About Oct 27, ILS will be shut down until approx Nov 6 - modernization. (10-13)
ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.
BAKERSFIELD-RADIO: VOR has slight to moderate scalloping in SE quad 80°-123°. Radials 0, 90, 100, 130, 140, 150, 220, 270, 300 and 330° flgt-checked.
BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 180°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'.
BRAWLEY ARPT: E/W Rnwy clsd - const. (4-30)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'. (9-15)
DAGGETT-RADIO: VOR 113.2 mc. Only arwy radials flgt-checked.

CALIFORNIA: EDWARDS AFB-RADIO: USAF LF rng courses have splits and multiples, unreliable bevond 35 n mi. (4-14)

EUREKA COUNTY ARPT: All lgtg fac inop. Length of surfaced rnwy reduced to 1400' and grass strip clsd. Const in progress on and adj to arpt. Caution - use at own risk. (5-29)

FILLMORE-RADIO: DME and VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17) Soon DME will be shut down. (9-22)

FT. JONES-RADIO:: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000';10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked. (6-16)

FRESNO AIR TERMINAL: Rnwy 7-25 closed until approx April 1, 1955. (9-15)

FURNACE CREEK ARPT, SITE 17, RIV-TDL: Fld closed, const. Mrkd. (8-13)

GASQUET ARPT: N side of strip clsd-const.

KLAMATH-McBETH FLD: Closed-high vegetation. (7-27)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000';040°-070°,8000';070°-100°,7000'; 100°-280°, 4000'. (6-16)

LONG BEACH ARPT: North lndg mat closed to all opern rough and hazardous.(4-9) Two lgtd oil derricks 135' and 175' high on fld N of Rnwy 7R/25L and one 250' lgtd derrick 1700' S of Rnwv 7R/25L. (10-13)

LONG BEACH-EAST LONG BEACH ARPT: Caution - const W side NE/SW Rnwy and S side E/W Rnwy. Land W and N sides respectively. (7-23)

LOS ANGELES-RADIO: VAR visual courses not usable - moderate scalloping N sector.

LOS ANGELES INTERNATIONAL ARPT-TOWER: ILS on Rnwy 25L inop; ILS on Rnwy 25R will be operative, but radar monitored apchs not avail. (8-16) FLD: FIDO testing at irregular intervals. Due to non-visibility twr unable to ctl tfc on first 300' and last 600' of Rnwv 34 and last 1000' of Rnwv 29. Equip. on and adj to const areas. (6-4)

NEEDLES-RADIO: VOR 35 n mi coverage from 5°-15° and 190°-205° at 8000' and 50° radial at 10,000'.

OAKLAND: Pilots proposing transbav flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequentlv less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR maximum usable dist 35 n mi N thru E at min instr alt. (1-14) DME coverage 80°-120°, 43 n mi at 6000'; 120°-175°, 43 n mi at 5000'; 175°-280°, 43 n mi at 4000'; 280°-290°, 35 n mi at 4000'; 290°-305°, 43 n mi at 4000'; 305°-340°, 43 n mi at 6000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'; 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'. (6-3)

OCEANSIDE-HI HI SKY RANCH ARPT: Caution ditch in center of strip. (7-8)

ONTARIO-RADIO: DME coverage 0°-90°, 43 n mi at 13,000';90°-135°, 43 n mi at 9000'; 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 280°-300°, 43 n mi at 9000'; 300°-330°, 43 n mi at 13,000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. (6-12)

ONTARIO-INTERNATIONAL ARPT-TOWER: ILS LOM reported unreliable for navigational purposes durg hrs of darkness due strong heterodyne interference Mexicali H fac.(5-26)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'.

PASO ROBLES-RADIO: DME coverage 315°-45°, 43 n mi at 7000'; 45°-105°, 43 n mi at 5000'; 105°-125°, 43 n mi at 6000'; 125°-190°, 43 n mi at 5000'; 190°-220°, 43 n mi at 6000'; 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'; 270°-315°, 43 n mi at 5000'. (6-15)

PORTERVILLE ARPT: Electric Ear controlling lights, inoperative.

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'; 235°-360°, 43 n mi at 10,000'. (6-14)

RIALTO-MORROW ARPT: Closed on Sunday-Drag races. (7-28)

SACRAMENTO-RADIO: VOR usable dist 245°-260°, 39 n mi at 3000'. (6-1) DME coverage 10°-100°, 43 n mi at 9000'.

SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 mi. (5-20)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000';

CALIFORNIA: 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'. (5-27)

SAN DIEGO-RADIO: VOR has light to moderate scalloping in all quads. Arwy radials and radials 0, 80, 100, 140, 150, 270, 300, 310 and 320° flgt-checked.

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 100°-120°, 43 n mi at 7000'; 120°-160°, 43 n mi at 6000';160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 265°-345°, 43 n mi at 5000'; 345°-10°, 35 n mi at 4000'. (6-15)

★SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Sept. 27, ASR shut down for approx 6 weeks-modernization and move to new twr. (9-25) Arpt tfc ctl twr voice on freq 227 kc discontd. Acft with onlv one rcvr mav make req for IFR clearance thru San Francisco rdo. (10-8) Trans & rcvrs 120.5, 243.0 and 257.8 mc cmsnd. (10-12) FLD: Taxiway 1 paralleling rnwvs 10R and 1L clsd. Equip on fld. A hump of 5'' rise in 75' developed across rnwv 10L-28R, 3000' from W end of rnwv. (2-3) 90' pile driver adj W end 28L mrkd, lgtd. (7-20) Effect. Oct. 18, tfc will be operg simultaneouslv on Victor 107 and Victor 25/27E in vcntv of San Francisco VOR, even though the center line of these arwys is 8.5 mi apart. The usual dist. rqrd between the center line of two VOR Airways before lateral separation is considered to exist is 10 mi. However due to the proximitv of the Oakland VOR and San Francisco VOR facilities and the quality of the reception from these facilities, a waiver has been granted for this deviation from the 10 mi requirement. Tfc information will be exchanged between anv two aircraft simultaneously operg on Victor 107 and Victor 25/27E when the acft do not have time for altitude separation. In this connection, pilots should note that Victor 107 was recentlv realigned from Coalinga - San Francisco to Coalinga - Oakland. (10-14)

SAN RAFAEL-HAMILTON AFB-RADIO: USAF VHF/DF unreliable 340° - 135° clockwise below 11,000'. (2-26)

MYRTLE BEACH-RADIO: VOR courses in Ocean sectors no fully flgt-checked. (10-8)

SUMTER ARPT: Const started on new school bldg lctd NW corner-not marked. (9-23)

SOUTH DAKOTA: **ABERDEEN-SAUNDERS ARPT: Rnwys rstd to acft 26,000 lbs or less.

EDGEMONT: Demolition opern in progress approx 10.8 n mi SSW of Blackhills Ordnance Depot lctd at lat 43-08-11, long. 103-55-36. Pilots are cautioned against flying over or near area at any alt due to possibility of encountering toxic gases.

HURON-HOWES ARPT: Rnwys 17-35 and 8-26 clsd to acft over 28,000 lbs xcpt portion of Rnwy 8-26 from intsxn E to taxi strip. Sod areas clsd xcpt 150' adj to rnwys inside of bndry lgts, usable for lgt acft at pilots discretion.

PHILIP ARPT, SITE 31, CYS-HON: 24' unlgtd p-line N from bcn to transmission line.

**PIERRE ARPT: Lngst rnwy & facs: h72-BL4, 6-S5-W. (10-11)

RAPID CITY-ELLSWORTH AFB-RADIO: USAF VHF/DF steers unreliable 165°-290° below 5500'; 290°-350°, below 6500'; 290°-300° on 121.5 mc at 50 n mi. (1-19)

SISSETON ARPT: Rotating beacon discontinued. (10-8)

YANKTON ARPT: New NE/SW Rnwy under const. (10-12)

TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt on Green Arwy #5 via Knoxville, is invited to the proximity of the W crs of Knoxville Rdo rng to the Atomic Energy Prohibited Area. Slight deviations to the N of crs this area often result in in-flgt identification and the filing of alleged violations against the pilot.

BRISTOL-TRI-CITY-RADIO: VOR has occasional course roughness within 22 n mi of stn. All courses usable at min alt. Courses 65° clockwise thru 85° displaced up to 2° beyond tolerance counterclockwise. Courses 130° clockwise thru 185° displaced up to 4° counter-clockwise in excess of allowable tolerance. (10-19-54)

TENNESSEE: ★BRISTOL-TRI-CITY ARPT-TOWER: ILS glide slope not usable MM to Fld. Sept 27, ILS glide slope shut down for approx 3 weeks - installation new equip. Effect. Oct 15, twr service will be avail. 24 hr basis.

CHATTANOOGA-RADIO: Aural signal similar to Daisy FM being rcvd 17 to 22 n mi NW of LF rng. (2-27)

CHATTANOOGA-LOVELL FLD-TOWER: June 17, combined stn/twr ctld from portable twr lctd approx 800' NE of midfield intsxn until approx Dec. 18 - modernization. FLD: Due to non-visibility twr unable to ctl taxiing tfc first 1400' apch end Rnwy 1. Rnwy lgts on low intensity only. Bcn inop - modernization of ctl twr. No lgt signal in opern to indicate restriction of VFR operns within control zone.

JACKSON-RADIO: VOR usable along Green Arwy #5 toward Nashville. Other courses have excessive roughness. DME coverage 120°-140°, 26 n mi; 140°-290°, 17 n mi; 290°-310°, 26 n mi; 310°-120°, 35 n mi at min en route alt. (6-21)

KNOXVILLF-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution - VOR has occasional momentary course disturbance in mountainous areas.

KNOXVILLF-McGHEE-TYSON ARPT-TOWER: ILS glide slope inop. FLD: N/S rnwy clsd ngts. (2-24)

MEMPHIS-RADIO: VOR coverage 200°-260°, 35 n mi at min en route alt. DME coverage 190°-200°, 35 n mi' 200°-230°, 26 n mi; 230°-260°, 35 n mi at min en route alt.

MEMPHIS ARPT-TOWER: Oct 4, ILS glide slope shut down for relctn to 2125' E of W end of E/W rnwy and 350' S of the centerline of E/W Rnwy. Lat 35-03-26, long. 89-58-42. ASR will continue to issue distance values in statute miles in connection radar control.

NASHVILLE-RADIO: VOR has slight course roughness between 70° and 120°. DME coverage 165°-270°, 35 n mi at min en route alt.

**NASHVILLE-BERRY FLD: 1179' lgtd TV twr erected 10 n mi NW (328° T) at lat 36-16-05, long. 86-47-18. (7-15)

SMITHVILLE-RADIO: LF rng has moderate to severe multiples all courses. (4-27)

TEXAS: ★ABILENE-RADIO: DME coverage 195°-215°, 35 n mi at 4000'. (6-21) Correct VOR lat 32-28-52, long. 94-01-40. (10-4)

ABILENE-(NEW) ARPT: 310' (2031' MSL) rdo twr erected 2.6 n mi W (273° T) at lat 32-25-44, long. 99-43-50. (10-10)

ALPINE-STARNS ARPT: 310' (5310' MSL) lgtd rdo twr erected 2.3 n mi SE (150° T) at lat 30-20-25, long 103-39-40. (10-6)

ALVIN ARPT: 1196' (1236' MSL) lgtd TV twr erected 2.2 n mi ENE (75° T) at lat 29-27-57, long. 95-13-24. (10-12)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas; Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo; Exell Helium Plant on S.F. RR about 30.3 n mi N.

★AMARILLO-RADIO: Correct VOR lat 35-17-15, long. 101-38-20. (10-4)

★AUSTIN-BERGSTROM AFB-RADIO: USAF VHF/DF opers cont; unreliable below 3000'. USAF UHF/DF on trng status. (6-14) USAF H fac cmsnd. Freq: 293 kc. Ident: CMK. Bear. and dist. to Fld: 350°, 5.5 n mi. Class: MHW. (10-13)

BIG BEND-RADIO: Use VOR radials 310°, 320°, 130°, 140° only. Severe bends and scalloping all other radials. (8-3)

BIG LAKE ARPT: W Strip and terminal bldg under const. (4-30)

BIG SPRING-RADIO: VOR radials 270°-340° moderate to severe bends. Caution advised. DME coverage 130°-190°, 35 n mi at 4000'.

BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.

BIG SPRING-WEBB AFB-RADIO: USAF VHF/DF unreliable below 6000' all quads.

BRADY-CURTISS ARPT: Caution - NW/SE Rnwy clsd-const. (1-28)

CHILDRESS-RADIO: VOR radials 10°-40° clockwise, moderate to severe bends.

COLLEGE STATION-RADIO: DME coverage 60°-90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (6-16)

CORPUS CHRISTI-CUDDIHY ARPT: All Rnwys very ruf in spots. Use at own risk. (9-27)

CORPUS CHRISTI NAS-RADIO: Use of S course Navy rng prohibited 0630-sunset Mon thru Sat xcpt durg IFR conditions.

CULBERSON-RADIO: DME coverage 250°-265°, 35 n mi at 7500'; 280°-340°, 35 n mi at 10,800'. (7-1)

DALLAS-LOVE FLD-TOWER: ILS lclzr and glide slope shut down until approx Nov. 15. ASR will continue to issue distance values in statute miles in connection with radar ctl.

** FLD: 1049' MSL twr erected on top of republic National Bank Bldg. (8-12) Exten const SE end Rnwy 13-31. Rnwy may be clsd short periods. SE end Rnwy and SE edges of adj taxiways pavement 2' higher than ground grade. Const - men and equip. on fld. Two ILS glide slope bldgs lctd 1000 and 2000 ft NW end Rnwy 13; 400' SW of center of rnwy, unlgtd. (6-2)

TEXAS:

DEL RIO-LAUGHLIN AFB-RADIO: USAF VHF/DF unreliable below 4000' at 50 n mi N and NE quads. (8-28) USAF H fac, aural null width over 5° at 50 n mi. (11-26)

EL PASO-RADIO: DME coverage 240°-265°, 35 n mi at 8500'; 265°-300°, 26 n mi at 10,000'.

EL PASO-BIGGS AFB-RADIO: USAF VHF/DF trng status only. (6-22)

EL PASO INTERNATIONAL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° take-off: following vertical separation in control zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Tfc make left hand apch to Rnwys 26, 22 and 17; rgt hand to Rnwys 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to Rnwy 03, Biggs Air Force Base. (3-17) Sept 1, neon apch lgtg on Rnwy 22 inoperative. Const NE end Rnwy 4-22 - length rnwy lmtd to 6900'. Men and equipment on fld daylight hours. (8-3)

FT. WORTH-RADIO: VOR radials 105°-120° have moderate to severe scalloping.

FT. WORTH-MEACHAM FLD: 1118' lgtd TV twr erected 6.9 n mi SE (128° T) at lat 32-45-01, long. 97-16-07. (7-6)

GULF OF MEXICO OFF MATAGORDO ISLAND: Air-to-ground gunnery dive bombing, rocket firing, horizontal bombing and firing at radio controlled targets between sunrise and sunset, within a circular area having a radius of 4.3 n mi centered at lat 28-17-00, long. 96-32-00.

★GUTHRIE-RADIO: Correct VOR lat 33-46-42, long. 100-20-09. (10-4)

HONDO: Intensive student instruction conducted during VFR conditions including aerobatics and dual instrument training between 5000' and 10,000' MSL. Area lctd W of San Antonio between Blue Arwy 30 and Red Arwy 32 described as follows: beginning at the town of Castroville direct to Tarpley; racnh road 470 to Utopia; direct to Leakey; U.S. Hwy 83 to Carrizo Springs; State Hwy 85 to Dilley; U.S. Hwy 81 to Natalia; ranch road thru Lacoste to Castroville.

HONDO ARPT: Clsd to all trans civilian acft xcpt on ofl bus. or upon permission from Director of Military Trng and Operns or civilian Director of Flying. 2-way radio rqrd.

HOUSTON: Demolition of high explosive ammunition daily, Mon thru Fri from 0730 to 1615 CST, approx 12.2 n mi E.

**HOUSTON INTERNATIONAL ARPT: 978' (1049' MSL) lgtd TV twr erected 11.3 n mi SW (247° T) at lat 29-34-25, long. 95-28-31. (9-1); Deep ruts in E shoulder of NW/SE Rnwy. Caution-aerial targets will be dropped between hrs 0800-1600 Sats and Suns. (9-17)

★JUNCTION-RADIO: Correct VOR lat 30-35-52, long. 99-49-02. (10-4)

KARNACK: Avoid flying over Longhorn Ordinance Plant approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700.

LUFKIN-RADIO: DME coverage 125°-145°, 43 n mi at 1500'; 145°-280°, 35 n mi at 1500'; 280°-305°, 35 n mi at 1700'; 305°-315°, 26 n mi at 1700'; 315°-335°, 35 n mi at 1700'; 335°-015°, 35 n mi at 2000'; 015°-060°, 35 n mi at 1700'; 060°-125°, 35 n mi at 1500'. (6-22)

McALLEN-MILLER ARPT: Rnwy 18 clsd for take-offs and landings - mrkd. (6-7)

MIDLAND ARPK: Use rnwys only - no lgts avail. (9-2) Mil student flying restricted from use of N/S Rnwy. (10-12)

MIDLAND AIR TERMINAL-TOWER: ILS glide slope shut down until approx Nov. 29. (10-18)

MINERAL WELLS-RADIO: DMF coverage 230°-260°, 35 n mi at 3000'; 350°-95°, 35 n mi at 2500'. (6-24)

PERRYTON ARPT: Bndry and Bcn lgts inop. (8-4)

POTEET ARPT: Closed - construction.

QUITMAN-RADIO: DME coverage 2300' MSL, 43 n mi all azimuths. (6-9)

REFUGIO-ROOKE FLD: All strips clsd xcpt E/W strip-usable at own risk. (10-30)

ROCKPORT-ARANSAS COUNTY ARPT: Caution-oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (4-23)

SALT FLAT-RADIO: DME coverage 45°-250°, 43 n mi at 9000'; 250°-290°, 43 n mi at 8500' 290°-015°, 43 n mi at 9000'; 015°-045°, 26 n mi at 10,800'. (6-23)

SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Trans & rcvg freq 132.3 mc inop. (9-17)
SEATTLE-RADIO: About Nov. 8, VOR will be shut down for indefinite period-modernization.
SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to Strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to theE at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat. W of fld at 1500'. (10-14)

WASHINGTON: SEATTLE-TACOMA ARPT-TOWER: ASR will continue to issue distance values in statute miles in connection with radar control. (10-12)

SHELTON-RADIO: LF rng on 371 kc has lmtd usable course dist as follows: S course 30 n mi, SW and N, 26 n mi each.

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 152°-224°, 43 n mi at 5000'; 224°-264°, 43 n mi at 6000'; 264°-36°, 43 n mi at 8000'. (6-17)

SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable 300°-70° at 6000'; 70°-90° at 9000'; 90°-140° at 11,000'; 140°-180° and 250°-300° at 12,000'.

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld. (12-19)

SPOKANE-GEIGER FLD-TOWER: Back course ILS lclzr usable 9 n mi with flyable bends. FLD: Caution--const on ramp N of control tower. Mil acft parked adj to taxiway between Rnwy 20 and control twr. Men and equip. working on appchs to Rnwy 2-20. (9-24)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.

WEST VIRGINIA: BECKLEY-RALEIGH CO. MEMORIAL ARPT: 4 unlgtd poles extending 25' above tree tops E end E/W Rnwy to S of centerline of apch. (5-31)

CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (3-16)

**CHARLESTON-KANAWHA COUNTY ARPT: 649' (1549'MSL) lgtd TV twr erected 4.5 n mi WNW (275°T) at lat 38-22-36; long. 81-42-04. (7-1)

ELKINS-RADIO: LF rng has multiples and fades all courses. DME coverage 35°-95°, 43 n mi at 6800'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)

ELKINS ARPT: Small hole 2' long, 2" deep approx 150 yards from Rnwy 31 on right side edge taxiway leading from ramp. (9-16)

**HUNTINGTON ARPT: 1069' (2049'MSL) lgtd WSAZ-TV twr erected 14 n mi ENE (62°T) at lat 38-30-34, long. 83-13-09. (10-8)

MARTINSBURG -RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'. (7-7)

MARTINSBURG ARPT: Glider flying - peak activity expected on week-ends and holidays. Serv fac avail 0800 until sunset. (9-6) Const 28' hangar 500' E of centerline and 1100' from S end Rnwy 35, lgtd. (9-24)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution-dip midway Rnwy 16-34 covering full width of rnwy. (5-4)

WISCONSIN: GRANTSBURG-RADIO: VOR has counterclockwise course errors up to .5° in excess of tolerance from azimuth angles 95°-125° and clockwise errors up to 1.5° in excess of tolerance at azimuth angles 220°-245°. (8-10)

JANESVILLE-RADIO: VOR courses rough all azimuths within 4 n mi of stn. (6-8)

**LONE ROCK ARPT SITE 16,CHI-TWIN CITIES: Bcn changed from 6 clear and 6 green fpm to 12 clear fpm red course lgts reactivated flashing code no. 6, dash dot dash. (10-11)

MADISON-TRUAX FLD-TOWER: Caution -twr rdo reception intermittently blocked out by jet acft run-ups. (6-16) FLD: E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Caution crossing hwy in lndg Rnwys 22, 26, 31. Sod unsafe. Due to non-visibility, twr unable to ctl tfc on first 1000' S end Rnwy 18-36 adj taxiway and all portions of civil and mil ramps. Equip on fld. Caution - lndg jet interceptor acft using tactical left hand over-head apchs at 2300' MSL. (3-30) Overrun lgts S end Rnwy 18-36 inop. (9-1)

MILWAUKEE-RADIO: VOR has moderate course roughness in area between 200° and 220°. DME coverage 190°-200°, 35 n mi at min en route alt. (6-11)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: VHF/DF recmsnd at combined stn/twr. Soon ASR will be cmsnd. (9-27) FLD: Rnwy 13-31 clsd. Rnwy 6-24 clsd 0700-1700.(8-10)

NEENAH-VALLEY ARPT: N/S strip clsd-golf driving range, roadway on end. (8-13)

OCONOMOWOC-PABST ARPT: Effect Jan 1, 1955 N/S strip (2000' x 200') will be discontd.

**RHINELANDER-ONEIDA COUNTY ARPT: Construction completed NW/SE now paved 3700' x 100'. Shoulders soft. Clearing of trees SW end in progress. (10-8)

SIREN-BURNETT COUNTY ARPT: All lgtg fac inop. (10-1)

WATERTOWN ARPT: NE/SW Strip clsd-const. (5-21)

WAUKESHA-COUNTY ARPT: Caution -E/W Strip closed, Sept. 26. (9-9)

WYOMING: CASPER-RADIO: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto. pilot apchs.

CHEYENNE ARPT: Clsd to transient jet acft except in emergencies.

GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S Strip soft-clsd to hvy acft.

WYOMING: LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'. (7-2)

LARAMIE-BREES FLD: Caution deer on fld. (6-29)

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'. (7-20)

ROCK SPRINGS ARPT: Caution-first 500' NW end NW/SE Rnwy clsd - mrkd.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area. (4-26)

(10-19-54)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator (FPDI) centered the omnibearing selector should read 0° with the to-from indication being "From" or the omnibearing selector should read 180° with the to-from indication read "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ± 4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of Oct. 19, 1954, check points or facilitites have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 112.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

(NOTE: ALL DISTANCES ARE IN STATUTE MILES.)

LOW FREQUENCY RANGE PROCEDURES

When an LFR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY FREQ. IDENT. PROCEDURE NO.	INITIAL APPROACH TO FACILITY FROM	CRS. AND DIST.	MIN. ALT.	PROCEDURE TURN: (SIDE OF FINAL APCH. CRS. GROUND CONTROLLED APPROACH SYSTEM PROCEDURES

When a GCA instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. From initial contact with GCA to final authorized landing minimums, the instructions of the GCA controller are mandatory except when (A) visual reference with the ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION GCA TRANSMITTING AND GUARDING FREQUENCIES	RADAR TERMINAL AREA MANEUVERING ALTITUDES BY SECTORS AND LIMITING DISTANCES	CEILING AND VISIBILITY MINIMUMS						EXCEPT WHEN THE GROUND CONTROLLER MAY DIRECT OTHERWISE PRIOR TO FINAL APPROACH A MISSED APPROACH PROCEDURE SHALL BE EXECUTED AS PROVIDED BELOW WHEN 'A' COMMUNICATION ON FINAL APPROACH IS LOST FOR MORE THAN FIVE SECONDS. ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic. (7-19) = Hours of operation, i.e., 0700-1900
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
■ Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 8, 1953

RADAR AVAILABLE : How and Where

(11-2-54)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway The final approach flight path on a precisionscope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Flight Information Manual.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below as well as in "Air Navigation Radio Aids" section under proper location.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When a receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion.
After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible
Civil Minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: This service to aircraft encountering severe weather condition may be obtained by requesting radar advisory through an appropriate ground station or direct ARTC communication. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY." All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas: Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles and the Knoxville Air Defense Identification Zone.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc and 3023.5 kc. Transmit and guard 121.5 mc all locations.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerour air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) .-.. --. -... (LGB in Code).

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciably higher rate of speed than the location identifier.

NAUTICAL MILES - STATUTE MILES: NEW DIMENSIONAL UNIT PROCEDURES: Among the various segments of the aviation industry there are many users of the airspace who desire to use nautical units for speed and distance measurements in their operations while others prefer the use of statute units. A plan designed to best serve the interests of all concerned has been developed and will be placed in effect on October 1, 1954. The plan generally provides that the pilots of all air carrier aircraft and all military aircraft shall use nautical units exclusively in all of their operations whether IFR or VFR. Private and business aircraft pilots, on the other hand, may use either nautical or statute units according to their preference.

Since uniformity is essential to the efficient operation of the Federal Airways System, all CAA facilities (communications stations, airport traffic control towers and air route traffic control centers) will use knots and nautical miles as the standard for all internal operations involving speed and distance values. Also, all normal radio transmissions of speed and distance values by these facilities will be in terms of knots and nautical miles with the exception of visibility which will continue to be reported and transmitted in statute miles. Any speed or distance value (except those associated with radar traffic control) will be converted from nautical to statute units by CAA facilities upon receipt of specific requests from pilots of private and business aircraft.

At the present time, surface wind velocity is reported in miles per hour. Beginning October 1, surface wind velocity will be reported in knots. Hence, when surface wind is reported as "west south west eight" it will be eight knots rather than eight miles per hour. This change need be of no great concern to the pilot, however, since, until a velocity of thirty miles per hour or more is reached, the difference between miles per hour and knots is so slight as to be insignificant for all practical purposes. In any case, if the pilot of a private or business aircraft wants the wind velocity in miles per hour, the CAA facility will convert it upon request.

When filing IFR flight plans and conducting IFR flight, distance and speed information submitted to CAA facilities by all pilots should, if possible, be in nautical units since the ground system will operate on the basis of nautical units. If statute units are used by the private or business aircraft pilot, they should be identified as such in each case; i.e., "airspeed 110 miles per hour". The CAA facility will then convert the value to knots for internal use.

(11-2-54)

CAR 60 CHANGE AFFECTS VERTICAL CLEARANCE OVER CLOUDS: Effective November 10, 1954, paragraph 60.30 of CAR 60 has been revised to require 1,000 feet vertical clearance over clouds, instead of the 500 feet now required. Pilots filing IFR flight plans for on-top operation should specify "1000 on-top". Air traffic clearance phraseology will also be revised to specify "at least 1000 on-top" when clearing flights to operate on-top. There is no change in the cloud clearance requirement for flight below clouds.

PRIVATE AIRCRAFT-TO-TOWER FREQUENCIES: Due to severe congestion on the frequency 122.5 mc in the New York City, Chicago and Los Angeles areas, it has become necessary to implement the frequency 122.7 mc at the New York (LaGuardia), Chicago (Midway), and Los Angeles (International) airport towers. Effective 0001 Local Standard Time, December 1, 1954, a guard on the frequency 122.7 mc will be established and simultaneously the guard on 122.5 mc will be discontinued at these three towers. Pilots of private aircraft intending to land at New York (LaGuardia), Chicago (Midway) or Los Angeles (International) airports should be equipped to transmit on 122.7 mc. The emergency frequency 121.5 mc may be used temporarily to call these towers in the event it is not possible to obtain 122.7 mc by December 1.

AIRSPACE WARNING AREA DEFINITION: "An Airspace Warning Area is an area located more than three nautical miles beyond the shoreline of the United States (including its territories and possessions and territorial waters) in which an invisible hazard to aircraft in flight exists. It, normally, is shown on aeronautical charts and published in NOTAMS and ATANS." All pilots are reminded and cautioned that the activities conducted in Danger Areas and Airspace Warning Areas are identical. This information is issued by the Airspace Subcommittee of the Air Coordinating Committee to point out the risks being run by pilots when their aircraft transgress Airspace Warning Areas.

AIR ROUTE TRAFFIC CONTROL BOUNDARY: Effective immediately the following ARTC boundary is established:

(1) The Washington and Jacksonville ARTC Centers on control area extension number 1150 at a point 25 miles southwest of the Wilmington, North Carolina, VAR radio range statior

---

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS - The following abbreviations have been adopted for use in the Airman's Guide: "n miles" or "n mi" for nautical miles; "s miles" or "s mi" for statute miles.

SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Entry into and maneuvering within these patterns should be made at speeds within this tolerance as buffer zones have been provided only for these speeds. It is recommended that all aircraft adhere closely to these restrictions and if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

INSTRUMENT APPROACH PROCEDURES TO BE SOLD ON SPECIAL SUBSCRIPTION BASIS: Because of a demand for instrument approach information prior to publication in the Airman's Guide or Federal Register, the CAA has made arrangements for the issuance and distribution of individual copies of these procedures on a subscription basis to be delivered once each week. The annual subscription rate has been set at $125.00 per year. For each additional copy mailed to the same address, the annual subscription price will be $25.00. Checks should be made payable to the Treasurer of the United States and mailed to: Sales and Distribution Division, Room 6227, Commerce Department, Washington 25, D.C.

IFR FLIGHTS ABOVE TWENTY-NINE THOUSAND FEET: Effective November 1, 1954, the odd-thousand foot altitude levels will be used for IFR flights above 29,000 feet unless prior coordination has been effected with air traffic control. This method of altitude assignment, adopted in conjunction with the military request for two thousand feet altitude separation for all flights at or above 30,000 feet, is designed to permit a more orderly and expeditious flow of air traffic within the airspace affected.

TEMPORARY AIRSPACE RESERVATIONS FOR ATLANTIC FLEET EXERCISES: The following temporary airspace reservations will be established as follows:

(1) 140001Z November to 192400Z November. From 39N 73W along the inner boundaries of the New York and Miami OAC to 28N 78W to 28N 65W to 39N 65W to origin. Sea level to 6,000 and 23,000 to 40,000, excluding that area within a 100 nautical mile radius of Bermuda.

(2) Special Notice exercise area within 100 nautical mile radius of 34-31-50N, 77-20W exclusive of airways and the area west of Civil Airway Amber 9 120401Z to 130400Z November and 140401Z to 210400Z November. Bogue Sound-Onslow Beach with air intercept simulated bombing and strafing from sea level to 35,000 feet. Hazardous to non-participating aircraft.

(3) Special Notice exercise area 140001Z November to 190500Z November. Air intercept, simulated bombing and strafing from sea level to 35,000 feet within the following area: From 32N 71W to 36-30N 74-30W to 34-20N 77-20W to 32-30N 78W to 29N 74W to origin. Hazardous to non-participating aircraft.

(4) From 100501Z to 190500Z November; 200401Z to 210400Z November. From a point on the east coast of North Carolina at 36-20N to 36-20N 74-17W to 37-40N 74-17W thence west to coast line and along the coast to the point of origin. Sea level to 5,000 inclusive.

(5) From 100500Z to 110500Z November; 190500Z to 210500Z November. From a point 41N 70W to 40N 70Wto 40N 72W to southern boundary control area extension 1169 thence along that boundary to 41-08N 70-24W thence to point of origin. Seal level to 4,000 feet.

(6) 090500Z to 160500Z November. From a point 43N 65W to 40-43N 69-12W latitude and longitude, thence to South Island reporting point, thence to Cape May, thence along coast line to a point on the North Carolina coast at 34-40N 77W, to 33N 77W, to 34N 73W, to 40N 65W, thence to point of origin. Seal level to 4,000 feet except control area extension surface to 2,000 feet inclusive.

(7) 250500Z October to 090500Z November. A point on the North Carolina coast 79W to 32N 79W, to 32N 76W to 34N 74W to 37-40N 74W, thence west to coast line, thence along the coast to point of origin. Sea level to 4,000 except in control area extensions, surface to 2,000.

DANGER AREA AMENDMENTS: The following Danger Area Amendments shall be effective as dated, unless otherwise advised:

AMENDMENT NO. 96 to PART 608 DANGER AREAS
(November 13, 1954)

(1) In Section 608.18, the Pinecastle, Florida, area (D-165), published on July 16, 1949, in 14 F.R. 4289, is amended by changing the "Designated Altitudes" column to read: "Surface to unlimited."

(2) In Section 608.18, the Pinecastle, Florida, area (D-340), published on July 16, 1949, in 14 F.R. 4289 is amended by changing the "Designated Altitudes" column to read: "Surface to unlimited."

(3) In Section 608.18, the Pensacola, Florida, area (D-152), published on July 16, 1949, in 14 F.R. 4289, is rescinded.

(4) In Section 608.18, the Pensacola, Florida, area (D-153), published on July 16, 1949, in 14 F.R. 4289, and amended on August 27, 1954 in 19 F.R. 5470, is further amended by changing the "Description by Geographical Coordinates" column to read: "North boundary: Florida-Alabama coastline; South boundary: A line 3 nautical miles south of and parallel to the Florida-Alabama coastline. East boundary: A line 4.3 nautical miles west of the south course of Pensacola L/F Radio Range. West boundary: Longitude 88°01'30", and including the area within 1.7 nautical miles of the following points. (a) Latitude 30°16'48", longitude 87°32'10" (b) Latitude 30°17'47", longitude 87°27'28" (c) Latitude 30°18'54", longitude 87°21'26"."

AMENDMENT NO. 97 to PART 608 DANGER AREAS
(November 13, 1954)

(1) In Section 608.51, the Fort Hood, Texas, area (D-443), published on August 26, 1953, in 18 F.R. 5077 is rescinded.

(2) In Section 608.51, the Camp Bowie, Texas, area (D-480) is added to read: Name: Camp Bowie, Texas; Description: Beginning at latitude 31°36', longitude 98°57'; thence to latitude 31°41', longitude 98°57'; thence to latitude 31°41', longitude 98° 53'; thence to latitude 31°26', longitude 98°53', thence to point of beginning. Altitudes: Surface to unlimited; Time of Designation: Daylight hours, during VFR weather conditions only; Using Agency: NAS Dallas, Texas.

(3) In Section 608.51, the Fort Hood, Texas, area (D-219), published on June 23, 1949, in 14 F.R. 3393, and revised on August 7, 1951 in 16 F.R. 7696, and amended on June 14, 1952 in 17 F.R. 5389, is redesignated as follows: Name: Fort Hood, Texas; Description: Beginning at latitude 31°22'30"N, longitude 97°38'00"W; thence due south to latitude 31°18'00"N, longitude 97°38'00"W; thence southeasterly to latitude 31°13'40"N, longitude 97°30'00"W; thence southwesterly paralleling the western boundary of airway Victor 17 to the point at latitude 31°04'15"N, longitude 97°33'30"W; thence northwesterly to a point at latitude 31°08' 00"N, longitude 97°38'00"W; thence west to a point at latitude 31°08'00"N, longitude 97°41' 00"W; thence southwesterly to latitude 31°05'14"N, longitude 97°45'00"W; thence due north

to latitude 31°08'00"N, longitude 97°45'00"; west to latitude 31°08'00"N, longitude 97°46'12"W; northwest to latitude 31°09'30", longitude 97°47'18"W; thence meandering northwest and remaining 100 yards west of West Range Road to a point at latitude 31°11'36", longitude 97°48'30"W; northwest to latitude 31°18'00"N, longitude 97°52'18" east to latitude 31°18'00"N, longitude 97°50'00"W; northeast to latitude 31°22'30", longitude 97°44'20"W; thence due east to latitude 31°22'30"N, longitude 97°38'00"W; to point of beginning. Altitude: Surface to unlimited. Time: Continuous. Using Agency: Fort Hood, Texas.

(4) In Section 608.51, the Gray AFB, Texas, area (D-343), published on August 7, 1951 in 16 F.R. 7696, is redesignated as follows: Name: Gray AFB, Texas; Description: Beginning at latitude 31°18'00"N, longitude 97°52'18"W; SE to latitude 31°11'36"N, longitude 97°48'30"W, meandering SW and remaining 100 yards west of West Range Road to a point at latitude 31°09'30"N, longitude 97°47'18"W; SE to latitude 31°08'00"N, longitude 97°46'12"W east to latitude 31°08' 00"N, longitude 97°45'00"W; due south to latitude 31°02'00"N; due east to longitude 97°38'00"W; due south to latitude 30°56'00"N; west to longitude 98°00'00"W; due north to latitude 31°18'00"N; due east to latitude 31°18'00", longitude 97°52'18"W point of beginning. Altitude: Surface to unlimited. Time: Continuous. Using Agency: Gray AFB, Texas.

✓ LOCATION IDENTIFIERS: The following changes affect the use of location identifiers:

HHH	Prairie Hill, Texas, Radiobeacon (Change from Chapel Hill REP)
MBS	Saginaw, Mich., Tri-City Airport (Change from SGW on Nov. 15)
MLV	Mulvane, Kansas., Radiobeacon (Assignment)
MTO	Mattoon, Illinois, Coles County Memorial Airport (Assignment)
MWA	Marion, Illinois, Williamson County Airport (Assignment)
OGA	Canoga Park, Calif., Radiobeacon (Change from REP CWK)
BV	Bagotville, P.Q. (RCAF Inner Beacon) (Deletion)
EV	Estevan Islands, B.C. (Assignment)
NZ	St. Nazaire de Chicoutimi, P.Q. (Deletion)
VD	Val D'Or, P.Q. (RCAF Inner Beacon) (Change from Outer Beacon)
VL	Val D'Or, P.Q. (RCAF Outer Beacon) (Change from Inner Beacon)

✓ MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows effective November 23, 1954.

From	To	Min. Alt.
(1) Green Civil Airway No. 5, is amended to read in part:		
Big Spring, Texas. (LFR)	Colorado City (Int), Texas	4,000
Colorado City (Int), Texas	Abilene, Texas (LFR)	3,600
Fort Worth, Texas (LFR)	Bedford (Int), Texas	1,900
Bedford (Int), Texas	Farmers Branch (Int), Texas	2,200
Farmers Branch (Int), Texas	Greenville (Int), Texas	1,900
(2) Green Civil Airway No. 6, is amended to read in part:		
Laredo, Texas (LFR)	Alice, Texas (LFR)	1,900
Alice, Texas. (LFR)	Corpus Christi, Texas (LFR)	1,600
(3) Amber Civil Airway No. 4, is amended to read in part:		
Brownsville, Texas (LFR)	Kingsville (Int), Texas	1,300
Kingsville (Int), Texas	Alice, Texas (LFR)	1,400
San Antonio, Texas (LFR)	Cibolo Creek (Int), Texas	2,400
Cibolo Creek (Int), Texas	Austin, Texas (LFR)	2,600
(4) Amber Civil Airway No. 7, is amended to read in part:		
Vero Beach, Fla. (LF/Rbn)	Melbourne, Fla. (LFR)	1,300
(5) Red Civil Airway No. 10, is amended to read in part:		
Wichita Falls, Texas (LFR)	Alvord (Int), Texas	2,300
Alvord (Int), Texas	Justin (Int), Texas	2,100
Justin (Int), Texas	Dallas, Texas (LFR)	2,200
(6) Red Civil Airway No. 15, is amended by adding:		
Fallon, Nev. (LFR)	Desert Peak (Int), Nev.	10,000
(7) Red Civil Airway No. 31, is amended to read in part:		
Rapid City, S. Dak. (LFR)	Pierre, S. Dak. (LFR)	4,400
(8) Red Civil Airway No. 47, is amended to read in part:		
Tampa, Fla. (LFR)	Orlando, Fla. (LFR)	1,700
(9) Red Civil Airway No. 68, is amended to read in part:		
Hensley (Int), Texas	Dallas, Texas (LFR)	1,900
(10) Red Civil Airway No. 96, is amended to read in part:		
Arcola (Int), Texas	Houston, Texas (LFR)	1,400
Beaumont, Texas (LFR)	Lake Charles, La. (LFR)	1,500
(11) Blue Civil Airway No. 2, is amended by adding:		
Int. SE crs Craig AFB, Ala. (LFR) & N crs. Crestview, Fla. (LFR)	Greenville (Int), Ala.	1,500
(12) Blue Civil Airway No. 5, is amended to read in part:		
Dallas, Texas (LFR)	Farmers Branch (Int), Texas	1,800
(13) Blue Civil Airway No. 15, is amended to read in part:		
Akron, Ohio (ILS/LOM)	Alliance (Int), Ohio	2,500
(14) Blue Civil Airway No. 30, is amended to read in part:		
Kingsville (Int), Texas	Corpus Christi, Texas (LFR)	1,300
Corpus Chirsti, Texas (LFR)	Clareville (Int), Texas	1,400
Clareville (Int), Texas	Losoya (Int), Texas	1,700
Losoya (Int), Texas	Kelly, Texas (LFR)	2,000
Kelly, Texas (LFR)	Medina (Int), Texas	2,700
Medina (Int), Texas	C. B. Ranch (Int), Texas	3,500
C. B. Ranch (Int), Texas	Big Springs, Texas (LFR)	4,000
(15) Blue Civil Airway No. 38, is amended to delete:		
Banks (Int), Canada	Annette Island, Alaska (LFR)	2,800
*Annette Island, Alaska (LFR)	Petersburg, Alaska (LFR)	5,700
*5,000' - Minimum crossing altitude at Annette Island (LFR), NW-bound		
(16) Blue Civil Airway No. 44, is amended to delete:		
Advance, Mo. (LFR)	Paducah, Ky. (LF/Rbn)	1,700
(17) Blue Civil Airway No. 70, is amended to read in part:		
Ardmore, Okla. (LF/Rbn)	Okemah (Int), Okla.	2,700
Okemah (Int), Okla.	Tulsa, Okla. (LFR)	2,400
(18) Blue Civil Airway No. 79, is amended by adding:		
Banks (Int), Canada	Annette Island, Alaska (LFR)	2,800
*Annette Island, Alaska (LFR)	Petersburg, Alaska (LFR)	5,700
*5,000' - Minimum crossing altitude at Annette Island (LFR), NW-bound		
(19) Direct Routes-United States, is amended by adding:		
Culberson, Texas (VOR)	Gore (Int), Texas	6,300
Carlsbad, N. Mex. (VOR)	Gore (Int), Texas	6,000
(20) VOR Civil Airway No. 2, is amended to read in part:		
Dickinson, N. Dak. (VOR) Direct or N alter.	Bismarck, N. Dak. (VOR) Direct or N alter.	4,000
(21) VOR Civil Airway No. 3, is amended to read in part:		
Parkton (Int), Md.	West Chester, Pa. (VOR)	2,000
West Chester, Pa. (VOR)	Caldwell, N. J. (VOR)	2,000
Caldwell, N.J. (VOR)	Wilton, Conn. (VOR)	2,000
(22) VOR Civil Airway No. 5, is amended by adding:		
Nashville, Tenn. (VOR)	Chattanooga, Tenn. (VOR)	4,000
(23) VOR Civil Airway No. 8, is amended to read in part:		
Pittsburgh, Pa (VOR)	*Mt. Pleasant (Int), Pa.	3,000
*4,000' - Minimum crossing altitude at Mt. Pleasant (Int), E-bound		
Mt. Pleasant (Int), Pa.	Flint Stone (Int), Md.	4,500
Flint Stone (Int), Md.	Martinsburg, W. Va. (VOR)	4,000
(24) VOR Civil Airway No. 14, is amended to read in part:		
Tulsa, Okla. (VOR)	*Chelsea (Int), Okla.	2,200
*Chelsea (Int), Okla.	Neosho, Mo. (VOR)	2,200
*3,600' - Minimum reception altitude		
(25) VOR Civil Airway No. 16, is amended to read in part:		
Memphis, Tenn. (VOR)	*Fisherville, (Int), Tenn.	2,000
*Fisherville, (Int), Tenn.	Jackson, Tenn. (VOR)	2,000
*2,500' - Minimum reception altitude		
(26) VOR Civil Airway No. 17, is amended to read in part:		
San Antonio, Texas (VOR) Via W alter.	*Spring Branch (Int), Texas Via W alter.	**3,000
*3,000' - Minimum reception altitude		
**2,600' - Minimum terrain clearance altitude		
Waco, Texas (VOR) Via W alter.	Fort Worth, Texas (VOR) Via W alter.	*2,300
*2,000' - Minimum terrain clearance altitude		
Waco, Texas (VOR)	Fort Worth, Texas (VOR)	2,000
(27) VOR Civil Airway No. 20, is amended to read in part:		
Palacios, Texas (VOR)	Houston, Texas (VOR)	2,000
Lake Charles, La. (VOR)	Lafayette, La. (VOR)	1,500
(28) VOR Civil Airway No. 30, is amended to read in part:		
Idlewild, N. Y. (VOR)	Patchogue (Int), N.Y.	*2,000
*1,500' - Minimum terrain clearance altitude		
Patchogue, (Int), N.Y.	Mastic (Int), N.Y.	*4,000
*1,500' - Minimum terrain clearance altitude		(11-2-54)

From	To	Min Alt.
(29) VOR Civil Airway No. 35, is amended to read in part:		
Pittsburgh, Pa. (VOR)	*New Alexandria (Int), Pa.	3,000
*4,000' - Minimum crossing altitude at New Alexandria (Int), E-bound		
New Alexandria (Int), Pa.	Philipsburg, Pa. (VOR)	4,000
(30)VOR Civil Airway No. 40, is amended to read in part:		
Detroit, Mich. (VOR)	South Bass (Int), Ohio	2,300
South Bass (Int), Ohio	Marblehead (Int), Ohio	3,000
Marblehead (Int), Ohio	Bay (Int), Ohio	*2,500
*2,000' - Minimum terrain clearance altitude		
Bay (Int), Ohio	Peru (Int), Ohio	2,000
Peru (Int), Ohio	Wellington, Ohio (VAR)	2,000
(31) VOR Civil Airway No. 42, is amended to read in part:		
Cleveland, Ohio (VOR)	Falls (Int), Ohio	2,600
Falls (Int), Ohio	Atwater (Int), Ohio	2,500
Atwater (Int), Ohio	Sebring (Int), Ohio	3,700
Sebring, (Int), Ohio	Pittsburgh, Pa. (VOR)	2,600
(32) VOR Civil Airway No. 51, is amended by adding:		
Birmingham, Ala. (VOR)	Chattanooga, Tenn. (VOR)	4,000
(33) VOR Civil Airway No. 54, is amended to read in part:		
Little Rock, Ark. (VOR) Via N alter.	*Colt (Int), Ark. Via N alter.	2,500
*Colt (Int), Ark. Via N alter.	Memphis, Tenn. (VOR) Via N alter.	2,500
*2,800' - Minimum reception altitude		
Little Rock, Ark, (VOR)	Memphis, Tenn. (VOR)	2,500
(34) VOR Civil Airway No. 57, is amended by adding:		
Birmingham, Ala. (VOR)	Muscle Shoals, Ala. (VOR)	2,500
(35) VOR Civil Airway No. 58, is amended to read in part:		
Pittsburgh, Pa. (VOR)	*New Alexandria (Int), Pa.	3,000
*4,000' - Minimum crossing altitude at New Alexandria (Int), E bound		
New Alexandria (Int), Pa.	Philipsburg, Pa. (VOR)	4,000
(36) VOR Civil Airway No. 66, is amended to read in part:		
Culberson, Texas (VOR)	Arno (Int), Texas	6,300
Arno (Int), Texas	Monahans (Int), Texas	8,000
Monahans (Int), Texas	Midland, Texas. (VOR)	*5,000
*4,300' - Minimum terrain clearance altitude		
(37) VOR Civil Airway No. 70, is amended to read:		
Palcios, Texas (VOR)	Galveston, Texas (VOR)	*1,500
*1,400' - Minimum terrain clearance altitude		
Galveston, Texas (VOR)	Water Way (Int), Texas	*3,000
*1,400' - Minimum terrain clearance altitude		
(38) VOR Civil Airway No. 81, is amended to read in part:		
Midland, Texas. (VOR)	Mustang (Int), Texas	4,200
Mustang (Int), Texas	Lubbock, Texas (VOR)	5,100
(39) VOR Civil Airway No. 89, is amended to read in part:		
Cheyenne, Wyo. (VOR) Via E alter.	Scottsbluff (Int), Nebr. Via E alter.	7,300
Scottsbluff (Int), Nebr. Via E alter.	Chadron, Nebr. (VOR) Via E alter.	6,500
(40) VOR Civil Airway No. 93, is amended to read in part:		
Baltimore, Md. (VOR)	Parkton (Int), Md.	2,000
Parkton (Int), Md.	Lancaster (Int), Md.	*3,000
*2,000' - Minimum terrain clearance altitude		
(41) VOR Civil Airway No. 94, is amended to read in part:		
*Salt Flat, Texas (VOR)	Carlsbad, N. Mex. (VOR)	10,800
*9,800' - Minimum crossing altitude at Salt Flat (VOR), NE-bound		
(42) VOR Civil Airway No. 152, is amended to read in part:		
Tampa, Fla. (VOR)	Orlando, Fla. (VOR)	1,700
Tampa, Fla. (VOR) Via N alter.	Dade (Int), Fla. Via N alter	1,600
Dade (Int), Fla. Via N alter.	Orlando, Fla. (VOR) Via N alter.	1,700
(43) VOR Civil Airway No. 162 is amended to read in part:		
Harrisburg, Pa. (VOR)	Int. Harrisburg, Pa. (VOR) 093° rad. & West Chester, Pa. (VOR) 313° rad.	2,500
Int. Harrisburg, Pa. (VOR) 093° rad. & West Chester, Pa. (VOR) 313° rad.	Wernersville (Int), Pa.	*4,500
*2,500' - Minimum terrain clearance altitude		

From	To	Min Alt.
(44) VOR Civil Airway No. 163, is amended to read in part:		
Waco, Texas (VOR)	Morgan (Int), Texas	*2,300
*2,000' - Minimum terrain clearance altitude		
Morgan (Int), Texas	Mineral Wells, Texas (VOR)	2,300
Mineral Wells, Texas (VOR)	Boonsville, (Int), Texas	2,500
Boonsville (Int), Texas	Ardmore, Okla. (VOR)	2,600
(45) VOR Civil Airway No. 169, is added to read:		
Sidney, Nebr. (VOR)	Scottsbluff (Int), Nebr.	5,800
Scottsbluff (Int), Nebr.	Chadron, Nebr. (VOR)	6,500
Chadron, Nebr. (VOR) Direct or E alter.	Rapid City, S. Dak. (VOR) Direct or E alter.	5,600

✓ NON-STANDARD HOLDING PATTERNS: Effective immediately the following non-standard holding pattern is established

(1) McChord LFR - direction of holding point - N; direction of turn - LEFT on E side of N course McChord AFB; time - one minute. Min. Alt. 2000'.

✓ ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are established or cancelled as indicated:

ESTABLISH

(1) RED HOOK INTERSECTION - intersection of Poughkeepsie, New York, LFR north course with Poughkeepsie VOR 329° magnetic radial.

(2) WEST POINT INTERSECTION - intersection of Poughkeepsie, New York LFR south course with a 304 magnetic bearing (based on 11° magnetic variation) to Stewart, New York, "MH" facility.

(3) CLIFFORD LAKE INTERSECTION - intersection of Princeton, Maine VOR 200° magnetic radial with St. John, New Brunswick, LFR southwest course on V50.

(4) AVON INTERSECTION - intersection south course of Madison, Wisconsin (LFR) and Northwest course of Rockford, Illinois (LFR).

(5) CONWAY INTERSECTION - which is formed by the east leg of the Amarillo LF range and the northwest leg of the Clarendon LF range.

(6) LANESVILLE INTERSECTION - intersection south course Indianapolis, Indiana (LFR) and west course Louisville, Kentucky (LFR).

(7) KECHI INTERSECTION - intersection of the Wichita, Kansas, VOR 065° magnetic radial and the back course of the Wichita, Kansas, ILS localizer.

(8) CLIVE INTERSECTION - intersection of the Des Moines, Iowa VOR 333° magnetic radial and the back course of the Des Moines, Iowa, ILS localizer.

(9) BOWERSTOWN INTERSECTION - intersection Wheeling VOR direct radial to Mansfield VOR with 054° magnetic bearing to Bergholz "MH" facility.

(10) SUGAR CREEK INTERSECTION - intersection Mansfield VOR direct radial to Wheeling VOR with Akron, Ohio LFR south course.

(11) LOCK HAVEN INTERSECTION - intersection Bradford VOR en route radial to Selinsgrove VOR with Philipsburg VOR en route radial to Elmira VOR on V35.

(12) MILL HALL INTERSECTION - intersection Selinsgrove VOR direct radial to Bradford VOR with Philipsburg VOR en route radial to Williamsport on V58.

(13) REINHOLDS INTERSECTION - intersection West Chester VOR direct radial to Selinsgrove VOR with Allentown VOR direct radial to Lancaster on V39.

(14) IDRIA INTERSECTION (VHF) - intersection of the 336° radial magnetic of the Paso Robles, Calif., VOR and the272° magnetic radial of the Coalinga, Calif., VOR.

(15) HOLLISTER INTERSECTION (VHF) - intersection of the 032° radial magnetic of the Salinas, Calif., VOR and the 124° radial magnetic of the San Francisco, Calif., VOR.

(16) LARRY INTERSECTION (VHF) - intersection of the Oakland, Calif., omnirng 113° magnetic and the San Francisco, Calif., omnirange 94° magnetic radial.

(17) WADSWORTH INTERSECTION (L/MF) - intersection of the northwest course of the Fallon, Nevada, LFR and the north east course of the Reno, Nevada LFR.

CANCEL

(1) HOLLISTER INTERSECTION - 124° magnetic San Francisco, 185° magnetic Modesto.

(2) DEDHAM INTERSECTION - intersection Gardner, Mass., VOR 128° magnetic with Boston VOR 238° magnetic radials.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 8, dated May 25, 1954, as follows:

(1) Page 22 - under Georgia, change Augusta CAA telephone number to read: Augusta 3-4191

(2) Page 23 - under North Carolina, change Greensboro CAA telephone number to: 3-1313.

CIVIL AIRWAYS, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective November 23, 1954, unless otherwise advised the following civil airways, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) VOR civil airway No. 3 (Key West, Fla., to Bangor, Maine) is amended by changing all after the West Chester, Pa., omnirange station to read: "West Chester, Pa., omnirange station; intersection of the West Chester omnirange 051° true and the Caldwell omnirange 217° true radials; Caldwell, N. J., omnirange station; Wilton, Conn., omnirange station; Hartford, Conn., omnirange station; intersection of the Hartford omnirange 044° true and the Boston omnirange 257° true radials; Boston, Mass., omnirange station; Kennebunk, Maine, omnirange station; Augusta, Me., omnirange station, to the Bangor, Me., omnirange station."

(2) VOR civil airway No. 8 (Long Beach, Calif., to Washington, D.C.) is amended to read: "From the point of intersection of the Long Beach omnirange 247° true radial and the south course of the Los Angeles, Calif., VAR station via the Long Beach,Calif., omnirange station; Ontario, Calif., omnirange station; Daggett, Calif.,omnirange station; Las Vegas, Nev. omnirange station; Morman Mesa, Nev.,omnirange station; Bryce Canyon, Utah, omnirange station Hanksville, Utah omnirange station; Grand Junction, Colo., omnirange station; Kermmling, Colo.,omnirange station; Denver,Colo., omnirange station,including a north alternate; Akron, Colo.,omnirange station,including a north alternate and also a south alternate via the intersection of the Denver omnirange 101° true and the Akron omnirange 242° true radials; Imperial, Nebr., omnirange station, including a south alternate via the intersection of the Akron omnirange 090°true and the Imperial omnirange 237° true radials; Grand Island, Nebr omnirange station,including a south alternate; Omaha, Nebr.,omnirange station,including a north and a south alternate; Des Moines,Iowa, omnirange station, including a south alternate; Iowa City,Iowa, omnirange station, including a south alternate via the intersection of the Des Moines omnirange 112° true and the Iowa City omnirange 252° true radials;Moline, Ill., omnirange station, including a south alternate and also a north alternate from the Des Moines omnirange station to the Moline omnirange station via the intersection of the Des Moines omnirange 071° true and the Moline omnirange 279° true radials; Naperville, Ill., omnirange station,including a north alternate; South Bend, Ind., omnirange station;Goshen, Ind., omnirange station; Findlay, Ohio, omnirange station; Mansfield,Ohio omnirange station, including a north alternate; the intersection of the Mansfield omnirange 100° true and the Pittsburgh omnirange 291° true radials;Pittsburgh,Pa., omnirange station; Martinsburg, W.Va., omnirange station to the point of intersection of the Martinsburg omnirange 123° true and the Washington, D.C.,terminal omnirange 319° true radials."

(3) VOR civil airway No. 36 (Buffalo, N.Y., to New York, N.Y.) is amended by deleting the portion which reads, "the Wilton, Conn., omnirange 233° true radials." and by substituting the following portion in lieu thereof: "the Wilton, Conn., omnirange 241° true radials."

(4) VOR civil airway No. 67 (Waterloo, Iowa to Rochester, Minn.) is amended to read: "From the Waterloo, Iowa, omnirange station via the Mason City, Iowa, omnirange station to the Rochester, Minn., omnirange, including a west alternate."

(5) VOR civil airway No. 71 (Pine Bluff, Ark., to Kansas City, Mo.) is amended by changing the last portion to read: "From the Flippin, Ark., omnirange station via the Springfield, Mo., omnirange station; Butler, Mo., omnirange station, including an east alternate and also a west alternate via the intersection of the Springfield omnirange 301° true and the Butler omnirange 178° true radials; to the Kansas City, Mo., omnirange station, including an east alternate."

(6) VOR civil airway No. 92 (Toledo, Ohio to Wheeling, W. Va.) is amended to read: "From the Waterville,. Ohio, omnirange station via the Mansfield, Ohio, omnirange station to the Wheeling, W. Va., omnirange station."

(7) VOR civil airway No. 116 (Kansas City, Mo., to New York, N.Y.), is amened by deleting the portion which reads: "the Wilton, Conn., omnirange 233° true radials" and by substituting the following portion in lieu thereof: "theWilton, Conn., omnirange 241° true radials."

(8) VOR civil airway No. 158 (Iowa Falls, Iowa to Waterloo, Iowa) is added to read: "From the point of intersection of the Mason City, Iowa, omnirange 188° true and the Waterloo omnirange 267° true radials to the Waterloo, Iowa, omnirange station."

(9) VOR civil airway No. 161 (Des Moines, Iowa to Minneapolis, Minn.) is amended to read: "From the Des Moines, Iowa, omnirange station via the Waterloo, Iowa, omnirange station; Rochester, Minn., omnirange station; intersection of the Rochester omnirange 350° true radial and the Minneapolis-St. Paul International Airport ILS localizer 121° true course to the Minneapolis- St. Paul, Minn., International Airport ILS localizer."

(10) VOR civil airway No. 170 (Erie, Pa., to Philadelphia, Pa.) is added to read; "From the Erie, Pa., omnirange station via the Bradford, Pa., omnirange station; Selinsgrove, Pa., omnirange station to the West Chester, Pa., omnirange station."

CONTROL AREAS (1) VOR civil airway No. 67 (Waterloo, Iowa to Rochester, Minn) is amended to read: "All of VOR civil airway No. 67 including a west alternate."

(2) VOR civil airway No. 71 (Pine Bluff, Ark., to Kansas City, Mo.) is amended to read: "All of VOR civil airway No. 71 including east alternates and a west alternate."

(3) VOR civil airway No. 92 (Toledo, Ohio, to Wheeling, W.Va.) is amended to read: "All of VOR civil airway No. 92."

(4) VOR civil airway No. 158, (Iowa Falls, Iowa to Waterloo, Iowa) is added to read: "All of VOR civil airway No. 158."

(5) VOR civil airway No. 161 (Des Moines, Iowa to Minneapolis, Minn.) is amended to read: "All of VOR civil airway No. 161."

(6) VOR civil airway No. 170 (Erie, Pa., to Philadelphia, Pa.) is added to read: "All of VOR civil airway No. 170."

CONTROL AREA EXTENSIONS: (1) (Chicopee Falls, Mass.) is amended to read: "That airspace east of Chicopee Falls bounded on the northwest by Red civil airway No. 33, on the northeast by VOR civil airway No. 151 and the Worcester, Mass., control zone, on the southeast by Amber civil airway No. 7 and on the southwest by Green civil airway No. 2 excluding the airspace below 2500 feet MSL; that airspace north of Chicopee Falls bounded on the west by Blue civil airway No. 41, on the north by VOR civil airway No. 2 and on the southeast by VOR civil airway No. 39 that airspace northwest of Chicopee Falls lying within an arc of 38 statute miles centered on Westover, Mass., Air Force Base bounded on north by VOR civil airway No. 2, on the east by Blue civil airway No. 41 and on the southwest by Green civil airway No. 2."

(2) (Youngstown, Ohio) is amended to read: "That airspace southeast of Youngstown bounded on the north by VOR civil airway No. 6, on the east by VOR civil airway No. 37, on the south by Red civil airway No. 85 and on the southwest and west by VOR civil airway No. 41."

(3) (Altus, Okla.) is added to read: "That airspace within a 35 statute mile radius of the Altus Air Force Base including the airpsace bounded on the northwest by VOR civil airway No. 14, on the east by VOR civil airway No. 77 and on the south by Red civil airway No. 10 excluding the airspace which overlaps Fort Sill danger area D-208."

(4) (Midway Island) is added to read: "All of the airspace from 700 feet upward within a radius of 25 nautical miles of the Midway Naval Station centered at latitude 28°12'00"N, longitude 177°22'00"W."

CONTROL ZONES: (1) (Five mile radius zones) is amended by deleting the following airport: Binghamton, New York: Broome County Airport; and by adding the following airport: Altus, Oklahoma: Altus Air Force Base.

(2) (Boston, Mass.) is amended to read: "Within a 5 s mi radius of Logan International Airport; within 2 s mis either side of the north course of the Boston radio range extending from the radio range station to a point 10 s mis north, and within 2 s mis either side of the ILS localizer course extending from the airport to a point 10 s mis beyond the outer marker."

(3) (Allentown, Pa.) is amended to read: "Within a 5 s mi radius of Allentown-Bethlehem-Easton Airport and within 2 s mis either side of the northeast course of the Allentown radio range extending from the radio range station to a point 10 s mis northeast; within 2 s mis either side of the ILS localizer course extending from the airport to a point 10 s mis beyond by the outer marker, and within 2 s mis either side of the 347° true radial of the Allentown omnirange extending from the omnirange station to a point 10 s mis north."

(4) (Binghamton, N.Y.) is added to read: "Within a 5 s mi radius of Broome County Airport, within 2 s mis either side of the ILS localizer course extending from the Airport to a point 10 s mis beyond the outer marker compass locator, and within 2 s mis either side of the 66° true and 246° true radials of the Binghamton omnirange extending from the airport to a point 5 miles southwest of the omnirange station."

(5) (Calverton, N.Y.) is added to read: "Within a 5 s mi radius of Grumman Peconic River Airport and within 2 statute miles either side of aline bearing 46° true from the airport to a point 10 statute miles northeast of the Riverhead omnirange station excluding the airspace which overlaps the Suffolk County AFB control zone, Westhampton Beach, L.I., N.Y."

(6) (Guam Island) is added to read: "All of the airspace from the surface upward with a radius of 5 nautical miles of Anderson Air Force Base, centered at latitude 13°35'00"N, longitude 144°55'00"E."

(7) (Guam Island) is added to read: "All of the airspace from the surface upward within a radius of 5 nautical miles of Agana Naval Air Station, centered at latitude 13°29'00"N, longitude 144°47'00"E."

(8) (Midway Island) is added to read: " All of the airspace from the surface upward within a radius of 5 nautical miles of Midway Naval Station, centered at latitude 28°12'00"N, longitude 177°22'00"W."

(9) (Kwajalein Island) is added to read: "All of the airspace from the surface upward within a radius of 5 nautical miles of Kwajalein Naval Station, centered at latitude 08°45'00" N, longitude 167°45'00"E."

REPORTING POINTS: (1) Green civil airway No. 4 (Los Angeles, Calif., to Philadelphia, Pa.) is amended after Amarillo, Texas, radio range station by deleting the following reporting point: "the intersection of the east course of the Amarillo, Texas, radio range and the northwest course of the Clarendon, Texas, radio range;" and after the Wichita, Kans., radio range station by adding the following reporting point: "the intersection of the southwest course of the Kansas City, Mo., radio range and the southeast course of the Topeka, Kans., radio range." (Note: Above reporting point named "Centropolis". Kansas City CAA region requests following: "it should be indicated on appropriate charts that northeastbound aircraft over Centropolis should report to Kansas City Radio; southwestbound aircraft to Emporia Radio.")

(11-2-54)

(2) Red civil airway No. 21 (Selinsgrove, Pa., to Boston, Mass.) is amended to read: " the intersection of the southeast course of the Hartford, Conn., radio range and the southwest course of the Quonset Point, R.I., (Navy) radio range; the intersection of the southwest course of the Providence, R.I., radio range and the southwest course of the Quonset Point, R.I., (Navy) radio range."

(3) Red civil airway No. 27 (Atlanta, Ga., to Detroit, Mich.) is amended by deleting the following reporting point; "the intersection of the east course of the Louisville, Ky., radio range and a line bearing 358° true from the Lexington, Ky., non directional radio beacon."

DOMESTIC REPORTING POINTS: are amended by adding and revoking the following:

(1) BENITO INTERSECTION - the intersection of the Salinas, Calif., omnirange 109° true and the Paso Robles, Calif., omnirange 335° true radials.

(2) MT. HAMILTON INTERSECTION - the intersection of the San Francisco, Calif., omnirange 097° true and the Oakland, Calif., omnirange 130° true radials.

(3) PANOCHE INTERSECTION - the intersection of the Coalinga, Calif., omnirange 311° true and the Modesto, Calif., omnirange 176° true radials.

(4) CAMPBELL INTERSECTION - the intersection of the San Francisco, Calif., omnirange 141° true and the Modesto, Calif., omnirange 242° true radials.

(5) LOS BANOS INTERSECTION - the intersection of the Modesto, Calif., omnirange 176° true and the Fresno, Calif., omnirange 287° true radials.

(6) PATERSON INTERSECTION - the intersection of the Wilkes-Barre-Scranton, Pa., omnirange 117° true and the Wilton, Conn., omnirange 241° true radials.

REVOKE

(7) LARRY INTERSECTION - the intersection of the Oakland, Calif., omnirange 130° true and the San Francisco, Calif., omnirange 111° true radials.

CHANGE

(8) GOLDEN GATE INTERSECTION to read: the intersection of the Oakland, Calif., omnirange 274° true and the San Francisco, Calif., omnirange 304° true radials.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Bellingham	Seattle	WAC 137
Portland	Spokane	WAC 304
Sacramento	Los Angeles Local	WAC 363
Salt Lake City		

A new edition (or new chart) for the Charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, danger area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: - Because of space limitation such items are cited only once. The erection or removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALEXANDER CITY-RUSSELL ARPT N/S Strip closed - const. (8-12)
ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
**ANNISTON ARPT: 574' (2981'MSL) lgtd TV twr erected 6.1 n mi SSE (158°T) at lat 33-29-06 long. 85-48-32. (7-21)
BIRMINGHAM-RADIO: VOR courses 005°-035°; 075°-175° and 195°-265° usable. Arpt apch course usable within 13 n mi; other courses not usable due to roughness and bends.(4-23)
**CHICKASAW ARPT: Abandoned. (10-1)

ALABAMA: EVERGREEN-MIDDLETON FLD: Caution-vehicles and farm equip intermittently crossing rnwys and using taxi strips.

HUNTSVILLE-RADIO: VOR radials 20°-70°; 100°-130°; 150°-210°; 255°-270°, rough and unusable. Courses between rng and arpt unusable due to roughness, bends and signal cancellation. (10-7)

MOBILE-RADIO: VOR flgt-checked on arwy radials only.

MONTGOMERY-RADIO: DME coverage 130°-230°, 35 n mi at 1500'. (5-20)

**MONTGOMERY-DANNELLY FLD: 823' (1483'MSL) lgtd twr erected 17.4 n mi S (170°T) at lat 32-01-15; long. 86-20-56. (9-16) Rnwys 3-21 and 15-33 closed. Dips in E/W Rnwy 1500' from E end. (7-19) Use right hand traffic pattern Rnwy 9. (8-23) Acft lndg and taking off are cautioned to avoid the Maxwell AFB traffic pattern and control zone. (9-23) Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard. (10-8)

**TUSCALOOSA-VAN DE GRAAFF ARPT: 100' (900'MSL) micro wave twr erected 17.5 n mi NE (60°T) at lat. 33-22-06; long. 87-18-54. (10-21)

TUSKEGEE-MOTON FLD: Caution - pipeline across rnwy.(10-1)

ARIZONA: CHANDLER-WILLIAMS AFB-RADIO: USAF VHF/DF steers unreliable on inbound headings 300°-080°, below 7000' beyond 40 n mi from stn. (12-7)

COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11,000'.

DOUGLAS-BISBEE-DOUGLAS INTERNATIONAL ARPT: Pilots are cautioned to use maximum length of rnwys for landings and take-offs due to obstructed view of ends. Take-offs from intersections of rnwys and taxiways prohibited.

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.

HASSAYAMPA-RADIO: DME coverage 325°-50°, 43 n mi at 10,000'; 50°-90°, 43 n mi at 5000'; 90°-180°, 43 n mi at 7000'; 180°-215°, 43 n mi at 4000'; 215°-235°, 43 n mi at 6000'; 235°-255°, 35 n mi at 6000'; 255°-270°, 43 n mi at 6000'; 270°-325°, 43 n mi at 8000'. (7-15)

KINGMAN ARPT: Caution-intermittent target plane testing in vcnty. Rdo controlled acft operating in area NW of fld.

PRESCOTT-RADIO: VOR radials 185°-225° usable dist 35 n mi at 10,000'; 135°-145° and 165°-185° usable dist 39 n mi at 10,000'.

TUCSON-RADIO: VOR and DME coverages lmtd to 35 n mi at 11,000', 0°-12°, 69°-72° and 330°-346°; 26 n mi at 11,000', 44°-69° and 346°-0°. (7-9) June 14, LF rng shut down for indefinite period - relctn.

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF/DF lmtd in rng to 30 n mi in quads containing inbound headings of 150°-210° and 245°-275°; rng 50 n mi other quads; steers unreliable below 13,000' all quads. (12-23) USAF UHF/DF unreliable 170°-270° below 14,500' at 40 n mi; unreliable at min en route alts all quads. UHF/DF inop 0800-0900 each Wed. (2-3)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (2-3)

ARKANSAS: FAYETTEVILLE ARPT: Men and equip. on fld daylgt hrs. (8-13)

HARRISON ARPT: New NW/SE Rnwy under const. Fld Clsd for ngt operns. (3-10)

TEXARKANA-RADIO: VOR 143° radial to Rnwy 13 beyond tolerance due to roughness and bends. (6-10) DME coverage 1900', 43 n mi in all quads.

WALNUT RIDGE-RADIO: VOR radials 290°-320° and 120°-150° have severe bends and course roughness.(4-14)

CALIFORNIA: ARCATA-RADIO: Oct 27, ILS shut down until approx Nov 6 - modernization.

ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

BAKERSFIELD-RADIO: VOR has slight to moderate scalloping in SE quad 80°-123°. Radials 0°, 90°, 100°, 130°, 140°, 150°, 220°, 270°, 300° and 330° flgt-checked.

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 180°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'.

BRAWLEY ARPT: E/W Rnwy clsd-construction. (4-3)

CANOGA PARK-RADIO: About Nov 16, H fac ident will be changed to OCA. (11-2)

CRESCENT CITY-RADIO: VOR arwys radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'. (9-15)

CULVER CITY-HUGHES ARPT: Const W end Rnwy 22. Overrun area W of paved Rnwy unusable. (10-29)

DAGGETT-RADIO: VOR 113.2 mc. Only arwy radials flgt-checked.

CALIFORNIA: EDWARDS AFB-RADIO: USAF LF rng courses have splits and multiples, unreliable beyond 35 n mi. (4-14)

EUREKA COUNTY ARPT: All lgtg fac inop. Length of surfaced rnwy reduced to 1400' and grass strip clsd. Const in progress on and adj to arpt. Caution-use at own risk. (5-29)

FILLMORE-RADIO: DME and VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17) Oct 16, DME shut down. (10-28)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked. (6-16)

FRESNO AIR TERMINAL: Rnwy 7-25 closed until approx April 1, 1955. (9-15)

FURNACE CREEK ARPT, SITE 17, RIV-TDL: Fld closed, const. Mrkd. (8-13)

GASQUET ARPT: N side of strip clsd-const.

KLAMATH-McBETH FLD: Closed-high vegetation. (7-27)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16)

LONG BEACH ARPT: Serveral 230' MSL portable oil derricks W of fld. (10-19)

LONG BEACH-EAST LONG BEACH ARPT: Caution - const W side NE/SW Rnwy and S side E/W Rnwy. Land W and N sides respectively. (7-23)

LOS ANGELES-RADIO: VAR visual courses not usable - moderate scalloping N sector.

LOS ANGELES INTERNATIONAL ARPT-TOWER: ILS on Rnwy 25L inop; ILS on Rnwy 25R will be operative, but radar monitored apchs not avail. until approx Nov. 1. (10-18) About Nov 15, ASR will be shut down for approx 4 months - modernization. (10-18) FLD: FIDO testing at irregular intervals. Due to non-visibility twr unable to ctl tfc on first 300' and last 600' of Rnwy 34 and last 1000' of Rnwy 29. Equip. on and ajd to const areas.

NEEDLES-RADIO: VOR 35 n mi coverage from 5°-15° and 190°-205° at 8000' and 50° radial at 10,000'.

OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR maximum usable dist 35 n mi N thru E at min instr alt. (1-14) DME coverage 80°-120°, 43 n mi at 6000'; 120°-175°, 43 n mi at 5000'; 175°-280°, 43 n mi at 4000'; 280°-290°, 35 n mi at 4000'; 290°-305°, 43 n mi at 4000'; 305°-340°, 43 n mi at 6000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'; 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'. (6-3)

OCEANSIDE-HI HI SKY RANCH ARPT: Caution ditch in center of strip. (7-6)

ONTARIO-RADIO: DME coverage 0°-90°, 43 n mi at 13,000'; 90°-135°, 43 n mi at 9000'; 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 280°-300°, 43 n mi at 9000'; 300°-330°, 43 n mi at 13,000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. (6-12)

ONTARIO-INTERNATIONAL ARPT-TOWER: ILS LOM reported unreliable for navigational purposes durg hrs of darkness due strong heterodyne interference Mexicali H fac.-(5-26)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'.

PASO ROBLES-RADIO: DME coverage 315°-45°, 43 n mi at 7000'; 45°-105°, 43 n mi at 5000'; 105°-125°, 43 n mi at 6000'; 125°-190°, 43 n mi at 5000'; 190°-220°, 43 n mi at 6000'; 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'; 270°-315°, 43 n mi at 5000'. (6-15)

PORTERVILLE ARPT: Electric Ear controlling lights, inoperative.

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'; 235°-360°, 43 n mi at 10,000' (6-14)

RIALTO-MORROW ARPT: Closed on Sunday-Drag races. (7-28)

SACRAMENTO-RADIO: VOR usable dist 245°-260°, 39 n mi at 3000'. (6-1) DME coverage 10°-100°, 43 n mi at 9000'.

SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 mi. (5-20)

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 100°-120°, 43 n mi at 7000'; 120°-160°, 43 n mi at 6000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 265°-345°, 43 n mi at 5000'; 345°-10°, 35 n mi at 4000'. (6-15) (11-2-54)

CALIFORNIA: SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'. (5-27)

SAN DIEGO-RADIO: VOR has light to moderate scalloping in all quads. Arwy radials and radials 0, 80, 100, 140, 150, 270, 300, 310 and 320° flgt-checked.

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Sept 27, ASR shut down until approx. Dec. 15 modernization and move to new twr. (9-25) FLD: Taxiway 1 paralleling rnwys 10R and 1L clsd. Equip. on fld. A hump of 5'' rise in 75' developped across Rnwy 10L-28R, 3000' from W end of rnwy. (2-3) 90' pile driver adj W end 28L mrkd, lgtd. (7-20) Effect. Oct 18, tfc will be operg simultaneously on Victor 107 and Victor 25/27E in vcnty of San Francisco VOR, even though the center line of these arwys is 8.5 s mi apart. The usual dist rqrd between the center line of two VOR Arwys before lateral separation is considered to exist is 10 s mi. However due to the proximity of the Oakland VOR and San Francisco VOR facilities and the quality of the reception from these facilities, a waiver has been granted for this deviation from the 10 s mi requirement. Tfc information will be exchanged between any two acft simultaneously operg on Victor 107 and Victor 25/27E when the acft do not have time for altitude separation. In this connection, pilots should note that Victor 107 was recently realigned from Coalinga - San Francisco to Coalinga - Oakland. (10-14)

SAN RAFAEL-HAMILTON AFB-RADIO: USAF VHF/DF unreliable 340°-135° clockwise below 11,000'. (2-26)

SANTA ANA-EL TORO MCAS-RADIO: Navy LF rng, ident NZJ, freq 407 kc, unreliable. Multiples all courses. Usable for homing only. (1-29)

SANTA ANA-ORANGE COUNTY ARPT: Men and equip Rnwy 3-21, daylgt hrs. (8-20)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 45°-80°, 43 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 95°-110°, 43 n mi at 4000'; 110°-260°, not checked; 260°-325°, 43 n mi at 7000'. (6-28) VOR has occasional interference. Caution advised. (10-11)

STOCKTON ARPT: Rnwy 11-29 clsd. Lgts avail. on Rnwy 16-34 only. Caution.

UKIAH-RADIO: VOR usable dist 20°-40°, 35 n mi at min instr alts. (6-23)

S. shoreline, thence northerly paralleling the shoreline to lat 36-49-25, long 75-54-00; thence to lat 36-49-25, long 75-32-00; thence due N to lat 37-08-00; thence due W to long 75-47-00; thence northeasterly paralleling the shoreline to a point at lat 38-37-00, long74-59-30, thence to a point at lat 38-45-00, long 74-53-00, point of beginning. Effective Nov 8, 1954.

NORFOLK-RADIO: Visual courses VAR slightly rough.

NORFOLK ARPT-TOWER: Oct 14, ASR shut down until approx Nov. 18 - modernization. All radar procedures suspended for this period. (10-14) ASR PPI apchs not avail. to Rnwy 22, 31, 13. (8-6) About Nov 1, apch ctl freq 126.5 mc will be cmsnd. (10-8)

PU LASKA-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n mi at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010 010°, 26 n mi at 6000'. (7-7)

RICHMOND-BYRD FLD: Due to non-visibility twr unable to ctl tfc on N and S portions of N/S taxiway parallel to rnwy 2-20. Caution soft shoulders rnwy 6-24. (5-6)

ROANOKE-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W ta xi strip. (2-18) Soft and broken spots on N/S taxi strip from E/W ta xi strip to approx 300'N. Hvy acft use extreme caution. (10-12)

WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area and lakes.

BELLINGHAM-RADIO: VOR radial 280°, on Vancouver B.C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.

BREMERTON-KITSAP COUNTY ARPT: The first 2,000' Rnwy 1 closed to all Naval acft.

CLE ELUM ARPT: 8' fence erected across E end of E/W Rnwy - not obstn marked or lgtd.

ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'. (6-21)

EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown prohibited area; 227°-280°, 25 no mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.

EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160°, below 9000', USAF UHF/DF steers unreliable 160°-310° below 7000'; 025°-098° below 9000' due terrain limitations.

**FRIDAY HARBOR SEAPLANE BASE: ARPT OF ENTRY. (9-27)

★MOSES LAKE-LARSON AFB-RADIO: USAF VHF/DF unreliable 050°-110°, below 7000'; 110°-240° below 4000'; 240°-315° below 3500'. (1-13) USAF VHF/DF no longer opers on 126.18 mc. (10-20)

OTHELLO ARPT: Caution-unlgtd power line approx 50' h igh E end-unmrkd. (6-14)

**PORT ORCHARD-SOUTH PORT ORCHARD ARPT: 1000' (MSL) lgtd TV twr erected 6.1 n mi NE (63°T) at lat 47-28-43; long 122-32-32. (7-26)

PULLMAN-MOSCOW ARPT: Lighting inoperative. (9-21)

SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Trans & rcvg freq 132.3 mc inop. (9-17)

SEATTLE-RADIO: About Nov 8, VOR will be shut down for indefinite period-modernization.

SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft use main rnwys, ta xi strips only, making tfc pat. W of fld at 1500'. Effect Oct 13, 5800' of Rnwy 13-31 closed, mrkd. S 4200' open day and ngt all operns civil and military acft. Wide military taxiway W side open authorized military acft. Closed to all other acft except CAM flights and for takeoffs only. (10-12)

SEATTLE-TACOMA ARPT-TOWER: ASR will continue to issue distance values in statute miles in connection with radar control. (10-12)

SHELTON-RADIO: LF rng on 371 kc has lmtd usable course dist as follows: S course 30 n mi, SW and N, 26 n mi each.

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 152°-224°, 43 n mi at 5000'; 224°-264°, 43 n mi at 6000'; 264°-36°, 43 n mi at 8000'. (6-17)

SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable below 9500' in all quads.

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld. (12-19)

SPOKANE-GEIGER FLD: Caution-const on ramp N of control tower. Mil acft parked adj to taxiway between Rnwy 20 and control twr. Men and equip. working on apchs to Rnwy 2-20. (9-24)

**WASHINGTON TOLEDO-KELSO ARPT: Restricted to Rnwys and taxiways - remainder of fld freshly plowed. (10-21)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°,298°, 321° and 336° radials at min terrain clearance alts.

WEST VIRGINIA: BECKLEY-RALEIGH CO. MEMORIAL ARPT: 4 unlgtd poles extending 25' above tree tops E end E/W Rnwy to S of centerline of apch. (5-31)

CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (3-16)

**CHARLESTON-KANAWHA COUNTY ARPT: 649' (1549'MSL) lgtd TV twr erected 4.5 n mi WNW (275°T) at lat 38-22-36; long 81-42-04. (7-1)

ELKINS-RADIO: LF rng has multiples and fades all courses. DME coverage 35°-95°, 43 n mi at 6800'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)

ELKINS ARPT: Small hole 2' long, 2" deep approx 150 yards from Rnwy 31 on right side edge ta xiway leading from ramp. (9-16)

**HUNTINGTON ARPT: 1069' (2049'MSL) lgtd WSAZ-TV twr erected 14 n mi ENE (62°T) at lat 38-30-34, long. 83-13-09. (10-8)

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'. (7-7)

MARTINSBURG ARPT: Glider flying - peak activity expected on week-ends and holidays. Serv fac avail 0800 until sunset. (9-6) Const 28' hangar 500' E of centerline and 1100' from S end Rnwy 35, lgtd. (9-24)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution-dip midway Rnwy 16-34 covering full width of rnwy. (5-4)

WISCONSIN: **HAYWARD ARPT: 1153' MSL lgtd rdo twr erected 4.5 n mi SE (150°T) at lat 44-57-55; long. 91-23-08. (10-28)

JANESVILLE-RADIO: VOR courses rough all azimuths within 4 n mi of stn. (6-8)

**LONE ROCK ARPT SITE 16, CHI-TWIN CITIES: Bcn changed from 6 clear and 6 green fpm to 12 clear fpm red course lgts reactivated flashing code no. 6, dash dot dash. (10-11)

MADISON-TRUAX FLD-TOWER: Caution - twr rdo reception intermittently blocked out by jet acft run-ups. (6-16) VHF/DF inop. indefinitely. (10-22) FLD; E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Caution crossing hwy in lndg Rnwys 22, 26, 31. Sod unsafe. Due to non-visibility, twr unable to ctl tfc on first 1000' S end Rnwy 18-36 adj taxiway and all portions of civil and mil ramps. Equip on fld. Caution - lndg jet interceptor acft using tactical left hand over-head apchs at 2300' MSL. (3-30)

MILWAUKEE-RADIO: VOR has moderate course roughness in area between 200° and 220°, DME coverage 190°-200°, 35 n mi at min en route alt. (6-11)

MILWAUKEE-GENERAL MITCHEL FLD: Rnwy 6-24 open daylgt hrs only. (10-24)

NEENAH-VALLEY ARPT: N/S strip clsd-golf driving range, roadway on end. (8-13)

OCONOMOWOC-PABST ARPT: Effect Jan 1, 1955 N/S strip (2000' x 200') will be discontd.

**RHINELANDER-ONEIDA COUNTY ARPT: Construction completed NW/SE now paved. 3700' x 100'. Shoulders soft. Clearing of trees SW end in progress. (10-8)

SIREN-BURNETT COUNTY ARPT: All lgtg fac inop. (10-1)

**STONE LAKE-SAND BEACH ARPT: Closed. (10-15

WATERTOWN ARPT: NE/SW Strip clsd-const. (5-21)

WAUKESHA-COUNTY ARPT: Caution-E/W Strip closed, Sept. 26. (9-9)

WYOMING: CASPER-RADIO: ILS glide slope has moderate to severe path roughness above beyond 6 n mi. Not to be used for auto. pilot apchs.

CHEYENNE ARPT: Clsd to transient jet acft, except in emergencies.

GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S Strip soft-clsd to hvy acft.

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'. (7-2)

LARAMIE-BREES FLD: Caution deer on fld. (6-29)

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.

ROCK SPRINGS-RADIO: About Nov 16, ILS will be shut down approx 3 weeks-modernization.

ROCK SPRINGS ARPT: Caution -first 500' NW end NW/SE Rnwy clsd - marked. (9-10)

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area. (4-26)

WEST INDIES: **NASSAU-BAHAMAS: Memory Rock Warning Area W-176 changing controlling Agency to Missile Test Center, Patrick AFB, Fla.". (10-13)

Revisions to Instrument Approach Procedures

(NOTE: ALL DISTANCES ARE IN STATUTE MILES.)

VHF OMNIRANGE (VOR) PROCEDURES

When a VOR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY FREQ IDENT PROCEDURE NO	INITIAL APPROACH TO FACILITY FROM	CRS. AND DIST	MIN. ALT.	PROCEDURE TURN SIDE OF FINAL APCH CRS (OUTBND. NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerour air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) .-.. --. -... (LGB in Code).

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciably higher rate of speed than the location identifier.

NAUTICAL MILES - STATUTE MILES: NEW DIMENSIONAL UNIT PROCEDURES: Among the various segments of the aviation industry there are many users of the airspace who desire to use nautical units for speed and distance measurements in their operations while others prefer the use of statute units. A plan designed to best serve the interests of all concerned has been developed and will be placed in effect on October 1, 1954. The plan generally provides that the pilots of all air carrier aircraft and all military aircraft shall use nautical units exclusively in all of their operations whether IFR or VFR. Private and business aircraft pilots, on the other hand, may use either nautical or statute units according to their preference.

Since uniformity is essential to the efficient operation of the Federal Airways System, all CAA facilities (communications stations, airport traffic control towers and air route traffic control centers) will use knots and nautical miles as the standard for all internal operations involving speed and distance values. Also, all normal radio transmissions of speed and distance values by these facilities will be in terms of knots and nautical miles with the exception of visibility which will continue to be reported and transmitted in statute miles. Any speed or distance value (except those associated with radar traffic control) will be converted from nautical to statute units by CAA facilities upon receipt of specific requests from pilots of private and business aircraft.

At the present time, surface wind velocity is reported in miles per hour. Beginning October 1, surface wind velocity will be reported in knots. Hence, when surface wind is reported as "west south west eight" it will be eight knots rather than eight miles per hour. This change need be of no great concern to the pilot, however, since, until a velocity of thirty miles per hour or more is reached, the difference between miles per hour and knots is so slight as to be insignificant for all practical purposes. In any case, if the pilot of a private or business aircraft wants the wind velocity in miles per hour, the CAA facility will convert it upon request.

When filing IFR flight plans and conducting IFR flight, distance and speed information submitted to CAA facilities by all pilots should, if possible, be in nautical units since the ground system will operate on the basis of nautical units. If statute units are used by the private or business aircraft pilot, they should be identified as such in each case; i.e., "airspeed 110 miles per hour". The CAA facility will then convert the value to knots for internal use.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 8, 1953 (11-16-54)

***

CAR 60 CHANGE AFFECTS VERTICAL CLEARANCE OVER CLOUDS: Effective November 10, 1954, paragraph 60.30 of CAR 60 has been revised to require 1,000 feet vertical clearance over clouds, instead of the 500 feet now required. Pilots filing IFR flight plans for on-top operation should specify "1000 on-top". Air traffic clearance phraseology will also be revised to specify "at least 1000 on-top" when clearing flights to operate on-top. There is no change in the cloud clearance requirement for flight below clouds.

PRIVATE AIRCRAFT-TO-TOWER FREQUENCIES: Due to severe congestion on the frequency 122.5 mc in the New York City, Chicago and Los Angeles areas, it has become necessary to implement the frequency 122.7 mc at the New York (LaGuardia), Chicago (Midway), and Los Angeles (International) airport towers. Effective 0001 Local Standard Time, December 1, 1954, a guard on the frequency 122.7 mc will be established and simultaneously the guard on 122.5 mc will be discontinued at these three towers. Pilots of private aircraft intending to land at New York (LaGuardia), Chicago (Midway) or Los Angeles (International) airports should be equipped to transmit on 122.7 mc. The emergency frequency 121.5 mc may be used temporarily to call these towers in the event it is not possible to obtain 122.7 mc by December 1.

AIRSPACE WARNING AREA DEFINITION: "An Airspace Warning Area is an area located more than three nautical miles beyond the shoreline of the United States (including its territories and possessions and territorial waters) in which an invisible hazard to aircraft in flight exists. It, normally, is shown on aeronautical charts and published in NOTAMS and ATANS." All pilots are reminded and cautioned that the activities conducted in Danger Areas and Airspace Warning Areas are identical. This information is issued by the Airspace Subcommittee of the Air Coordinating Committee to point out the risks being run by pilots when their aircraft transgress Airspace Warning Areas.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS - The following abbreviations have been adopted for use in the Airman's Guide: "n miles" or "n mi" for nautical miles; "s miles" or " s mi" for statute miles.

SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Entry into and maneuvering within these patterns should be made at speeds within this tolerance as buffer zones have been provided only for these speeds. It is recommended that all aircraft adhere closely to these restrictions and if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

IFR FLIGHTS ABOVE TWENTY-NINE THOUSAND FEET: Effective November 1, 1954, the odd-thousand foot altitude levels will be used for IFR flights above 29,000 feet unless prior coordination has been effected with air traffic control. This method of altitude assignment, adopted in conjunction with the military request for two thousand feet altitude separation for all flights at or above 30,000 feet, is designed to permit a more orderly and expeditious flow of air traffic within the airspace affected.

TEMPORARY AIRSPACE RESERVATIONS FOR ATLANTIC FLEET EXERCISES:
The following temporary airspace reservations will be established as follows:

(1) 140001Z November to 192400Z November. From 39N 73W along the inner boundaries of the New York and Miami OAC to 28N 78W to 28N 65W to 39N 65W to origin. Sea level to 6,000 ft and 23,000 to 40,000 ft excluding that area within a 100 nautical mile radius of Bermuda.

(2) Special Notice exercise area within 100 nautical mile radius of 34-31-50N, 77-20W exclusive of airways and the area west of Civil Airway Amber 9 140401Z to 210400Z November. Bogue Sound-Onslow Beach with air intercept simulated bombing and strafing from sea level to 35,000 feet. Hazardous to non-participating aircraft.

(3) Special Notice exercise area 140001Z November to 190500Z November. Air intercept, simulated bombing and strafing from sea level to 35,000 feet within the following area: From 32N 71W to 36-30N 74-30W to 34-20N 77-20W to 32-30N 78W to 29N 74W to origin. Hazardous to non-participating aircraft.

(4) From 100501Z to 190500Z November; 200401Z to 210400Z November. From a point on the east coast of North Carolina at 36-20N to 36-20N , 74-17W to 37-40N, 74-17W thence west to coast line and along the coast to the point of origin. Sea level to 5,000 feet inclusive.

(5) From 190500Z to 210500Z November. From a point 41N 70W to 40N 70W to 40N 72W to southern boundary control area extension 1169 thence along that boundary to 41-08N 70-24W thence to point of origin. Sea level to 4,000 feet.

LOCATION IDENTIFIERS: The following changes affect the use of location identifiers:

CNI	Chena Intersection, Alaska, Radiobeacon (Change from CJR REP)
CYN	Coyle, N. J., VOR (Assignment)
FAL	Falmouth, Mass., Radiobeacon (Assignment)
GUF	Guam, Marianas Islands, Barrigada Radiobeacon (Assignment)
NFS	Tillamook Bay, Oregon, Lifeboat Station (Change from Coastway #1)
SMX	Santa Maria, Calif., Public Airport (Name Change)
TOY	Troy, Ill., VOR (Assignment)

AIR ROUTE TRAFFIC CONTROL BOUNDARY AND FLIGHT ADVISORY AREA BOUNDARY AMENDMENTS: The following amendment will be effective November 21, 1954:

(1) The ATLANTA-JACKSONVILLE CONTROL AND FLIGHT ADVISORY BOUNDARIES will be established as follows: From the present control boundary 50 statute miles southeast of the Spartanburg LF range station on Blue Civil Airway No. 28 thence direct to latitude 34-07N, longitude 82-15W thence direct to latitude 34-07N, longitude 82-30W thence direct to latitude 32-45N, longitude 82-30W thence direct to the present control area boundary 50 statute miles northwest of Alma LF range station on Amber Civil Airway No. 6.

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 9, Number 17, dated November 2, 1954 as follows:

(1) Page 29, Item (3), to read: Clifford Lake Intersection - intersection Princeton, Maine VOR 200 magnetic radial with St. John, New Brunswick, LFR 099° magnetic on Blue 50.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 8, dated May 25, 1954 as follows:

(1) Page 24 - under Pennsylvania, change Pittsburgh WB telephone numbers to read: AMherst 4-0310 and SP 1-2855.

(2) Page 24 - under Texas, change Fort Worth WB telephone number to read: ATlas 4-2761, delete TI 2806 and AI - 2301.

ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are designated, re-designated, re-described, changed or cancelled as indicated:

DESIGNATIONS

(1) BRADFORD (LF) INTSXN- intersection of the Birmingham 355° magnetic and the Anniston 287° magnetic radials.

(2) ROSSVILLE INTSXN - the intersection of the southwest crs of the Chattanooga LF Range and the Chattanooga 280° magnetic radial.

(3) PHANTOM HILL INTSXN - the intersection of the North course of the Abilene LF Range and the Abilene 043° radial.

(4) FRIENDSWOOD (LF) INTSXN - the intersection southeast course of the Houston LF range and the 039° magnetic bearing from Pearland radiobeacon.

(5) BELTON INTERSECTION (LF) - the intersection southwest course of the Waco LF range and the 105° magnetic bearing from Gray AFB radiobeacon.

(6) HASLET INTERSECTION - the intersection of the North course of the Ft. Worth LF range and the 255° magnetic bearing from the Haslet radiobeacon.

(7) LA PORTE (VOR) INTSXN- Houston 066° magnetic and Galveston 341° magnetic radial.

(8) SWEETWATER (VOR) INTSXN - Knoxville 249° magnetic and Chattanooga 031°magnetic radials.

(9) SYLACAUGA (VOR INTSXN - the Birmingham 135° magnetic and the Montgomery 355° magnetic radials.

(10) STERRETT(VOR) INTSXN- Birmingham 135° magnetic and Anniston 250° magnetic radials.

(11) CALERA (VOR) INTSXN - Anniston 230° magnetic and Birmingham 178° magnetic radials.

(12) MADISONVILLE (VOR) INTSXN - New Orleans 355° magnetic and Baton Rouge 085° magnetic radials.

(13) ASHER (VOR) INTSXN - Ardmore 002° magnetic and Oklahoma City 110° magnetic radials.

(14) ALVIN (VOR) INTSXN - Houston 169° magnetic and Galveston 268° magnetic radials.

(15) LEAKSVILLE (VOR) INTSXN - Greensboro 023° magnetic and Danville 255° magnetic radials.

(16) SOUTH BAY (VOR) INTSXN - South course of Tampla Localizer and the Tampa 132° magnetic radial.

(17) PARISH (VOR) INTSXN - The Tampa 132° magnetic and the Lakeland 210° magnetic radials.

(18) ARCADIA (VOR) INTSXN - The Tampa 132° magnetic and Ft. Myers 354° magnetic radials.

(19) LA BELLE (VOR) INTSXN - Miami 313° magnetic and Ft. Myers 042° magnetic radials. Also, Tampa 132° magnetic and Lakeland 158° magnetic radials.

(20) SEMINOLE (VOR) INTSXN - Miami 313° magnetic and Ft. Myers 090° magnetic radials.

(21) BRYCEVILLE (VOR) INTSXN- Jacksonville 272° magnetic and Brunswick 210° magnetic radials.

(22) WHITWELL (VOR) INTSXN - Chattanooga 312° magnetic and Crossville 205° magnetic radials.

(23) HAMILTON (VOR) INTSXN - Columbus, Ga., 018° magnetic and La Grange 115° magnetic radials.

(24) SPRINGVILLE (VOR) INTSXN - Birmingham 041° magnetic and Anniston 307° magnetic radials.

(25) MORGANZA (VOR) INTSXN - Baton Rouge 300° magnetic and Lafayette 020° magnetic radials.

(26) CREOLE (VOR) INTSXN - the southeast Baton Rouge localizer course (126° magnetic and the Baton Rouge 090° magnetic radial.

(27) RED OAK (VOR) INTSXN - Dallas 169° magnetic radial and southeast Amon Carter localizer course (129° magnetic radial.

(28) LAKE TYLER (VOR) INTSXN - Southeast localizer course 126° magnetic and Longview 248° magnetic radial.

(29) EDGEWOOD (VOR) INTSXN - Dallas 097° magnetic radial and northwest course Tyler ILS localizer course (306° magnetic).

(30) EDGEWOOD (LF) INTSXN- the intersection of the east course of the Dallas LF range and the northwest course of the Tyler localizer (306°magnetic.)

(31) LATROBE (VOR) INTSXN - the intersection Morgantown, West Virginia, VOR 026° magnetic radial with Pittsburgh, Pennsylvania, VOR en route radial to Johnstown VOR.

(32) KINGWOOD (VOR) INTSXN - the intersection Pittsburgh, Pa., VOR en route radial to Martinsburg, W. Va., with Johnstown VOR en route radial to Morgantown VOR.

(33) CLEARVILLE (VOR) INTSXN - intersection Johnstown VOR en route radial to Martinsburg VOR with Altoona, Pennsylvania, LFR southwest course.

(34) MCINTYRE INTSXN - intersection Johnstown VOR 296° magnetic radial with Pittsburgh VOR en route radial on Victor 58.

(35) NEVADA, MO. INTSXN - the intersection of the 170° magnetic radial from Butler, Mo., VOR and the 294° magnetic radial from the Springfield, Mo., VOR.

(36) MITCHELL'S BAY INTSXN - the intersection of the southeast course of Selfridge, Michigan, L/MF radio range and the northeast course of the Windsor, Ontario L/MF radio range.

REDESCRIBE:

(1) ARCOLA VOR INTSXN - intersection to be defined by the Houston 217° magnetic and the Galveston 283° magnetic radials. The Galveston VOR has recently been relocated, and the 283° magnetic radial should be shown on the chart as defining this VHF intersection.

(2) COVE (VHF) INTSXN - intersection of Greensboro 334° and Danville 255° magnetic radials.

(3) HOMO (VHF) INTSXN - intersection of Tampa 011° magnetic and Lakeland 329° magnetic radials.

(4) MARVYN INTSXN - Columbus, Ga., 253° and La Grange 180° magnetic radials.

(5) CYPRESS (VHF) INTSXN - W. Palm Beach 218° magnetic and Miami 313° magnetic radials.

(6) MONUMENT (VHF) INTSXN - Define as Galveston 338° magnetic radial, intersecting Houston 035° magnetic radial and the Northeast course of Houston localizer.

(7) NARROWS INTSXN - intersection of Anniston 250° magnetic and Birmingham 178° magnetic radials.

CHANGE

(1) FOWLER INTERSECTION- Name changed to read: MOSQUITO INTERSECTION - intersection Youngstown ILS northwest course with Youngstown LFR west course.

CANCEL

(1) ALVORD INTSXN.

(2) INDIANHEAD INTSXN - replaced by Kingwood Intsxn.

(3) DRESDEN (INT), ONTARIO

(4) OXFORD (INT), MICHIGAN

The following on-request reporting points are cancelled effective concurrently with decommissioning of Detroit VOR.

(1) PINS INTSXN (2) PERCH INTSXN (3) SOUTH BASS INTSXN

NON-STANDARD HOLDING PATTERNS: Effective immediately the following non-standard holding patterns are established:

(1) FAIR PARK INTERSECTION - direction from holding point - SE on the SE localizer course. Inbound crs to fix 307°magnetic; direction of turn-LEFT; time- one-minute, Mimimum altitude 2000 feet.

(2) THOMAS INTERSECTION - direction from holding point - SE on the southeast course of the Winston-Salem LF range. Inbound course to fix 328°magnetic; direction of turn - LEFT; time- two-minutes; minimum altitude 2300 feet.

(3) COVE INTERSECTION - direction from holding point - Northwest on the northwest course of Greensboro. Inbound course to fix 148° magnetic- direction of turn-RIGHT; time-one minute; minimum altitude 4000 feet.

(4) REID INTERSECTION - direction northwest on the northeast course of Greensboro. Inbound course to fix 237° magnetic; direction of turn- RIGHT; time- one minute; minimum altitude 2300 feet.

(5) REID INTERSECTION (VHF) - direction from holding point - northeast on the Greensboro 055° magnetic radial. Inbound course to fix 235° magnetic; direction of turn- RIGHT; time- one minute, minimum altitude 3500 feet.

(6) GREENSBORO ILS OUTER COMPASS LOCATOR - direction from holding point- northwest on the northwest course of ILS (318°). Inbound course to fix 138° magnetic, direction of turn - LEFT, time - one-minute; minimum altitude 2300 feet.

(7) SPARTANBURG LF RANGE - direction from holding point - southwest on the southwest course. Inbound course to fix 058° magnetic; direction of turn - RIGHT; time - one minute; minimum altitude 2000 feet.

(8) BRADFORD INTERSECTION - direction from holding point - north on the Birmingham 355° magnetic radial. Inbound course to fix 175° magnetic; direction of turn - RIGHT - time-one minute; minimum altitude 2500 feet.

(9) NARROWS INTERSECTION - direction from holding point- south on the Birmingham 178° magnetic radial. Inbound course to fix 358° magnetic; direction of turn - RIGHT; time-one-minute; minimum altitude 2700 feet.

(10) ARDMORE INTERSECTION - direction from holding point- north of intersection on Philadelphia LFR north course, west side; direction of turn - RIGHT; time- one-minute.

(11) PORT DEPOSIT INTERSECTION - direction from holding point - SW of intersection on Baltimore VOR 052° radial, SE side, direction of turn-RIGHT; time - one minute.

(12) GREENVILLE, S.C., ILS Outer Compass Locator- direction from holding point- S on S crs of ILS localizer. Inbound crs to fix 002° magnetic; direction of turn- RIGHT; time-one-minute; minimum altitude 2000 feet.

(13) GREENVILLE, S.C., LFR- direction from holding point-S on S crs. Inbound crs to fix 002° magnetic; direction of turn-RIGHT; Time- one minute; minimum altitude 2500 feet.

(14) GREENVILLE, S.C., LF Radio Range- direction from holding point- N on the N crs. Inbound crs to fix 182° magnetic; direction of turn-RIGHT; time-one minute; minimum altitude 4000 feet.

(15) CHARLOTTE, N.C., ILS Outer Compass Locator- direction from holding point- SW on the SE crs of ILS localizer. Inbound crs to fix 050° magnetic; turn- RIGHT; time- one minute; minimum altitude 2200 feet.

(16) TRI-CITY ILS Outer Compass Locator- direction from holding point- E on theE crs of ILS localizer. Inbound crs to fix 270° magnetic; direction of turn- RIGHT; time-one minute; minimum altitude 5500 feet.

(17) BEAUMONT, TEXAS VOR- direction from holding point- W on 241° magnetic radial. Inbound course to fix 061° magnetic; direction of turn - LEFT; time- two-minute; minimum altitude 1200 feet.

(18) DUNCANVILLE INTSXN (VHF) direction from holding point- S on Dallas 193° magnetic radial. Inbound crs to fix 013° magnetic; direction of turn- LEFT; time- one minute; minimum altitude 2000 feet.

MINIMUM EN ROUTE IFR ALTITUDES: Effective December 7, 1954, minimum en route IFR altitudes are amended as follows:

From	To	Min Alt.
(1) Amber Civil Airway No. 1, is amended to read in part:		
Susitna (Int), Alaska	*Skwentna, Alaska (LFR)	4,200
*7,000' - Minimum crossing altitude at Skwentna (LFR) - W-bound		
(2) Amber Civil Airway No. 5, is amended to read in part:		
St. Louis, Mo. (LFR)	Jerseyville (Int), Ill.	2,000
(3) Red Civil Airway No. 15, is amended to read in part:		
Fallon, Nev. (LFR)	Wadsworth (Int), Nev.	10,000
(4) Red Civil Airway No. 77, is amended to read in part:		
Lynchburg, Va. (LFR)	Sheppards (Int), Va.	3,000
Sheppards (Int), Va.	Morven (Int), Va. (Eastbound)	2,000
	(Westbound)	3,000
Moven (Int), Va.	Richmond, Va. (LFR)	2,000

(11-16-54)

From	To	Min Alt
(5) Blue Civil Airway No. 6, is amended to read in part:		
Wood River (Int), Ill.	Jerseyville (Int), Ill.	2,000
(6) Blue Civil Airway No. 18, is amended to read in part:		
Ridgewood (Int), N.J.	West Point (Int), N.J.	2,500
West Point (Int), N. J.	Poughkeepsie, N. Y. (LFR)	2,600
Poughkeepsie, N. Y. (LFR)	Hyde Park (Int), N. Y.	2,600
Hyde Park (Int), N. Y.	Red Hook (Int), N.Y. (Northbound)	5,000
	(Southbound)	2,600
(7) VOR Civil Airway No. 3, is amended to read in part:		
Miami, Fla. (VOR) Via W alter.	New River (Int), Fla. Via W alter.	1,300
New River (Int), Fla. Via W alter.	*Belle Glade (Int), Fla. Via W alter.	2,000
*Belle Glade (Int), Fla. Via W alter.	Vero Beach, Fla. (VOR) Via W alter.	**3,000
*3,000' - Minimum reception altitude		
**1,300' - Minimum terrain clearance altitude		
(8) VOR Civil Airway No. 8, is amended to read in part:		
Akron, Colo. (VOR) Dir. or S alter.	Imperial, Nebr. (VOR) Dir. or S alter.	5,600
(9) VOR Civil Airway No. 16, is amended to read in part:		
Cochise, Ariz. (VOR)	Animas (Int), N. Mex.	12,000
Animas (Int), N. Mex.	Columbus, N. Mex. (VOR) (Eastbound)	8,600
	(Westbound)	10,000
(10) VOR Civil Airway No. 27, is amended to read in part:		
*San Francisco, Calif. (VOR) Via E alter.	San Bruno (Int), Calif. Via E alter.	3,000
*3,500' - Minimum crossing altitude at San Francisco (VOR) - S bound		
San Bruno (Int), Calif. Via E alter.	Stinson Beach (Int), Calif. Via E alter.	4,000
(11) VOR Civil Airway No. 66 is amended to read in part:		
Douglas, Ariz., (VOR)	Animas (Int), N. Mex.	10,000
Animas (Int), N. Mex.	Columbus, N. Mex. (VOR) (Eastbound)	8,600
	(Westbound)	10,000
(12) VOR Civil Airway No. 67, is amended by adding:		
Waterloo, Iowa (VOR)	Mason City, Iowa (VOR)	2,500
(13) VOR Civil Airway No. 71, is amended by adding:		
Springfield, Mo. (VOR) Via W alter.	*Nevada (Int), Mo. Via W alter.	**3,000
*3,000' - Minimum reception altitude		
**2,500' - Minimum terrain clearance altitude		
Nevada (Int), Mo. Via W alter.	Butler, Mo., (VOR) Via W alter.	2,500
(14) VOR Civil Airway No. 92, is amended by adding:		
Mansfield, Ohio (VOR)	Bowerstown (Int), Ohio	1,500
Bowerstown (Int), Ohio	Wheeling, W. Va. (VOR)	2,000
(15) VOR Civil Airway No. 93, is amended by adding:		
Allentown, Pa. (VOR)	Wilkes-Barre-Scranton, Pa. (VOR)	3,500
(16) VOR Civil Airway No. 158, is added to read:		
Alden (Int), Iowa	Waterloo, Iowa (VOR)	*3,000
*2,300' - Minimum terrain clearance altitude		
(17) VOR Civil Airway No. 170, is added to read:		
Erie, Pa. (VOR)	Bradford, Pa. (VOR)	4,000
Bradford, Pa. (VOR)	Selinsgrove, Pa. (VOR)	4,000
Selinsgrove, Pa. (VOR)	Reinholds (Int), Pa.	4,000
Reinholds (Int), Pa.	West Chester, Pa. (VOR)	2,500
(18) VOR Civil Airway No. 161, is amended by adding:		
Des Moines, Iowa (VOR)	Waterloo, Iowa (VOR)	2,700
Waterloo, Iowa (VOR)	Rochester, Minn. (VOR)	2,500

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Glacier Park	Rapid City	WAC 139
Hawaiian Islands	San Francisco	WAC 269
Kootenai	Williston	WAC 305
Miles City	Seattle Local	

A new edition (or new chart) for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, danger area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: - Because of space limitation such items are cited only once. The erection or removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALEXANDER CITY-RUSSELL ARPT: N/S Strip closed-const. (10-25)
**ANDALUSIA MUNICIPAL ARPT: 250' (535'MSL) lgtd rdo twr erected 2 n mi W (270°T) at lat 31-19-12, long. 86-26-48. (11-5)
ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
**ANNISTON ARPT: 574' (2981' MSL) lgtd TV twr erected 6.1 n mi SSW 158°T) at lat 33-29-06 long. 85-48-32. (7-21)
BIRMINGHAM-RADIO: VOR courses 005°-035°; 075°-175° and 195°-265° usable. arpt apch course usable within 13 n mi; other courses not usable due to roughness and bends. (4-23)
**CHICKASAW ARPT: Abandoned. (10-1)
EUFAULA-WEEDON ARPT: Material and const equip. on N/S Rnwy. 1200' usable rnwy on either end E/W Rnwy - Caution. (11-15)
EVERGREEN-MIDDLETON FLD: Caution-vehicles and farm equip intermittently crossing rnwys and using taxi strips.
HUNTSVILLE-RADIO: VOR radials 20°-70°; 100°-130°; 150°-210°; 255°-270°, rough and unusable. Courses between rng and arpt unusable due to roughness, bends and signal cancellation. (10-7)
MOBILE-RADIO: VOR flgt-checked on arwy radials only.
MONTGOMERY-RADIO: DME coverage 130°-230°, 35 n mi at 1500'. (5-20)
**MONTGOMERY-DANNELLY FLD: 823' (1483' MSL) lgtd twr erected 17.4 n mi S (170°T) at lat 32-01-15; long. 86-20-56. (9-16)
MONTGOMERY-DANNELLY FLD: Rnwys 3-21 and 15-33 closed. Dips in E/W Rnwy 1500' from E end. (7-19) Use right hand traffic pattern Rnwy 9. (8-23) Acft lndg and taking off are cautioned to avoid the Maxwell AFB traffic pattern and control zone. (9-23) Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard Hanger. (10-8)
TUSKEGEE-MOTON FLD: Caution - pipeline across rnwy. (10-1)
ARIZONA: CHANDLER-WILLIAMS AFB-RADIO: USAF VHF/DF steers unreliable on inbound headings 300°-080°, below 7000' beyond 40 n mi from stn. (12-7)
COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11,000'.
DOUGLAS-BISBEE-DOUGLAS INTERNATIONAL ARPT: Pilots are cautioned to use maximum length of rnwys for landings and take-offs - due to obstructed view of ends. Take-offs from intersections of rnwys and taxiways prohibited.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: DME coverage 325°-50°, 43 n mi at 10,000', 50°-90°, 43 n mi at 5000'; 90°-180°, 43 n mi at 7000'; 180°-215°, 43 n mi at 4000'; 215°-235°,43n mi at 6000'; 235°-255°, 35 n mi at 6000'; 255°-270°, 43 n mi at 6000'; 270°-325°, 43 n mi at 8000'.
KINGMAN ARPT: Caution-intermittent target plane testing in vcnty. Rdo controlled acft operating in area NW of fld.
PRESCOTT-RADIO: VOR radials 185°-225° usable dist 35 n mi at 10,000', 135°-145° and 165°-185° usable dist 39 n mi at 10,000'.
TUCSON-RADIO: VOR and DME coverages lmtd to 35 n mi at 11,000', 0°-12°, 69°-72° and 330°-346°;26 n mi at 11,000', 44°-69° and 346°-0°. (7-9) June 14, LF rng shut down for indefinite period - relctn.
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF/DF lmtd in rng to 30 n mi in quads containing inbound headings of 150°-210° and 245°-275°; rng 50 n mi other quads; steers unreliable below 13,000' all quads. (12-23) USAF UHF/DF unreliable 170-270° below 14,500' at 40 n mi; unreliable at min en route alts all quads. UHF/DF inop 0800-0900 each Wed. (2-3)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (2-3)
ARKANSAS: FAYETTEVILLE ARPT: Men and equip on fld daylgt hrs. (8-13)
HARRISON ARPT: New NW/SE Rnwy under const. Fld clsd for ngt operns. (3-10)
TEXARKANA-RADIO: VOR 143° radial to Rnwy 13 beyond tolerance due to roughness and bends. (6-10) DME coverage 1900', 43 n mi in all quads.
WALNUT RIDGE-RADIO: VOR radials 290°-320° and 120°-150° have severe bends and course roughness. (4-14)
CALIFORNIA: ARCATA-RADIO: Oct 27, ILS shut down until approx Nov 16 - modernization.
ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.
BAKERSFIELD-RADIO: VOR has slight to moderate scalloping in SE quad 80°-123°. Radials 0, 90, 100, 130, 140, 150, 220, 270, 300 and 330° flgt-checked.
BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 180°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 5000'; 293°-310°, 26 n mi at 9000', 310°-327°, 35 n mi at 9000'. Nov 8, LF rng INSACS shut down until approx Dec 20. (11-5)
BRAWLEY ARPT: E/W Rnwy clsd-construction. (4-30)
CANOGA PARK-RADIO: About Nov 16, H fac ident will be changed to OGA. (11-9)
CORNING ARPT: Closed winter months. (11-11)
CULVER CITY-HUGHES ARPT: Const W end Rnwy 22. Overrun area W of paved Rnwy unusable. (10-29)
CRESENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'. (9-15)
DAGGETT- RADIO: VOR 113.2 mc. Only arwy radials flgt-checked.
EDWARDS AFB-RADIO: USAF LF rng courses have splits and multiples, unreliable beyond 35 n mi. (4-14)
EUREKA COUNTY ARPT: All lgtg fac inop. Length of surfaced rnwy reduced to 1400' and grass strip clsd. Const in progress on and adj to arpt. Caution - use at own risk. (5-29)
FILLMORE-RADIO: DME and VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17) DME shut down. (10-28)
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000';30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked. (6-16)
FRESNO AIR TERMINAL: Rnwy 7-25 closed until approx April 1, 1955. (9-15)
FURNACE CREEK ARPT, SITE 17, RIV-TDL: Fld closed, const. Mrkd. (8-13)
GASQUET ARPT: N side of strip clsd-const.
KLAMATH-McBETH FLD: Closed-high vegetation. (7-27)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000', 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16)
LONG BEACH ARPT: Several 230' MSL portable oil derricks W of fld. (10-15)
LONG BEACH-EAST LONG BEACH ARPT: Caution - const W side NE/SW Rnwy and S side E/W Rnwy. Land W and N sides respectively. (7-23)
LOS ANGELES-RADIO: VAR visual courses not usable - moderate scalloping N sector.
LOS ANGELES INTERNATIONAL ARPT-TOWER: About Nov 15, ASR will be shut down for approx 4 months - modernization. (10-18)
LOS ANGELES INTERNATIONAL ARPT: FIDO testing at irregular intervals. Due to non-visibility twr unable to ctl tfc on first 300' and last 600' of Rnwy 34 and last 1000' of Rnwy 29. Equip. on and adj to const areas. (6-4)
**MARYSVILLE-CHEIM ARPT: Abandoned. (11-4)
NEEDLES-RADIO: VOR 35 n mi coverage from 5°-15° and 190°-205° at 8000' and 50° radial at 10,000'.
OAKLAND: Pilots proposing transbay flgt should ascertain that VFR wea exists within both the San Fransisco and Oakland Control Zones or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of the fld. Exercise extreme caution in these areas. (11-16-54)

CALIFORNIA: OAKLAND-RADIO: VOR maximum usable dist 35 n mi N thru E at min inalt

CALIFORNIA: STOCKTON ARPT: Rnwy 11-29 clsd. Lgts avail on rnwy 16-34 only. Caution.

CALIFORNIA: OAKLAND-RADIO: VOR maximum usable dist 35 n mi N thru E at min instr alt. (1-14) DME coverage 80°-120°, 43 n mi at 6000'; 120°-175°, 43 n mi at 5000'; 175°-280°, 43 n mi at 4000'; 280°-290°, 35 n mi at 4000'; 290°-305°, 43 n mi at 4000'; 305°-340°, 43 n mi at 6000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'; 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'. (6-3)

OCEANSIDE-HI HI SKY RANCH ARPT: Caution ditch in center of strip. (7-8)

ONTARIO-RADIO: DME coverage 0°-90°, 43 n mi at 13,000'; 90°-135°, 43 n mi at 9000'; 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 280°-300°, 43 n mi at 9000'; 300°-330°, 43 n mi at 13,000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. (6-12)

ONTARIO-INTERNATIONAL ARPT-TOWER: ILS LOM reported unreliable for navigational purposes durg hrs of darkness due strong heterodyne interference Mexicali H fac.(5-26) ILS LMM unreliable for navigational purposes beyond 5 s mi due interference Oxnard AFB H fac. (11-2)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'.

PASO ROBLES-RADIO: DME coverage 315°-45°, 43 n mi at 7000'; 45°-105°, 43 n mi at 5000';105°-125°, 43 n mi at 6000'; 125°-190°, 43 n mi at 5000'; 190°-220°, 43 n mi at 6000'; 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'; 270°-315°, 43 n mi at 5000'. (6-15)

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000';208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'; 235-360°, 43 n mi at 10,000'. (6-14)

RIALTO-MORROW ARPT: Closed on Sunday-Drag races. (7-28)

SACRAMENTO-RADIO: VOR usable dist 245°-260°, 39 n mi at 3000'. (6-1) DME coverage 10°-100°, 43 n mi at 9000'.

SACRAMENTO-McCLELLAN AFB-RADIO: USAF H fac unreliable beyond 15 mi. (5-20)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000';300°-20°, 43 n mi at 7000'. (5-27)

SAN DIEGO-RADIO: VOR has light to moderate scalloping in all quads. Arwy radials and radials 0, 80, 100, 140, 150, 270, 300, 310 and 320° flgt-checked.

SAN DIEGO-MIRAMAR NAS-RADIO: Navy LF rng shut down for relctn. (11-9)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 100°-120°, 43 n mi at 7000'; 120°-160°, 43 n mi at 6000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000';225°-265°, 26 n mi at 5000';265°-345°, 43 n mi at 5000'; 345°-10°, 35 n mi at 4000'. (6-15)

SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Sept 27, ASR shut down until approx Dec. 15 - modernization and move to new twr. (11-1) FLD: Taxiway 1 paralleling rnwys 10R and 1L clsd. Equip on fld. A hump of 5'' rise in 75' developed across rnwy 10L-28R, 3000' from W end of rnwy. (2-3) 90' pile driver adj W end 28L mrkd, lgtd. (7-20) Effect. Oct. 18, tfc will be operg simultaneously on Victor 107 and Victor 25/27E in vcnty of San Francisco VOR, even though the center line of these arwys is 8.5 s mi apart. The usual dist. rqrd between the center line of two VOR Airways before lateral separation is considered to exist is 10 s mi. However due to the proximity of the Oakland VOR and San Francisco VOR facilities and the quality of the reception from these facilities, a waiver has been granted for this deviation from the 10 s mi requirement. Tfc information will be exchanged between any two aircraft simultaneously operg on Victor 107 and Victor 25/27E when the acft do not have time or altitude separation. In this connection, pilots should note that Victor 107 was recently realigned from Coalinga - San Francisco to Coalinga - Oakland. (10-14)

SAN RAFAEL-HAMILTON AFB-RADIO: USAF VHF/DF unreliable 340°- 135° clockwise below 11,000'. (2-26)

SANTA ANA-EL TORO MCAS-RADIO: Navy LF rng, ident NZJ, freq 407 kc, unreliable. Multiples all courses. Usable for homing only. (1-29)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000';30°-45°, 35 n mi at 9000'; 45°-80°, 43 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 95°-110°, 43 n mi at 4000'; 110°-260°, not checked;260°-325), 43 n mi at 7000'. (6-28) VOR has occasional interference. Caution advised. (10-11)

CALIFORNIA: STOCKTON ARPT: Rnwy 11-29 clsd. Lgts avail on rnwy 16-34 only. Caution.

UKIAH-RADIO: VOR usable dist 20°-40°, 35 n mi at min instr alts. (6-23)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045° below 15,000'. USAF UHF/DF steers unreliable 230°-060° clockwise below 15,000' (3-2) USAF UHF/DF trng status only. (6-24)

COLORADO: CHEYENNE WELLS ARPT: Caution-ditches across landing strips. (6-18)

COLORADO SPRINGS-PETERSON FLD: Beacon inop. (9-14)

DENVER-LOWRY AFB-RADIO: USAF VHF/DF steers unreliable inbound at 25 n mi below 10,5000' on Amber 3; below 8500' on Red 1 and Red 6. (9-1)

DENVER-STAPLETON AIRFLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc.(5-27)

KREMMLING ARPT: Closed-construction. Emergency lndg of lgt acft may be made on N shoulder on E half of rnwy. (7-27)

PUEBLO: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long. 104-18-00, conducting demolition work-days.

**STERLING-LOGAN COUNTY ARPT: 764' lgtd TV twr erected 6.1 n mi ENE (72°T) at lat 40-38-05; long 103-08-15.)9-15)

CONNECTICUT: BETHANY ARPT: E side fld soft - flagged. Use at own risk. (4-1)

HARTFORD-BRAINARD FLD: Rnwy 15-33 closed.

SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.

WILTON-RADIO: DME coverage 015°-050°, 43 n mi at 2500'; 050°-180°, 43 n mi at 2000'; 180°-270°, 43 n mi at 2500'; 270°-285°, 35 n mi at 3000'; 285°-320°, 43 n mi at 3000'; 320°-360°, 35 n mi at 3000'; 360°-015°, 35 n mi at 2500'. VOR has minor bends in SW quad out to 17 n mi.

DELAWARE: GEORGETOWN-SUSSEX COUNTY ARPT: Use extreme caution NNE/SSW and NNW/SSE rnwys not recommended for hvy acft. Men and equip. on fld. (6-11)

DIST. OF COLUMBIA: WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3 to 3.5°S. TVOR min en route alt coverage restrictions as follows: 265°-90°, 26 n mi; 90°-180°, 22 n mi; 180°-265°, 17 n mi. LF rng has auto voice ident on test basis. (8-10)

★WASHINGTON NATIONAL ARPT-TOWER: ASR PPI apchs not authorized. (11-3) FLD: USAF, NAVY, CG: Clsd to all acft xcpt; (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral.(b) Scheduled MATS. (c)Flgts rqrg customs and immigration service. (d) Navy and C.G. logistic support flgts. (CG logistic flgts not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., C.G. and will be flown VFR conditions only). NO acft over 120,000 lbs without prior approval arpt director. CG acft taxi to CG Hangar #6 S of Admin Bldg. Navy acft taxi to MATS terminal N of Admin. Bldg. GENERAL: Hvy const equip. operg daylgt hrs in arpt areas bounded by taxiway 10N, W side of intsxn Rnwys 18-36, 3-21 thence SW parallel to Rnwy 3-21 200' W to S bndry of arpt thence NE along S and terminal apron to ta xiway 10N. Taxiway 10S and Rnwy 9-27 clsd to all tfc. Hvy equip. crossing Taxiway 6 and Rnwy 9-27. Extreme caution when taxiing adj to and through const area. (10-8) Hvy equip. will be operg in marsh area S of Rnwy 3-21. Rnwy 3-21 clsd durg daylgt hrs. (10-11)

FLORIDA: CROSS CITY ARPT, 58, MEM-TPA: Unlgtd trees penetrate standard appch zone to Rnwy 31 - use caution at ngt. (10-20)

DAYTONA BEACH-RADIO: VOR flgt-checked on arwy radials only.

★FORT LAUDERDALE-BROWARD CO. INTERNATIONAL ARPT-TOWER: Nov. 1, ctl twr cmsnd. Trans: 272 kc; 121.3. Rcvs: 3023.5 kc, 121.3, 121.5, 122.5 mc. Voice call: Fort Lauderdale Tower. Hrs of opern: 0700-2300. Class: C1.

FT. MYERS-RADIO: VOR flgt-checked on arwy radials only. (8-18) Nov 15, VOR shut down for approx 45 days - modernization and installation of 4 loop antenna array. (11-5)

**HOLLYWOOD ARPT: Abandoned. (10-14)

HOMESTEAD-RADIO: Hvy tfc E and W courses LF rng 2500' and below. Caution - E course below 1000' within 4 n mi Homestead AFB acct jet acft practicing carrier type lndgs during daylgt hrs.

**HOMESTEAD ARPT: 125' (133' MSL) lgtd rdo twr erected 2 n mi SW(225°T) at lat. 25-27-30; long. 80-28-45. (10-29)

ROCK SPRINGS-RADIO: Nov 15, ILS shut down for approx 3 weeks-modernization.(11-15)
ROCK SPRINGS ARPT: Caution-first 500' NW end NW/SE Rnwy clsd-mrkd.(9-10)
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.(4-26)

(11-16-54)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator (FPDI) centered the omnibearing selector should read 0° with the to-from indication being "From" or the omnibearing selector should read 180° with the to-from indication read "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ± 4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of Oct. 19, 1954, check points or facilitites have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 112.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

(NOTE: ALL DISTANCES ARE IN STATUTE MILES.)

VHF OMNIRANGE (VOR) PROCEDURES

When a VOR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY FREQ. IDENT PROCEDURE NO.	INITIAL APPROACH TO FACILITY FROM	CRS. AND DIST.	MIN. ALT.	PROCEDURE TURN: I. I SIDE OF FINAL APCH. CRS. LOW FREQUENCY RANGE PROCEDURES

When an LFR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY FREQ., IDENT. PROCEDURE NO.	INITIAL APPROACH TO FACILITY FROM	CRS. AND DIST.	MIN. ALT.	PROCEDURE TURN: ( ) SIDE OF FINAL APCH. CRS. Amendment 5 to Regulations of the Administrator, Part 620 establishes the northern boundary of the Pacific (coastal) ADIZ along the 48°30' north parallel. It is understood that the Canadian Vancouver CADIZ will be redesignated to form a common boundary with the U.S. Pacific (Coastal) ADIZ in this area. Both redesignations are scheduled to be effective December 1, 1954.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic. (7-19) = Hours of operation, i.e., 0700-1900
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(11-30-54)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar RAPCON = Radar Approach Control Center

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Flight Information Manual.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below as well as in "Air Navigation Radio Aids" section under proper location.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When a receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: This service to aircraft encountering severe weather condition may be obtained by requesting radar advisory through an appropriate ground station or direct ARTC communication. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY." All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas: Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles and the Knoxville Air Defense Identification Zone.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc and 3023.5 kc. Transmit and guard 121.5 mc all locations.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. *-Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.

(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course

√ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D.C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

√ AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) .-.. --. -... (LGB in Code).

For omniranges, as in the example given above, the normal voice identification consists of the name of the omni followed by the word "omni". However, if the omnirange is unattended, that is, if no facility for providing air-ground communications services is associated with the omnirange, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

PRIVATE AIRCRAFT-TO-TOWER FREQUENCIES: Due to severe congestion on the frequency 122.5 mc in the New York City, Chicago and Los Angeles areas, it has become necessary to implement the frequency 122.7 mc at the New York (LaGuardia), Chicago (Midway), and the Los Angeles(International) Airport towers. Effective 0001 Local Standard Time, December 1, 1954, a guard on the frequency 122.7 mc will be established and simultaneously the guard on 122.5 mc will be discontinued at these three towers. Pilots of private aircraft intending to land at New York (LaGuardia), Chicago (Midway) or Los Angeles (International) Airports should be equipped to transmit on 122.7 mc. The emergency frequency 121.5 mc may be used temporarily to call these towers in the event it is not possible to obtain 122.7 mc by December 1.

IFR FLIGHT ABOVE TWENTY-NINE THOUSAND FEET: Effective November 1, 1954, the odd-thousand foot altitude levels will be used for IFR flights above 29,000 feet unless prior coordination has been effected with air traffic control This method of altitude assignment adopted in conjunction with the military request for two thousand feet altitude separation for all flights at or above 30,000 feet, is designed to permit a more orderly and expeditious flow of air traffic within the airspace affected.

SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Entry into and maneuvering within these patterns should be made a speeds within this tolerance as buffer zones have been provided only for these speeds. It is recommended that all aircraft adhere closely to these restrictions and if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS - The following abbreviations have been adopted for use in the Airman's Guide: "n miles" or "n mi" for nautical miles; "s miles" or " s mi" for statute miles.

"DANGER AREAS" TO BE CALLED "RESTRICTED AREAS" See below (this page). Effective December 9, 1954, Part 60 of the Civil Air Regulations is amended to provide, among other things, for the use of the term "Restricted Area" for what was formerly called "Danger Area" and for a definition of this term as well as that of "Prohibited Area" (somewhat similar to the former term "Airspace Restricted Area").

Restricted Areas (which are designated by the Administrator of Civil Aeronautics when he finds that a hazard to aircraft in flight exists) are defined as "airspace identified by an area on the surface of the earth within which the flight of aircraft, while not wholly prohibited, is subject to restrictions".

Prohibited Areas are defined as "airspace identified by an area on the surface of the earth within which the flight of aircraft is prohibited."

Avoidance of prohibited areas and operation within restricted areas strictly in accordance with the published restrictions are imperative to the safety of flight or the protection of the activity on the ground. Any person desiring to secure permission to fly in such areas contrary to the prohibition or the restrictions imposed, should contact the agency controlling that area. Prohibited and restricted areas, indicating the prohibitions or restrictions to flight and the name of the using agency, are carried in the Airman's Guide, appear in other publications of aids to air navigation and are depicted on aeronautical charts.

CAR 60 CHANGE AFFECTS VERTICAL CLEARANCE OVER CLOUDS: Effective November 10, 1954, paragraph 60.30 of CAR 60 has been revised to require 1,000 feet vertical clearance over clouds, instead of the 500 feet now required. Pilots filing IFR flight plans for on-top operation should specify "1000 on-top". Air traffic clearance phraseology will also be revised to specify "at least 1000 on-top" when clearing flights to operate on-top. There is no change in the cloud clearance requirement for flight below clouds.

LOCATION IDENTIFIERS: The following changes affect the use of location identifiers:

ANW	Ainsworth, Neb., Ainsworth Airport (Change from AIN)
CJR	Chena Intersection, Alaska, REP (Reinstatement)
CNI	Chena, Alaska, Radiobeacon (Name change)
FAF	Fort Eustis, Va., Felker AAF (Assignment)
GBX	Goose Bay, Alaska, Radiobeacon (Assignment)
LIZ	Limestone, Maine, Loring AFB (Name change)
UTS	Yuma Test Station, Ariz., Laguna AAF (Assignment)
VMY	Valdosta, Georgia, Moody Radiobeacon (Assignment)
YOA	Yoakum, Texas, Radiobeacon (Change from Intermediate Field)

AIR ROUTE TRAFFIC CONTROL BOUNDARY: Effective immediately. The CLEVELAND-PITTSBURGH ARTC boundary on V92 is established 40 statute miles northwest of Wheeling VOR along south edge V92 to east edge Blue 81.

AIRMAN's GUIDE CORRECTIONS: Correct Volume 9, No. 17, dated November 2, 19 as follows: (1) Page 29, Item 1 under Flight Information Manual Corrections - should read: Page 22 under Maine, change Augusta CAA telephone number to read: Augusta 3-4191. Corre Volume 9, No. 18 dated November 16, 1954 as follows: (1) Page 14 -change Oklahoma City Radar Approach Control Center-Tower to read: "Oklahoma City Radar Air Traffic Control Center", correct line 10 of this item by changing "Victor Airway 75" to read "Victor airway 77".

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 8, dated May 25, 1954 as follows:

(1) Page 10 under "A" add ACV - Arcata, California - R - 209.

(2) Page 22 under Indiana change Goshen CAA telephone number to read: 3-1905.

(3) Page 22 under Iowa change Des Moines -WB telephone number to read: 4-0986 effective December 10, 1954.

DANGER AREA (RESTRICTED AREA) AMENDMENTS: The following Danger Area (Restricted Area) Amendments shallbe effective as dated, unless otherwise advised;

AMENDMENT NO. 98 to PART 608-DANGER AREAS (Restricted Area (December 9, 1954)

Effective December 9, 1954, Part 60 of the Civil Air Regulations is amended by the Civil Aeronautics Board to provide, among other things, for a change in terminology from "Danger Area" to "Restricted Area". In conformity, Part 608 of the Regulations of the Administrator is hereby amended by substituting "Restricted Area" or "Restricted Areas" for "Danger Area" or "Danger Areas", respectively, wherever such terminology appears in that Part. In addition, the prefix "D" (for "Danger Area") of the identification number which appears in the "Name and Location" column of each Danger Area is changed to "R" (for "Restricted Area") in accordance with the foregoing change.

AMENDMENT NO. 99 to PART 608-DANGER AREAS (RESTRICTED AREAS)
(December 15, 1954)

(1) In Section 608.61, the Kodiak Island, Alaska area (R-350, formerly D-350), published on July 16, 1949, in 14 F.R 4298 and amended on August 25, 1954, in 19 F.R. 5394 is redesignated as follows: Name: Kodiak Island, Alaska; Description: From latitude 57°28', longitude 151° 25'; to latitude 57°18', longitude 151°05'; to latitude 56°53', longitude 151°48'; to latitude 57° 03', longitude 152°08' to point of beginning. Altitude: Surface to 10,000 feet MSL. Time: 0800 to 1700 daily. Using Agency: Alaska Sea Frontier.

AMENDMENT NO. 100 to PART 608-DANGER AREAS(RESTRICTED AREAS)
(December 10, 1954)

((1) In Section 608.24, the Manhattan, Kansas, area (R-197, formerly D-197), published on July 16, 1949, in 14 F.R. 4291, on June 20, 1953, in 18 F.R. 3561, on September 10, 1954, in 19 F.R. 5861, and on October 9, 1954, in 19 F.R. 6513 is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at latitude 39°13' 00", longitude 96°49'42", thence to latitude 39°13'00", longitude 96°42'35"; thence to latitude 39°12'17", longitude 96°40'55"; thence to latitude 39°10'43", longitude 96°40'55"; thence to latitude 39°09'23", longitude 96°43'00"; thence to latitude 39°06'20", longitude 96°43'00"; thence to latitude 39°04'24", longitude 96°47'30"; thence to latitude 39°04'24", longitude 96° 52'22"; thence to latitude 39°07'54", longitude 96°49'42"; thence to latitude 39°13'00", longitude 96°49'42" to point of beginning.

ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are designated, redesignated, redescribed, changed or cancelled as indicated:

DESIGNATED

(1) PEABODY, KANSAS INTSXN - the intersection formed by the back course Wichita, Kansas, ILS, and Hutchinson, Kansas, 068°magnetic OMNI radial (Victor 10).

(2) FAIRLAWN INTSXN - intersection Youngstown 260° magnetic and Cleveland 122° magnetic radials. (Formerly Falls Intersection).

(3) PINOS (VHF) INTSXN - the intersection of the 316° radial magnetic of the Fillmore, California VOR and the 050° radial magnetic of the Santa Barbara, California., VOR.

(4) HINES (VHF) INTSXN - the intersection of the 316° radial magnetic of the Fillmore, Calif., VOR and the 075° radial magnetic of the Santa Barbara, Calif. VOR.

(5) HENDERSON (VHF) INTSXN- the intersection of the 268° radial magnetic of the Fillmore, Calif., VOR and a 125° magnetic bearing to the Camarillo, Calif. LFR.

(6) MARICOPA (VHF) INTSXN- the intersection of the 136° radial magnetic (en route V-107) of the Coalinga, Calif., VOR and the 194° radial magnetic of the Bakersfield, Calif.VOR.

(7) GALT (VHF) INTSXN - the intersection of the 128° radial magnetic of the Sacramento, Calif., VOR and a 350° magnetic bearing to the Mather, Calif. "H" facility

(8) BROOKS (VHF) INTSXN - the intersection of the 275° radial magnetic of the Sacramento, Calif., VOR and the south course of the Williams, Calif. LF range.

(9) TAHOE (VHF) INTSXN - the intersection of the 037° radial magnetic of the Sacramento, Calif., VOR and a 350° magnetic bearing to the Donner Summit "H" facility.

(10) COLOMA (VHF) INTSXN - the intersection of the 037° radial magnetic of the Sacramento, Calif., VOR and the 346° radial magnetic of the Modesto, Calif., VOR.

(11) AUBURN (VHF) INTSXN - the intersection of the 022° radial magnetic of the Sacramento, Calif., VOR and the 337° radial magnetic of the Modesto, Calif., VOR.

(12) FOLSOM (VHF) INTSXN - the intersection of the 037° radial magnetic of the Sacramento, Calif., VOR and the 334° radial magnetic of the Modesto, Calif. VOR.

(13) RICE (VHF) INTSXN- the intersection of the 040° radial magnetic of the Albuquerque New Mexico VOR and the north course of the Albuquerque ILS localizer.

(14) LOMA (VHF) INTSXN - the intersection of the 342° radial magnetic of the Grand Junction, Colorado VOR and the Grand Junction ILS localizer course.

(15) HEREFORD (VHF) INTSXN - the intersection of the 116° radial magnetic of the Cheyenne, Wyo., VOR and the 360° radial magnetic of the Denver, Colo., VOR.

(16) ALBIN (VHF) INTSXN - the intersection of the 278° radial magnetic of the Sidney, Nebraska VOR and the 042° radial magnetic of the Cheyenne, Wyo., VOR.

(17) BEAR CREEK (VHF) INTSXN - the intersection of the 094° radial magnetic of the Rock River, Wyo., VOR and the 333° radial magnetic of the Cheyenne, Wyo., VOR.

(18) CARR (VHF) INTSXN - the intersection of the 118° radial magnetic of the Laramie, Wyo., VOR and the 206° radial magnetic of the Cheyenne, Wyo., VOR.

(19) CADOTT, WISCONSIN INTSXN - the intersection of the 006° magnetic radial of the LaCrosse, Wisconsin, Omnirange and the 088° magnetic radial of the Eau Claire, Wisconsin, Omnirange.

REDESIGNATED

(1) HARVEY (VHF) INTSXN- the intersection based on 268° radial magnetic of the Fill-

more, Calif., VOR and the north course of the Camarillo, Calif., LF range.

REDESCRIBED

(1) NEW ALEXANDRIA INTSXN - intersection 072° magnetic radial Pittsburgh, Pa., VOR and 025° magnetic radial Morgantown, West Virginia VOR.

CHANGE

(1) WEILER (VHF) INTSXN - the intersection of the north course of the Albuquerque, New Mexico ILS localizer and the 026° radial magnetic of the Albuquerque VOR. (this intersection was formerly named Alameda Intersection on aeronautical charts).

CANCEL

(1) McINTYRE INTSXN.

CIVL AIRWAYS, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective December 21, 1954, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red civil airway No. 63(Battle Creek, Mich., to the United States-Canadian Border) is amended by changing the last portion to read: "That airspace over United States territory from the intersection of the north course of the Detroit, Mich., radio range and a line bearing 261° true from the Sarnia, Ont., Can., non directional radio beacon to the Sarnia, Ont., Canada non directional radio beacon."

(2) Blue civil airway No. 41 (Hartford, Conn., to United States-Canadian Border) is amended by changing last portion to read: "From the Rockland, Maine non directional radio beacon via the Bangor, Maine radio range station to the intersection of the northeast course of the Bangor, Maine radio range and the United States-Canadian Border." (Note: above adds portion between Rockland and Bangor).

(3) Blue civil airway No. 46 (Memphis, Tenn., to Paducah, Ky.) is amended to read: "From the Memphis, Tenn., radio range station via the intersection of the north course of the Memphis, Tenn., radio range and a line bearing 230° true from the Dyersburg, Tenn., non direction radio beacon; Dyersburg, Tenn., non direction radio beacon to the Paducah, Ky., non direction radio beacon."

(4) Blue civil airway No. 55 (Crestview, Fla., to Montgomery, Ala.) is amended to read: "From the Crestview, Fla., radio range station via the intersection of the north course of the Crestview, Fla., radio range and the southwest course of the Maxwell AFB,Ala., radio range to the Maxwell AFB, Ala., radio range station."

(5) Blue civil airway No 81 (Charleston, W. Va., to Akron, Ohio) is amended by changing the caption and further amended to read: "From the Charleston, W.Va., radio range station via the Zanesville, Ohio non directional radio beacon; Akron, Ohio radio range station to the intersection of the north course of the Akron, Ohio radio range and the east course of the Cleveland, Ohio range." (Note: Above change delete the portion of Blue 81 between the intersection of the southeast Sarnia, Ont., range and east Cleveland range courses and the U.S.-Canadian Border. Canada portion being deleted also. Canada has been requested to delete the Chatham Intersection as compulsory reporting point and redesignate the Ridgetown Intersection as compulsory instead of on-request).

CONTROL AREAS: (1) Blue civil airway No. 81 is amended by changing the caption to read: "(Charleston, W. Va., to Akron, Ohio)".

CONTROL AREA EXTENSIONS: (1) (Tri-City, Tenn.) is amended to read: "That airspace within a 28 statute mile radius of the Tri-City radio range lying in the east quadrant of the radio range, and the airspace south of the radio range station bounded on the northwest by Green Civil airway No. 5., on the northeast by VOR civil airway No. 53 and on the south by a line 5 statute miles south of and parallel to the 274° true radial of the Tri-City omnirange station."

(2) (Tucson, Arizona) is revoked.

(3) (Key West, Fla.) is amended by adding the following to present control area extension "and within 5 statute miles either side of the west course of the Key West radio range extending from the radio range station to a point 12 statute miles west."

(4) (Childress, Texas) is added to read: "Within 5 statute miles either side of the 182° true radial of the Childress omnirange extending from the omnirange station to a point 15 statute miles south."

(5) (Abilene, Texas) is added to read: "Within 5 statute miles either side of the 292° true radial of the Abilene omnirange extending from the omnirange station to a point 10 statute miles west."

(6) (Cotulla, Texas) is added to read: "Within 5 statute miles either side of lines bearing 140° true and 320° true from the Cotulla non directional radio beacon extending from VOR civil airway No. 17 to a point 10 s miles northwest of the nondirectional radio beacon."

(7) (Dalhart, Texas) is added to read: "Within 5 statute miles either side of the 04° true radial of the Dalhart omnirange extending from the omnirange station to a point 10 statute miles north."

(8) (Lufkin, Texas) is added to read: "Within 5 statute miles either side of the 157° true radial of the Lufkin omnirange extending from the omnirange station to a point 10 statute miles southeast, and within 5 statute miles either side of a line bearing 304° true extending from the Lufkin non directional radio beacon to a point 10 statute miles northwest."

(9) (Texarkana, Ark.) is added to read: " Within 5 statute miles either side of the 332° true radial of the Texarkana omnirange extending from the omnirange station to a point 10 statute miles northwest."

(10) (Walnut Ridge, Ark.) is added to read: "Within 5 statute miles either side of the 244° true radial of the Walnut Ridge omnirange extending from the omnirange station to a point 10 statute miles southwest."

(11) (Gage, Okla.) is added to read: "Within 5 statute miles either side of the 299° true radial of the Gage omnirange extending from the omnirange station to a point 20 miles northwest."

(12) (Wink, Texas) is added to read: "That airspace south of Wink bounded by lines beginning at latitude 31°30'00", longitude 102°47'00" thence southwestward to latitude 31° 24'00", longitude 103°01'40" thence northwestward to latitude 31°30'00", longitude 103°07' 00" and bounded on the north by VOR civil airway No. 66; that airspace northwest of Wink bounded on the east by VOR civil airway No. 79, on the south by VOR civil airway No. 16N and on the northwest by the arc of a circle lying within a 20 statute mile radius of the Wink omnirange station."

(13) (Greensboro, N.C.) is added to read: "That airspace southeast of Greensboro bounded on the south by latitude 35° 19'00", on the northwest by the Greenville-Charlotte-Greensboro control area extension, on the northeast by Red civil airway No. 104 and on the southeast by a line extending from a point at latitude 35°32'00", longitude 79°05'20" to a point at latitude 35°19'00", longitude 79°23'30"."

(14) (Myrtle Beach, S.C.) is added to read: " Within 5 statute miles either side of a line bearing 198° true extending from the Myrtle Beach non directional radio beacon to a point 10 statute miles south."

(15) (Wilmington, N. C.) is added to read: "Within 5 statute miles either side of a line bearing 337° true extending from the Wilmington non directional radio beacon to a point 10 statute miles northwest and within 5 statute miles either side of a line bearing 159° true extending from the Wilmington ILS middle marker to a point 15 statute miles southeast of the middle marker." (Note: Middle Marker located at latitude 34°15'12" longitude 77°53'50".)

(16) Five-statute mile radius zones is amended by deleting the following airport: Texarkana, Ark., Texarkana Airport.

CONTROL ZONES: (1) (Wilmington, N.C.) is amended to read; "Within a 5 statute mile radius of the New Hanover County Airport, within 2 statute miles either side of a line bearing 337° true extending from the Wilmington non directional radio beacon to a point 10 statute miles northwest and within 2 statute miles either side of a line bearing 159° true extending from the ILS middle marker to a point 12 statute miles southeast of the middle marker."

(2) (Charlotte, N. C.) is amended to read: "Within a 5 statute mile radius of Douglas Airport, within 2 statute miles either side of the south course of the Charlotte radio range extending from the radio range station to the Fort Mill fan marker, and with 2 statute miles either side of the Charlotte ILS localizer course extending from the localizer to a point 10 statute miles southwest of the outer marker."

(3) (Tampa, Fla.) is amended by adding the following portion to present control zone: "and that airspace within 5 statute miles either side of a direct line extending from the Pinellas County Airport to the Tampa International Airport."

(4) (Abilene, Texas) is amended to read; "Within a 5 statute mile radius of the New Municipal Airport, within 2 statute miles either side of the north course of the Abilene radio range extending from the radio range station to a point 10 miles north, within 2 statute miles either side of a direct line extending from the Abilene radio range station to and including a 3 statute mile radius of the Abilene AFB, within 2 statute miles either side of the 292° true radial of the Abilene omnirange station extending from the omnirange station to a point 5 statute miles west, within 2 statute miles either side of the 174° true and 354° true radials of the Abilene omnirange extending from the AFB to a point 10 miles north of the omnirange station, and within 2 statute miles either side of the 112° true radial of the omnirange extending from the omnirange station to the New Municipal Airport 5 statute miles radius zone.

(5) (Fort Smith, Ark.) is amended by adding the following to present control zone: "and within 2 statute miles either side of the 81° true course of the Fort Smith ILS localizer extending from the airport to a point 12 statute miles east."

(6) (Childress, Texas) is added to read: "Within a 3 statute mile radius of Childress, Airport and within 2 statute miles either side of the 02° and 182° true radials of the Childress omnirange extending from the 3 statute mile radius zone to a point 10 statute miles south of the omnirange station."

(7) (Cotulla, Texas) is added to read: "Within a 3 statute mile radius of Cotulla Airport within 2 statute miles either side of a line bearing 320° true extending from the Cotulla non directional radio beacon to a point 10 statute miles northwest, and within 2 statute miles either side of the 265° true and 85° true radials of the Cotulla omnirange extending from the 3 statute miles radius zone to a point 10 statute miles east of the omnirange station."

(8) (Dalhart, Texas) is added to read: "Within a 3 statute mile radius of Dalhart Municipal Airport, within 2 statute miles either side of a line bearing 132° true extending from the Dalhart non directional radio beacon to a point 10 statute miles southeast and within 2

statute miles either side of the 184° and 04° true radials of the Dalhart omnirange extending from the airport to a point 10 statute miles north of the omnirange station."

(9) (Lufkin, Texas) is added to read: "Within a 3 statute miles radius of Angelina Airport, Lufkin, Tex., within 2 statute miles either side of a line bearing 157° true extending from the airport to a point 14 statute miles southeast, and within 2 statute miles either side of a line bearing 304° true extending from the Lufkin non directional radio beacon to a point 10 statute miles northwest."

(10) (Texarkana, Ark.) is added to read: "Within a 5 statute mile radius of the Texarkana Municipal Airport, within 2 statute miles either side of the 332° true radial of the Texarkana omnirange extending from the omnirange station to a point 10 statute miles northwest, and within 2 statute miles either side of the north course of the Texarkana radio range extending from the radio range station to a point 10 statute miles north."

(11) (Walnut Ridge, Ark.,) is added to read: "Within a 3 statute mile radius of Walnut Ridge Airport and within 2 statute miles either side of the 244° true radial of the Walnut Ridge ominrange extending from the omnirange station to a point 10 statute miles southwest."

(12) (Hobart, Okla.) is added to read: "Within a 3 statute mile radius of Hobart Airport and within 2 statute miles either side of a line bearing 183° true extending from the airport to a point 12 statute miles south."

(13) (Brunswick, Ga.) is added to read: "Within a 5 statute mile radius of NAAS Glynco, Brunswick, Ga., and with 2 statute miles either side of the northeast course of the Glynco (Navy) radio range extending from the radio range station to a point 10 statute miles northeast excluding the portion which overlaps the McKinnon Airport control zone, Brunswick, Ga."

REPORTING POINTS: (1) Green civil airway No. 3 (San Francisco, Calif., to New York, N.Y.) is amended by deleting the following reporting point: "the intersection of the southwest course of the New York (LaGuardia) N.Y., radio range and the northwest course of the Floyd Bennett, N.Y. (Navy) radio range."

(2) Blue civil airway No. 81 is amended by changing the caption to read: "(Charleston, W. Va., to Akron, Ohio)."

✓ MINIMUM EN ROUTE IFR ALTITUDES: Effective December 21, 1954, minimum en route IFR altitudes are amended as follows:

From	To	Min Alt.
(1) Green civil airway No. 5, is amended to read in part:		
Sulphur Springs, Tex.(LF/RBN)	Redwater,(Int), Tex.	1,700
Redwater (Int), Tex.	Texarkana, Ark.(LFR)	1,800
(2) Amber civil airway No. 4, is amended to read in part:		
Clifton (Int), Tex.	Stadium (Int), Tex.	2,100
(3) Red civil airway No. 1, is amended to read in part:		
Baker, Oregon (LFR)	Boise, Idaho (LFR)	9,000
Payette, Idaho (FM)	Boise, Idaho (LFR) (SE-bound only)	5,500
(4) Red civil airway No. 31, is amended to read in part:		
Rapid City, S.Dak. (LFR)	Int. E crs. Rapid City (LFR) & SW crs. Pierre, S. Dak. (LFR)	4,400
Int. E crs Rapid City (LFR) & SW crs Pierre, S. Dak. (LFR)	Pierre, S. Dak. (LFR)	3,500
(5) Red civil airway No. 46, is added to read:		
U.S. Canadian Border	Minot, N. Dak. (LFR)	4,000
Minot, N. Dak. (LFR)	Jamestown, N. Dak. (LFR)	3,400
(6) Blue civil airway No. 13, is amended to read in part:		
Shreveport, La. (LFR)	Texarkana, Ark. (LFR)	1,800
(7) Blue civil airway No. 68, is amended to read:		
Midland, Tex. (LFR)	Midland (Int), Texas	4,000
(8) VOR civil airway No. 3, is amended to read in part:		
Brunswick, Ga. (VOR) Direct or E alter.	Savannah, Ga. (VOR) Direct or E alter.	1,500
Savannah, Ga. (VOR) Direct or W alter.	Charleston, S. C. (VOR) Direct or W alter.	1,200
Miami, Fla. (VOR)	West Palm Beach, Fla. (VOR)	1,500
(9) VOR civil airway No. 4, is amended to read in part:		
Baker, Oregon (VOR)	Boise, Idaho (VOR)	9,000
Payette, Idaho (FM)	Boise, Idaho (VOR) (SE-bound only)	5,500
(10) VOR civil airway No. 7, is amended by adding:		
Nashville, Tenn. (VOR)	Lewisburg (Int), Ky.	*4,600
*2,500' - Minimum terrain clearance altitude		
Lewisburg (Int), Ky.	Evansville, Ky. (VOR)	*3,000
*2,500'-Minimum terrain clearance altitude		
(11) VOR civil airway No. 12, is amended to read in part:		
Pittsburgh, Pa. (VOR)	*Latrobe (Int), Pa.	3,000
*4,000' - Minimum crossing altitude at Latrobe (Int), E-bound		
Latrobe (Int), Pa.	Altoona (Int), Pa.	4,500
Altoona (Int), Pa.	Harrisburg, Pa. (VOR)	4,000
(12) VOR civil airway No. 13, is amended to read in part:		
Shreveport, La. (VOR)	Texarkana, Ark. (VOR)	1,800
(13) VOR civil airway No. 14, is amended to read in part:		
Neosho, Mo. (VOR)	Springfield, Mo. (VOR)	2,400
Via N alter.	Via N alter.	2,500
Via S alter.	Via S alter.	2,600
(14) VOR civil airway No. 15, is amended to read in part:		
Little Elm (Int), Texas	Sanger (Int), Texas	
Via W alter.	Via W alter.	*2,400
*1,800' - Minimum terrain clearance altitude		
(15) VOR civil airway No. 27, is amended to read in part:		
Salinas, Calif. (VOR)	Lightship (Int), Calif.	5,000
Lightship (Int), Calif.	Ukiah, Calif. (VOR)	6,000
(16) VOR civil airway No. 42, is amended to read in part:		
Atwater (Int), Ohio	Sebring (Int), Ohio	*3,700
*2,500' - Minimum terrain clearance altitude		
(17) VOR civil airway No. 114, is amended to read in part:		
Wichita Falls, Texas (VOR)	Sanger, (Int), Texas	
Via N alter.	Via N alter.	*2,700
*2,500' - Minimum terrain clearance altitude		
Sanger (Int), Texas	Little Elm (Int), Texas	
Via N alter.	Via N alter.	*2,400
*1,800' - Minimum terrain clearance altitude		
Little Elm (Int), Texas	Dallas, Texas (VOR)	
Via N alter.	Via N alter.	2,000
Dallas, Texas (VOR)	Gregg County, Texas (VOR)	2,300
Gregg County, Texas (VOR)	Shreveport, La. (VOR)	1,800

✓ AL 320 ILS CHART CORRECTION: Add the following Caution Note to AL 320 ILS Philadelphia International Airport, Pennsylvania Chart dated November 26, 1954: "500-1 straight-in ILS minimums required when glide slope is inoperative."

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Albany	Milwaukee	WAC 216
Butte	Twin Cities	WAC 217
Casper	Detroit Local	RC 2209
Detroit	San Juan Local	RC 2210
Green Bay	WAC 215	

A new edition (or new chart) for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported
** - New or revised airport, danger area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: - Because of space limitation such items are cited only once. The erection or removal of radio station towers, water tanks, oil derricks and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALEXANDER CITY-RUSSELL ARPT: N/S Strip closed - const. (10-25)
ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
**ANNISTON ARPT: 574' (2981'MSL) lgtd TV twr erected 6.1 n mi SSE (158°T) at lat 33-29-06; long. 85-48-32. (7-21)
BIRMINGHAM-RADIO: VOR courses 005°-035°; 075°-175° and 195°-265° usable. Arpt apch course usable within 13 n mi; other courses not usable due to roughness and bends.
✱BIRMINGHAM ARPT-TOWER: Nov 24, Radar GCA surveillance apch to Rnwy 8 discontd.
BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (11-24)
**CHICKASAW ARPT: Abandoned. (10-1)
EUFAULA-WEEDON ARPT: Material and const equip. on N/S Rnwy 1200' usable rnwy on either end E/W Rnwy - Caution. (11-15)
EVERGREEN-MIDDLETON FLD: Caution-vehicles and farm equip intermittently crossing rnwys and using taxi strips.
HUNTSVILLE-RADIO: VOR radials 20°-70°, 100°-130°; 150°-210°; 255°-270°, rough and unusable. Courses between rng and arpt unusable due to roughness, bends and signal cancellation. (10-7)
MOBILE -RADIO: VOR flgt-checked on arwy radials only.
MONTGOMERY-RADIO: DME coverage 130°-230°, 35 n mi at 1500'. (5-20)
**MONTGOMERY-DANNELLY FLD. 823' (1483'MSL) lgtd twr erected 17.4 n mi S (170°T) at lat 32-01-15; long. 86-20-56. (9-16) Rnwys 3-21 and 15-33 closed. Dips in E/W Rnwy 1500' from E end. (7-19) Use right hand traffic pattern Rnwy 9. (8-23) Acft lndg and taking off are cautioned to avoid the Maxwell AFB traffic pattern and control zone. (9-23) Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard Hangar. (10-8)
**TUSCALOOSA-VAN DE GRAAFF ARPT: Flashing lgt in wind cone lctd in seg circle utilized sunset to sunrise to indicate weather below VFR minimums. (11-25) 200' (413' MSL) micro wave twr erected 3.5 n mi SE (123°T) at lat 33-12-33; long. 87-32-57. 200' (900' MSL) lgtd micro wave twr erected 17.5 n mi NE (60°T) at lat 33-22-06; long. 87-18-54. (11-11)
TUSKEGEE-MOTON FLD: Caution - pipeline across rnwy. (10-1)
ARIZONA: CHANDLER-WILLIAMS AFB-RADIO: USAF VHF/DF steers unreliable on inbound headings 300°-080°, below 7000' bevond 40 n mi from stn. (12-7)
COCHISE-RADIO: DME coverage 15°-35°, 35 n mi at 12,000'; 210°-245°, 35 n mi at 11,000. (6-30)
DOUGLAS-BISBEE-DOUGLAS INTERNATIONAL ARPT: Pilots are cautioned to use maximum length of rnwys for landings and take-offs due to obstructed view of ends. Take-offs from intersections of rnwys and taxiways prohibited.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: DME coverage 235°-255°, 35 n mi at 6000'. (7-15)
KINGMAN ARPT: Caution-intermittent target plane testing in vcnty. Rdo controlled acft operating in area NW of fld.
PRESCOTT-RADIO: VOR radials 185°-225° usable dist 35 n mi at 10,000'; 135°-145° and 165°-185° usable dist 39 n mi at 10,000'.
TUCSON-RADIO: VOR and DME coverages lmtd to 35 n mi at 11,000', 0°-12°, 69°-72° and 330°-346°; 26 n mi at 11,000', 44°-69° and 346°-0°. (7-9) June 14, LF rng shut down for indefinite period - relctn.
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF/DF lmtd in rng to 30 n mi in quads containing inbound headings of 150°-210° and 245°-275°; rng 50 n mi other quads; steers unreliable below 13,000' all quads. (12-23) USAF UHF/DF unreliable 170-270° below 14,500' at 40 n mi; unreliable at min en route alts all quads. UHF/DF inop 0800-0900 each Wed. (2-3)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (2-3)
ARKANSAS: FAYETTEVILLE ARPT: Men and equip on fld daylgt hrs. (8-13)
HARRISON ARPT: New NW/SE Rnwy under const. Fld clsd for ngt operns. (3-10)
TEXARKANA-RADIO: VOR 143° radial to Rnwy 13 beyond tolerance due to roughness and bends.
WALNUT RIDGE-RADIO: VOR radials 290°-320° and 120°-150° have severe bends and course roughness. (4-14)
CALIFORNIA: ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.
BAKERSFIELD-RADIO: VOR has slight to moderate scalloping in SE quad 80°-123°. Radials 0, 90, 100, 130, 140, 150, 220, 270, 300 and 330° flgt-checked.
BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 180°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'. Nov. 8, commun facs subject to short periods of interruption without notice until approx Dec 20 - modernization. (11-23)
BRAWLEY ARPT: E/W Rnwy clsd - construction. (4-30)
CORNING ARPT: Closed winter months. (11-11)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'. (9-15)
CULVER CITY-HUGHES ARPT: Const W end Rnwy 22. Overrun area W of paved Rnwy unusable. (10-29)
DAGGETT-RADIO: VOR 113.2 mc. Only arwy radials flgt-checked.
EDWARDS AFB-RADIO: USAF LF rng courses have splits and multiples, unreliable beyond 35 n mi. (4-14)
EUREKA COUNTY ARPT: All lgtg fac inop. Length of surfaced rnwy reduced to 1400' and grass strip clsd. Const in progress on and adj to arpt. Caution - use at own risk. (5-29)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

(11-30-54)

CALIFORNIA: FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked. (6-16)

PERRYTON ARPT: Bndry and Bcn lgts inop. (8-4)
POTEET ARPT: Closed - const. (11-20)
QUITMAN-RADIO: DME coverage 2300' MSL, 43 n mi all azimuths. (6-9)
REFUGIO-ROOKE FLD: All strips clsd xcpt E/W strip - usable at own risk. (10-30)
ROCKPORT-ARANSAS COUNTY ARPT: Caution - oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (4-23)
SALT FLAT-RADIO: DME coverage 45°-250°, 43 n mi at 9000'; 250°-290°, 43 n mi at 8500'; 290°-015°, 43 n mi at 9000'; 015°-045°, 26 n mi at 10,800'. (6-23)
SAN ANGELO-GOODFELLOW AFB-RADIO: USAF VHF/DF unreliable below 4500' in all quads.
**SNYDER-WINSTON ARPT: 145' oil derrick erected 4500' S and 420' E. (10-16)
SULPHUR SPRINGS-RADIO: DME coverage 43 n mi at 2000' all azimuths. (6011)
TEXARKANA: Demolition in progress during daylgt hrs on Green Arwy #5 approx 13 n mi WSW of Texarkana LF rng.
TYLER-POUNDS FLD-TOWER: ILS glide slope not to be used from MM to touchdown - caution. (10-14)
WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Danger areas 219 and 443 not certified. (6-9)
WICHITA FALLS-SHEPPARD AFB: 3300' NW end Rnwy 12-30 usable for light acft daylgt hrs only. (4-19) Rnwy 17-35C no longer usable for lndgs and take-offs - usable for taxiway only. (8-4)

TEXAS: WINK ARPT 18, ELP-FTW: No fuel avail. (11-25)
UTAH: BRYCE CANYON-RADIO: VOR has lgt roughness below 13,000'.
DELTA-RADIO: VOR coverage 40°-80° and 100°-135°, 35 n mi at 11,000'. DME coverage 40°-90°, 26 n mi at 13,000'. (5-8)
HANKSVILLE-RADIO: VOR coverage 40°-60°, 35 n mi at 10,000'; 172°-190°, 26 n mi at 13,000'.
MILFORD-RADIO: VOR coverage 20°-140°, 22 n mi; 235°-330°, 35 n mi at min en route alt. DME coverage 40°-120°, 17 n mi at 13,000'; 120°-160°, 43 n mi at 13,000'; 160°-210°, 43 n mi at 10,000'; 210°-230°, 43 n mi at 12,000'; 230°-310°, 43 n mi at 12,000'; 310°-355°, 43 n mi at 11,000'; 355°-40°, 43 n mi at 13,000'. (5-21)
OGDEN-RADIO: VOR coverage 5°-120°, 30 n mi at 11,000'. (7-30) DME coverage 360°-150°, 17 n mi at 12,000'.
OGDEN-HILL AFB-RADIO: USAF VHF/DF steers unreliable 150°-340° below 15,000'. (2-1)
SALT LAKE CITY-RADIO: Course scalloping prevalent between 290° and 350°. VOR usable coverage this area, 17 n mi at 6500'; 30 n mi at 11,000'. (3-14) DME coverage 20°-140°, 17 n mi at 13,000'; 180°-235°, 35 n mi at 12,000'; 340°-20°, 26 n mi at 12,000'. (5-10) VOR radials 10°-135° usable dist lmtd to 22 n mi at min en route alt. (10-25)
SALT LAKE CITY NO. 1 ARPT: Lgt acft rstd to a new tfc pat which lies E of arpt with left tfc for lndgs rnwys 16L and 14, rgt tfc for lndgs Rnwys 34R and 32. Hvy acft-tfc pat W of arpt with rgt tfc for lndgs Rnwy 16R and left tfc for lndgs 34L. (5-13)
WENDOVER-RADIO: DME coverage 295°-350°, 35 n mi at 12,000'. (5-8)
VERMONT: SPECIAL NOTICE: Arpt condition info avail. by calling Vt. Aero Comm (Tel. Montpelier 1500) 0830-1630, Mon thru Fri or CAA Communs Stn, Barre-Montpelier Arpt anytime (Tel. Montpelier 676). Acft in flgt call Montpelier Rdo.
BRISTOL ARPT: E/W Rnwy closed., obstn. (7-21)
BURLINGTON-RADIO: VHF/DF bearings unreliable inbound headings 055°-110° below 6000'; 110°-140° below 4000'; 235°-255° below 4000'; 255°-355° below 9000' all beyond 50 n mi.
VIRGINIA:
CHARLOTTESVILLE-ALBERMARLE ARPT: New Field under construction. 7 s mi N, Elev: 639'. Lat 38-08-16, long. 78-27-10. Do not land on fld. (10-7)
CHARLOTTESVILLE-UNIVERSITY OF VIRGINIA ARPT: Low flying plane trailing heavy experimental object 300' below plane in traffic area at any hour or altitude.
★FRONT ROYAL-RADIO: VOR coverage 120°-160°, 175°-200°, 220°-226°, 270°-010°, 35 n mi at 4000'. Correct VOR lat 39-05-25, long. 78-12-01. (11-15)
GORDONSVILLE-RADIO: VOR has roughness in all quads. DME coverage 55°-75°, 35 n mi at 1500'; 75°-85°, 30 n mi at 1500'; 85°-130°, 35 n mi at 1500'; 130°-160°, 39 n mi at 3000'.
HAMPTON-LANGLEY AFB-RADIO: USAF UHF/DF unreliable 2000' all quads. (6-1)
HERNDON-RADIO: VOR usable dist 35 n mi at min instr alt NE quad. Terrain causes minor course roughness in SW quad.
**HOT SPRINGS-INGALLS FLD: Closed Nov 13 - April 15, 1955. (11-4)
LAWRENCEVILLE-RADIO: VOR radials from 185°-240° usable only to 22 n mi at min en route instr alt. (5-20)
**LYNCHBURG-PRESTON GLEN ARPT: 574' (1902' MSL) lgtd TV twr erected 10 n mi SW (223° T) at lat 37-11-50, long. 79-21-07. Signal for below VFR wea minimums inop ngts.
MONTBELLO-RADIO: DME coverage 210°-90°, 43 n mi at 6000'; 90°-150°, 43 n mi at 3000'; 150°-180°, 35 n mi at 3000'; 180°-210°, 35 n mi at 5000'. (7-6) VOR coverage 110°-220°, 35 n mi at min en route alt. (7-13)
NEWPORT NEWS-PATRICK HENRY ARPT-TOWER: About Dec 20, ILS will be cmsnd. Lclzr freq: 110.1 mc. Ident: NNW, with voice. Lctd 1000' from NE end of NE/SW Rnwy 6. Glide slope freq: 334.4 mc. Lctd 1250' NE ofSW end and 250' SE of centerline NE/SW Rnwy 6. Glide slope angle: 3.0°. Alt of glide slope over OM 965'. Apch bear: 64°. OM lctd 3.13 s mi from apch end Rnwy 6. LOM freq: 375 kc. Ident: NN. Operg only durg hrs 0800-2400. (11-29)
NORFOLK: Warning Area W-108 redescribed as follows: Beginning at a point at lat 38-45, long 74-53; thence due E to a point 2 n mi SW of SW bndry to ICAO Control Area #1148, thence SE paralleling said Control Area to a point 2 n mi W of the W bndry to the N. Y. Oceanic Air Traffic Control area, thence due S paralleling the western bndry of the N. Y. Oceanic Air Traffic Control Area to lat 36-33-30, thence due W to a point 3 n mi from the U. S. shoreline, thence northerly paralleling the shoreline to lat 36-49-25, long. 75-54-00; thence to lat 36-49-25, long. 75-32-00; thence due N to lat 37-08-00; thence due W to long. 75-47-00; thence northeasterly paralleling the shoreline to a point at lat 38-37-00, long. 74-59-30, thence to a point at lat 38-45-00, long. 74-53-00, point of beginning. Effective Nov 8, 1954.

VIRGINIA: NORFOLK-RADIO: Visual courses VAR slightly rough.
PULASKI-RADIO: VOR coverage 305°-15°, 22n mi; 15°-55° and 195°-210°, 35 n mi at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000';120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'. (7-7)
RICHMOND-BYRD FLD: Due to non-visibility twr unabel to ctl tfc on N and S portions of N/S taxiway parallel to rnwy 2-20. Caution soft-shoulders rnwy 6-24. (5-6)
ROANOKE-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W taxi strip. Soft and broken spots on N/S taxi strip from E/W taxi strip to approx 300' N. Hvy acft use extreme caution. (10-12)
TAPPAHANNOCK-RADIO: About Dec 2, LF rng will be shut down until approx Dec 7- antenna repairs. (11-9)
WASHINGTON: SPECIAL NOTICE: Unmrkd-p-lines across coves in Puget Sound area & lakes.
BELLINGHAM-RADIO: VOR radial 280°, on Vancouver B.C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.
BREMERTON-KITSAP COUNTY ARPT: The first 2,000' Rnwy 1 clsd to all Naval acft.
CLE ELUM ARPT: 8' fence erected across E end of E/W Rnwy-not obstn marked or lgtd.
ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260° 290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'. (6-21)
EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown prohibited area; 227°-280° 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.
EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160°, below 9000'. USAF UHF/DF steers unreliable 160°-310° below 7000'; 025°-098° below 9000' due terrain limitations.
MOSES LAKE-LARSON AFB-RADIO: USAF VHF/DF unreliable 050°-110°, below 7000'; 110°-240° below 4000'; 240°-315° below 3500'. (1-13)
OTHELLO ARPT: Caution-unlgtd power line approx 50' high E end-unmrkd. (6-14)
**PORT ORCHARD-SOUTH PORT ORCHARD ARPT: 1000' (MSL) lgtd TV twr erected 6.1 n mi NE (63°T) at lat. 47-28-43, long. 122-32-32. (7-26)
PULLMAN-MOSCOW ARPT: Lighting inoperative. (9-21)
SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Trans & rcvg freq 132.3 mc inop. (9-17)
SEATTLE-RADIO: Nov 9, DME and VOR shut down for indefinite period-modernization.
**SEATTLE-BOEING FLD: 603' lgtd TV twr lctd 4 n mi N at lat 47-37-02, long. 122-19-13 completed. (11-13) All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat. W of fld at 1500'.
SEATTLE-TACOMA ARPT-TOWER: ASR will continue to issue distance values in statute miles in connection with radar control. (10-12)
SHELTON-RADIO: LF rng on 371 kc has lmtd usable course dist as follows: S course 30 n mi, SW and N, 26 n mi each.
SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 152°-224°, 43 n mi at 5000'; 224°-264°, 43 n mi at 6000'; 264°-36°, 43 n mi at 8000'. (6-17)
SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable below 9500' in all quads. Operg on trng status only. (11-24)
SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip on fld. (12-19)
TACOMA RADAR APPROACH CONTROL CENTER-TOWER: When ceiling 5000' or higher and visibility 3 s mi or more, radar facs will be inop for routine maintenance 0900-1000 daily except Sat. and Sun. (11-16)
**TOLEDO-KELSO ARPT: Restricted to rnwys and taxiways-remainder of fld freshly plowed
YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.
WEST VIRGINIA: BECKLEY-RALEIGH CO. MEMORIAL ARPT: 4 unlgtd poles extending 25' above tree tops E end E/W Rnwy to S of centerline of apch. (5-31)
CHARLESTON-RADIO: VOR coverage 10°-58° 26 n mi at 3000'; 270°-330°, 26 n mi at 2500' Moderate roughness all azimuths.
**CHARLESTON-KANAWHA COUNTY ARPT: 649' (1549'MSL) lgtd TV twr erected 4.5 n mi WNW (275°T) at lat. 38-22-36, long. 81-42-04. (7-1)
WEST VIRGINIA: ELKINS-RADIO: LF rng has multiples and fades all courses. DME coverage 35°-95°, 43 n mi at 6800'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)
ELKINS ARPT: Small hole 2' long, 2" deep approx 150 yds from Rnwy 31 on right side edge taxiway leading from ramp. (9-16)
**HUNTINGTON ARPT: 1069' (2049'MSL) lgtd WSAZ-TV twr erected 14 n mi ENE (62°T) at lat. 38-30-34, long. 83-13-09. (10-8)
MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'. (7-7)
MARTINSBURG ARPT: Glider flying-peak activity expected on week-ends and holidays. Serv fac avail 0800 until sunset. Const 28' hangar 500' E of centerline and 1100' from S end Rnwy 35, lgtd. (9-24)
MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution-dip midway Rnwy 16-34 covering full width of rnwy. (5-4)
**WINFIELD-HONAKERS ARPT: Abandoned. (10-14)
WISCONSIN: SPECIAL NOTICE: Power line from Waukesha to Wauwatosa. Poles will vary from 95' to 140' above gnd and will parallel the C and NW railroad from Waukesha to a point S of and thence N to Wauwatosa. To be completed Dec 1954.
**FOND DU LAC ARPT: 345' rdo twr erected 3 n mi W (278°T) at lat. 43-47-28, long. 88-28-16. (11-20)
**HARTFORD ARPT: Closed. (11-22)
**HAYWARD ARPT: 1153' MSL lgtd rdo twr erected 4.5 n mi SE (150°T) at lat. 44-57-55, long. 91-23-08. (10-28)
JANESVILLE-RADIO: VOR courses rough all azimuths within 4 n mi of stn. (6-8)
**LONE ROCK ARPT, SITE 16, CHI-TWIN CITIES: Bcn changed from 6 clear and 6 green fpm to 12 clear fpm red course lgts reactivated falshing code no. 6, dash dot dash.
MADISON-TRUAX FLD-TOWER: Caution-twr rdo reception intermittently blocked out by jet acft run-ups. VHF/DF inop indefinitely. (10-22) FLD: E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Caution crossing hwy in lndg Rnwys 22, 26, 31. Sod unsafe. Due to non-visibility, twr unable to ctl tfc on first 1000' S end Rnwy 18-36 adj taxiway and all portions of civil and mil ramps. Equip. on fld. Caution-lndg jet interceptor acft using tactical left hand over-head apchs at 2300' MSL. (3-30)
MILWAUKEE-RADIO: VOR has moderate course roughness in area between 200°and 220°. DME coverage 190°-200°, 35 n mi at min en route alt. (6-11)
MILWAUKEE-GENERAL MITCHIEL FLD: Rnwy 6-24 open daylgt hrs only. (10-24)
NEENAH-VALLEY ARPT: N/S Strip clsd-golf driving range, roadway on end. (8-13)
OCONOMOWOC-PABST ARPT: Effect Jan. 1, 1955 N/S strip (2000' x 200') will be discontd.
SIREN-BURNETT COUNTY ARPT: All lgtg fac inop. (10-1)
**STONE LAKE-SAND BEACH ARPT: Closed. (10-16)
WOODRUFF-ARBOR VITAE-RADIO: From Nov 5, 1954 to May 1, 1955, all rdo facs will be operd on req basis. (11-4)
WOODRUFF-ARBOR VITAE ARPT: Nov 5, 1954 to May 1, 1955, arpt will be attended and services on a req basis. (11-4)
WYOMING: CASPER-RADIO: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto. pilot apchs.
CHEYENNE ARPT-TOWER: All components, xcpt LOM of ILS inop indefinitely. (11-16) FLD: Clsd to transient jet acft xcpt in emerg. E/W rnwy 9300' with usable length 9100'.
**DOUGLAS ARPT: ENE/WSW strip perm. discontinued. (11-9)
GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S Strip soft-clsd to hvy acft.
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000';225°-300°, 26 n mi at 15,000'. (7-2)
LARAMIE-BREES FLD: Caution deer on fld. (6-29)
ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000';160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'. (7-20)
ROCK SPRINGS-RADIO: Nov 15, ILS shut down for approx 3 weeks-modernization.(11-15)
ROCK SPRINGS ARPT: Caution-first 500' NW end NW/SE Rnwy clsd- marked. (9-10)
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area. (4-26)

(11-30-54)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial, (b) certified check points on the airport surface, or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator (FPDI) centered the omnibearing selector should read 0° with the to-from indication being "From" or the omnibearing selector should read 180° with the to-from indication read "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ± 4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of Oct. 19, 1954, check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 112.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)

NOTES. *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

(NOTE: ALL DISTANCES ARE IN STATUTE MILES.)

VHF OMNIRANGE (VOR) PROCEDURES

When a VOR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY FREQ IDENT PROCEDURE NO	INITIAL APPROACH TO FACILITY FROM	CRS AND DIST	MIN ALT	PROCEDURE TURN SIDE OF FINAL APCH CRS OUTBND AND INBND ALTITUDES LIMITING DISTANCES	MIN ALT OVER FACILITY ON FINAL APPROACH COURSE	CRS AND DISTANCE FACILITY TO AIRPORT	CEILING AND VISIBILITY MINIMUMS CONDITION	TYPE AIRCRAFT 75 MPH OR LESS	MORE THAN 75 MPH	IF VISUAL CONTACT NOT ESTABLISHED AT AUTHORIZED LANDING MINIMUMS AFTER PASSING FACILITY WITHIN DISTANCE SPECIFIED BELOW OR IF LANDING NOT ACCOMPLISHED: REMARKS

NOTICES TO AIRMEN

SPECIAL NOTICES

√ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D.C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft, 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course-deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

DVER FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators). 2

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e. g. Long Beach omni (voice) .-.. --. -... (LGB in Code).

For omniranges, as in the example given above, the normal voice identification consists of the name of the omni followed by the word "omni". However, if the omnirange is unattended, that is, if no facility for providing air-ground communications services is associated with the omnirange, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

NEW AIR TRAFFIC CLEARANCE PHRASEOLOGY ADOPTED: The phrase "VIA FLIGHT PLANNED ROUTE" has been adopted for use in air traffic clearances and may be used to replace the detailed description of any portion of the route of flight that is identical to the route filed by the pilot. IFR flight plans filed by pilots must contain the complete route of flight and must be relayed to air traffic control unchanged in order for this phraseology to be successfully used.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: The following abbreviations have been adopted for use in the Airmen's Guide: "n miles" or "n mi" for nautical miles; "s miles" or "s mi" for statute miles.

PRIVATE AIRCRAFT-TO-TOWER FREQUENCIES: Due to severe congestion on the frequency 122.5 mc in the New York City, Chicago and Los Angeles areas, it has become necessary to implement the frequency 122.7 mc at the New York (LaGuardia), Chicago (Midway), and theLos Angeles (International) Airport towers. Effective 0001 Local Standard Time, December 1, 1954, a guard on the frequency 122.7 mc will be established and simultaneously the guard on 122.5 mc will be discontinued at these three towers. Pilots of private aircraft intending to land at New York (LaGuardia), Chicago (Midway) or Los Angeles (International) Airports should be equipped to transmit on 122.7 mc. The emergency frequency 121.5 mc may be used temporarily to call these towers in the event it is not possible to obtain 122.7 mc by December 1.

"DANGER AREAS" TO BE CALLED "RESTRICTED AREAS": Effective December 9, 1954, Part 60 of the Civil Air Regulations is amended to provide, among other things, for the use of the term "Restricted Area" for what was formerly called "Danger Area" and for a definition of this term as well as that of "Prohibited Area" (somewhat similar to the former term "Airspace Reservation.").

Restricted Areas (which are designated by the Administrator of Civil Aeronautics when he finds that a hazard to aircraft in flight exists) are defined as "airspace identified by an area on the surface of the earth within which the flight of aircraft, while not wholly prohibited, is subject to restrictions".

Prohibited Areas are defined as "airspace identified by an area on the surface of the earth within which the flight of aircraft is prohibited."

Avoidance of prohibited areas and operations within restricted areas strictly in accordance with the published restrictions are imperative to the safety of flight or the protection of the activity on the ground. Any person desiring to secure permission to fly in such areas contrary to the prohibition or the restrictions imposed, should contact the agency controlling that area. Prohibited and restricted areas, indicating the prohibitions or restrictions to flight and the name of the using agency, are carried in the Airman's Guide, appear in other publications of aids to air navigations and are depicted on aeronautical charts.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 8, 1953

For sale by Superintendent of Documents, U.S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.75, domestic; $3.75, foreign; individual copies vary.

(12-14-54)

SPEED IN HOLDING PATTERNS: All patterns used for holding are based on a maximum speed of 180 mph true air speed. Entry into and maneuvering within these patterns should be made at speeds within this tolerance as buffer zones have been provided only for these speeds. It is recommended that all aircraft adhere closely to these restrictions and if greater speed is needed, traffic control be notified so that more maneuvering area may be provided.

OKLAHOMA CITY RADAR APPROACH CONTROL CENTER: Effective November 15, 1954 RAPCON was commissioned and assumed control of that portion of Ft. Worth ARTC area lying within the following flight advisory area boundaries: Starting at the Eastern edge of Civil Airway Amber 4 at a point 65 s miles southwest of Tulsa, Okla VOR station direct to a point crossing Civil Airway Blue 5; 25 s miles north of Ardmore, Okla. H facility direct to a point crossing Civil Airway Amber 4; 25 s miles north of Ringling, Okla. intersection direct to a point crossing Civil Airway Blue 6; 50 s miles northeast of Wichita Falls, Texas. LF range station direct to a point crossing Civil Airway Victor 14; 25 s miles northeast of Hobart, Okla. VOR station, direct to a point crossing Civil Airway Red 24; 50 s miles east of Alanreed intersection direct to a point crossing Civil Airway Red 59; 50 s miles southeast of Gage, Okla. LF range station, direct to a point crossing Victor Airway 77 and Civil Airway Blue 5; 38 s miles north of Oklahoma City, Okla. VOR station, then along the Ft. Worth-Kansas City and Ft. Worth-St. Louis centers boundaries to the point of origin. Concurrently approach control was decommissioned at Will Rogers Tower and responsibilities assumed by Oklahoma City RAPCON. Aircraft operating in accordance with instrument flight rules will be afforded standard separation minimums as described in ANC/PCAT. Radar vectoring will be for training purposes only until further advised. Ft. Worth ARTC will continue to coordinate requests for altitude reservations for above area.

LOCATION IDENTIFIERS: The following changes affect the use of location identifiers:

DNV	Danville, Ill., Vermilion County Airport (Name change)
GPZ	Grand Rapids, Minn., Grand Rapids Airport (Assignment)
MDN	Minden, La. REP (Deletion)
NGF	Kaneohe, Oahu, T. H., Kaneohe MCAS (Name Change)
RCT	Reed City, Mich.,,VOR (Assignment)
SPT	Sennet Point, Alaska (Assignment)
UMA	Umnak, Alaska (Assignment)
UMH	Yuma, Ariz., Radiobeacon (Change from REP)
VML	Danville, Ill., Vermilion Airport (Deletion)
XGR	Granite Intersection, Alaska (Assignment)
XMB	Marble Intersection, Alaska (Assignment)
KB	Kelsey Bay, B.C. (Deletion)

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 8, dated May 25, 1954 as follows:

(1) Page 22, under Massachusetts change Boston -WB telephone number to read: EA 7-4032.

(2) Page 23, under New Mexico change Albuquerque - WB telephone number to read: 2-8857.

CIVIL AIRWAYS, CONTROL AREA, CONTROL AREA EXTENSIONS, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective January 1, 1955, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows: (Note: In accordance with the intent of the Knot/Nautical Mile Plan now used in air navigation, the term "mile" wherever it appears herein means "statute mile" unless otherwise specifically stated.) From time to time certain low frequency airways will be redesignated by number and/or color in whole or in part, and more than one color and number will be assigned to a low frequency segment of airway, similar to the method used in the VOR Airway System, when justified, for the purpose of minimizing the amount of flight data required in flight plans and ATC clearances to identify route of flight on heavily travelled airways; also, those portions of airways no longer found to be a "through-airway" requirement will be revoked. Inthis connection the following changes which do not affect MEA 's will be made effective January 1, 1955.

CIVIL AIRWAYS: (1) Green civil airway No. 10 (United States-Canadian Border to Denver, Colorado) is added to read: "That airspace over United States territory from the Vancouver, B.C., Canada, radio range station via the Bellingham, Wash., radio range station; Everett, Wash., radio range station, Seattle, Wash., radio range station; Ellensburg, Wash., radio range station; the intersection of the south course of the Ellensburg, Wash., radio range and the northwest course of the Yakima, Wash., radio range; Yakima, Wash., radio range station; Pendleton, Oreg., radio range station; Baker, Oreg., radio range station; Boise, Idaho, radio range station; the intersection of the southeast course of the Boise, Idaho, radio range and the northwest course of the Burley, Idaho, radio range; Burley, Idaho radio range station; Malad City, Idaho radio range station; the intersection of the southeast course of the Malad City, Idaho, radio range and the north course of the Fort Bridger, Wyo., radio range; Rock Springs, Wyo., radio range station; Sinclair, Wyo., radio range station; the intersection of the east course of the Sinclair, Wyo., radio range and the northwest course of the Laramie, Wyo., radio range; Laramie, Wyo., radio range station; the intersection of the southeast course of the Laramie, Wyo., radio range and the north course of the Denver, Colo., radio range to the Denver, Colo., radio range station." (Note: Green 10 overlaps Green 2, Amber 8 and Red 109, Green 3 and Amber 3). Canada designating Canadian portion concurrently, Lantzville-Vancouver-Bellingham.)

(2) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska) is amended by deleting the portion which reads: "Seattle, Washington, radio range station; Everett, Wash., radio range station; Bellingham, Wash., radio range station to the Vancouver British Columbia, radio range station." and by adding the following in lieu thereof: " Seattle, Wash., radio range station; the intersection of the northwest course of the Seattle, Wash., radio range and the south cour se of the Patricia Bay, B.C., radio range; Patricia Bay, B.C., radio range station to the intersection of the north course of the Patricia Bay, B.C., radio range and the southeast course of the Comox, B.C., radio range, excluding the airspace which overlaps danger areas and excluding the portion which lies outside the continental United States." (Note: Canada designating Canadian portion -U.S. border to Comax concurrently.)

(3) Amber civil airway No. 8 (Los Angeles, Calif., to Ellensburg, Wash) is amended by changing caption and by changing the portion after Redmond, Oreg., to read: "Redmond, Oreg. radio range station; the Dalles, Oreg., radio range station; Yakima, Wash., radio range station; the intersection of the northwest course of the Yakima, Wash., radio range and the south course of the Ellensburg, Wash., radio range to the Ellensburg, Wash., radio range station."

(4) Red civil airway No. 1 (Portland, Oreg., to Denver, Colo.) is revoked.

(5) Red civil airway No. 6 (Denver, Colo., to Omaha, Nebr.) is amended to read: "From the Denver, Colo., radio range station via the Akron, Colo., radio range station; North Platte, Nebr., radio range station; Grand Island, Nebr., radio range station; Lincoln, Nebr., radio range station to Omaha, Nebr., radio range station." (Note: Above adds portion between North Platte and Grand Island ranges, overlapping Green 3 between these ranges).

(6) Red civil airway No. 53 (Portland, Oreg., to Spokane, Wash) is added to read: "From the Portland, Oreg., radio range station via the intersection of the east course of the Portland, Oreg., radio range and the west course of the Dalles,Oreg., radio range; The Dalles, Oreg., radio range station; the intersection of the east course of the The Dalles, Oreg., radio range and the west course of the Pendleton, Oreg., radio range; Pendleton Oreg., radio range station; the intersection of the east course of the Pendleton, Oreg., radio range and the southwest course of the Walla Walla, Wash., radio range; Walla Walla, Wash., radio range station to the Spokane, Wash., radio range station." (Note: Red 1 revoked between Portland, and Pendleton; Blue 1 revoked between Pendleton and Spokane).

(7) Red civil airway No. 80 is amended by changing the caption to read: (Helena, Mont., to Miles City, Mont.) and further amended to read: "From the intersection of the west course of the Helena, Mont., radio range and the southwest course of the Great Falls, Mont., radio range station; Lewistown, Mont., radio range station; the intersection of the southeast course of the Lewistown, Mont., radio range and the north course of the Billings, Mont., radio range to the Miles City, Mont., radio range station." (Note: Blue 16 revoked. Above adds portion to Red 80 between Avon intersection and Great Falls range to Lewistown range, overlapping Amber 2 and Amber 3).

(8) Red civil airway No. 101 (Tampa, Fla., to Miami, Fla.) is amended to read: "From the Tampa , Fla., radio range station via the intersection of the southeast course of the Tampa, Fla., radio range and the north course of the Fort Myers, Fla., radio range to the Miami, Fla., radio range station." (Note: Above adds a portion to Red 101 between Tampa range and Ona intersection overlapping Red 25).

(9) Red civil airway No. 109 (Portland, Oreg., to Spokane, Wash.) is added to read: "From the Portland, Oreg., radio range station via the intersection of the east course of the Portland, Oreg., radio range and the west course of The Dalles, Oreg., radio range; The Dalles, Oreg., radio range station; Yakima, Wash., radio range station; the intersection of the northwest course of the Yakima, Wash., radio range and the south course of the Ellensburg, Wash., radio range; Ellensburg, Wash., radio range statinn; Ephrata, Wash., radio range station to the Spokane, Wash., radio range station." (Note: Overlaps Red 53, Amber 8, Green 10 and Green 2)

(10) Blue civil airway No. 1 (Pendleton, Oreg. to Spokane, Wash.) is revoked.

(11) Blue civil airway No. 12 (The Dalles, Oreg., to Ellensburg, Wash.) is revoked.

(12) Blue civil airway No. 16 (Helena, Mont., to Great Falls, Mont.) is revoked.

(13) Blue civil airway No. 32 (Skwentna, Alaska to Talkeetna, Alaska) is amended to read: "From the Skwentna, Alaska, radio range station to the Talkeetna, Alaska non directional radio beacon." (Note: U.S. portions Blue 32 between Pendleton and Yakima, and between Seattle and Comox revoked. Canada revoked their portion of Blue 32 concurrently).

CONTROL AREAS: (1) Green civil airway No. 10 (United States-Canadian Border to Denver, Colo) is added to read: "All of Green civil airway No. 10".

(2) Amber civil airway No. 8 is amended by changing the caption to read: (Los Angeles, Calif., to Ellensburg, Wash.) and further amended to read: "All of Amber civil airway No. 8".

(3) Red civil airway No. 1 (Portland, Oreg., to Denver, Colo.) is revoked.

(4) Red civil airway No. 53 (Portland, Oreg. to Spokane, Wash) is added to read: "All of Red civil airway No. 53".

(5) Red civil airway No. 80 is amended by changing the caption to read: (Helena, Mont. to Miles City, Mont.) and further amended to read: "All of Red civil airway No. 80."

(6) Red civil airway No. 109 (Portland, Oreg., to Spokane, Wash.) is added to read: "All of Red civil airway No. 109."

(7) Blue civil airway No. 1 (Pendleton, Oreg. to Spokane, Wash.) is revoked.

(8) Blue civil airway No. 12 (The Dalles, Oreg., toEllensburg, Wash.) is revoked.

(9) Blue civil airway No. 16 (Helena, Mont., to Great Falls, Mont.) is revoked.

(10) Blue civil airway No. 32 is amended by changing the caption to read: (Skwentna, Alaska to Talkeetna, Alaska) and further amended to read: " All of Blue civil airway No. 32."

CONTROL AREA EXTENSIONS: (1) (Pasco, Wash.) is amended by changing the words "Blue civil airway No. 32; " to read "Green civil airway No. 10."

(2) Seattle (Clear Lake), Wash.) is amended by changing the words "Amber civil airway No. 1" to read: "Green civil airway No. 10" wherever they appear.

(3) (Everett, Wash.) is amended by changing the last portion to read: "and on the west by Green civil airway No. 10", in lieu of by Amber civil airway No. 1.

REPORTING POINTS: (1) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska) is amended by deleting the following reporting points: "Everett, Wash., radio range station; Bellingham, Wash., radio range station;" and by adding the following reporting point in lieu thereof: "the intersection of the northwest course of the Seattle, Wash. radio range and the south course of the Patricia Bay, B.C. radio range."

(2) Amber civil airway No. 8 is amended by changing caption to read: (Los Angeles, Calif., to Ellensburg, Wash.) and by adding the following reporting point: "Yakima, Wash., radio range station."

(3) Green civil airway No. 10 (United States-Canadian Border to Denver, Colo.) is added to read: " The Bellingham, Wash., radio range station; Everett, Wash., radio range station; Pendleton, Oreg., radio range station; Baker, Oreg., radio range station; Boise, Idaho, radio range station; Gooding, Idaho non directional radio beacon; Burley, Idaho radio range station; Laramie, Wyo., radio range station."

(4) Red civil airway No. 1(Portland, Oreg., to Denver, Colo.) is revoked. (Note: Compulsory reporting points added to Green 10.)

(5) Red civil airway No. 53 (Portland, Oreg., to Spokane, Wash.) is added to read: "Walla Walla, Wash., radio range station."

(6) Red civil airway No. 80 (Helena, Mont., to Miles City, Mont.) is amended by changing the caption. No reporting point designation.

(7) Red civil airway No. 109 (Portland, Oreg., to Spokane, Wash.) is added to read: "No reporting point designation."

(8) Blue civil airway No. 1 (Pendleton, Oreg. to Spokane, Wash.) is revoked.

(9) Blue civil airway No. 12 (The Dalles, Oreg. to Ellensburg, Wash.) is revoked. (Yakima range added to Amber 8 as reporting point).

(10) Blue civil airway No. 16 (Helena, Mont., to Great Falls, Mont.) is revoked.

(11) Blue civil airway No. 32 is amended by changing the caption to read: (Skwentna, Alaska to Talkeetna, Alaska) "No reporting point designation."

The following civil airways, control area, control area extensions, control zones, and reporting points are amended in whole or in part effective January 5, 1955.

CIVIL AIRWAYS: (1) Red civil airway No. 58 (Augusta, Maine to United States-Canadian Border) is added to read: "From the Augusta, Maine radio range station to the Bangor, Maine radio range station. That airspace over United States territory from the intersection of the northeast course of the Bangor, Maine radio range and the west course of the St. John, New Brunswick, Canada range to the St. John, N.B., Canada radio range station." (Note: Changing the Blue airway to a Red airway between Augusta and St. John being done at request of Department of Transport, Ottawa, Canada. No MEA change.)

(2) Blue civil airway No. 50 (Augusta, Maine to United States-Canadian Border) is revoked.

(3) VOR civil airway No. 12 (Palmdale, Calif., to Philadelphia, Pa.) is amended by changing all after the Pittsburgh, Pa., omnirange station to read: "Pittsburgh, Pa., omnirng station; Johnstown, Pa., omnirange station, including a north alternate via the intersection of the Pittsburgh omnirange 067° true and the Johnstown omnirange 290° true radials; Harrisburg, Pa., omnirange station; to the West Chester, Pa., omnirange station, including a north alternate via the intersection of the Harrisburg 086° true and the West Chester omnirange 304° true radials."

(4) VOR civil airway No. 42 is amended by changing the caption to read: (Naperville, Ill., to Washington, D.C.) and by changing all after the Cleveland, Ohio, omnirange station to read: " Cleveland, Ohio, omnirange station; intersection of the Cleveland omnirange 116° true and the Pittsburgh omnirange 311° true radials; Pittsburgh, Pa., omnirange station; Johnstown, Pa., omnirange station; Martinsburg, W. Va., omnirange station; to the point of intersection of the Martinsburg omnirange 123° true and the Washington, D.C. terminal omnirange 319° true radials."

(5) VOR civil airway No. 44 (Louisville, Ky., to Baltimore, Md.) is amended to read: "From the Louisville, Ky., omnirange station via the York, Ky., omnirange station; Parkersburg, W. Va., omnirange station; Morgantown, W. Va., omnirange station; Martinsburg, W. Va., omnirange station; Baltimore, Md., omnirange station; to the point of intersection of the Baltimore omnirange 100° true and the Dover, Del., omnirange 244° true radials, except that that portion of this civil airway which overlaps the Aberdeen danger area (D-54) shall be used after obtaining prior approval from Civil Aeronautics Administration Air Traffic Control.

(6) VOR civil airway No. 45 (Lexington, Ky., to Lansing, Mich) is amended to read: "From the Lexington, Ky., omnirange station via the York, Ky., omnirange station; Columbus, Ohio, omnirange station; Waterville, Ohio, omnirange station, to the Lansing, Mich., omnirng station."

(7) VOR civil airway No. 106 (Morgantown, W. Va., to Kennebunk, Maine) is amended to read: "From the Morgantown, W. Va., omnirange station via the Johnstown, Pa., omnirange station, including a north alternate via the intersection of the Morgantown omnirange 021° true and the Johnstown omnirange 268° true radials; Philipsburg, Pa., omnirangestation Selinsgrove, Pa., omnirange station; Wilkes-Barre-Scranton, Pa., omnirange station; Poughkeepsie, N.Y., omnirange station; Gardner, Mass., omnirange station; intersection of the Gardner omnirange 060° true and the Kennebunk, Maine, omnirange 223° true radials; to the Kennebunk, Maine, omnirange station."

(8) VOR civil airway No. 128 (Cincinnati, Ohio to Raleigh, N.C.) is amended to read: "From the Cincinnati, Ohio omnirange station via the York, Ky., omnirange station; Charleston, W. Va. omnirange station; Pulaski, Va., omnirange station; Greensboro, N. C., omnirange station; to the Raleigh, N. C. omnirange Station."

(9) VOR civil airway No. 174 (Louisville, Ky., to Elkins, W. Va.) is added to read: "From the Louisville, Ky., omnirange station via the York, Ky., omnirange station; to the Elkins, W. Va., omnirange station."

CONTROL AREAS: (1) Red civil airway No. 58 (Augusta, Maine to United States-Canadian Border) is added to read: "All of Red civil airway No. 58."

(2) Blue civil airway No. 50 (Augusta, Maine to United States-Canadian Border) is revoked.

(3) VOR civil airway No. 42 is amended to read: (Naperville, Ill., to Washington , D.C.) "All of VOR civil airway No. 42".

(4) VOR civil airway No. 44 (Louisville, Ky., to Baltimore, Md.) is amended to read: "All of VOR civil airway No. 44."

(5) VOR civil airway No. 45 (Lexington, Ky., to Lansing, Mich.) is amended to read: "All of VOR civil airway No. 45."

(6) VOR civil airway No. 106 (Morgantown, W. Va. to Kennebunk, Maine) is amended to read: "All of VOR civil airway No. 106 including a north alternate."

(7) VOR civil airway No. 128 (Cincinnati, Ohio to Raleigh , N. C.) is amended to read: "All of VOR civil airway No. 128."

(8) VOR civil airway No. 174 (Louisville, Ky., to Elkins, W. Va.) is added to read: "All of VOR civil airway No. 174."

CONTROL ZONES: (1) (Toledo, Ohio) is amended to read: "Within a 5 statute mile radius of Toledo Express Airport and within 2 statute miles either side of the ILS localizer course extending from the localizer to a point 10 statute miles beyond the outer marker." (Note: This rewrite of the Toledo control zone cancels the zone around the Toledo Municipal Airport.)

(2) (Clovis, N. Mex.) is added to read: "Within a 5 statute mile radius of the Clovis Air Force Base and within 2 statute miles either side of a line bearing 222° true extending from the Air Force Base to a point 7.5 statute miles southwest of the Air Force Base."

REPORTING POINTS: (1) Green civil airway No. 2 (Seattle, Wash., to Boston, Mass.) is amended by deleting the following reporting points: "Franklin, Mass. fan type radio marker beacon or the intersection of the northeast course of the Providence, R.I., radio range and the southwest course of the Boston, Mass., radio range." (Note: Region requests that "Franklin intersection be on-request instead of compulsory.)

(2) Red civil airway No. 58 (Augusta, Maine to United States-Canadian Border) is added to read: "Bangor, Maine radio range station."

(3) Blue civil airway No. 50 (Augusta, Maine to United States-Canadian Border) is revoked.

DOMESTIC VOR REPORTING POINTS: The Domestic VOR Reporting Points is amended by adding the following:

(1) Centralia, Ill., omnirange station
(2) Bangor, Maine, omnirange station'
(3) Kennebunk, Maine, omnirange station
(4) Augusta, Maine, omnirange station
(5) Concord, N. H., omnirange station
(6) Princeton, Maine, omnirange station
(7) Plattsburg, N.Y., omnirange station

(12-14-54)

(8) Waterloo, Iowa, omnirange station

** Centralia, Ill., omnirange station (**should be indicated on appropriate aeronautical charts that pilots should make position reports over Centralia, Ill., omnirange station to the Vandalia, Ill., INSACS.)

(9) Bradley Intersection - The intersection of the Poughkeepsie, N.Y., omnirange 079° true radial and the 225° true course of the Windsor Locks, Conn., Bradley Field ILS lclzr.

(10) Mount Pleasant Intersection - The intersection of the Pittsburgh, Pa., omnirange 117° true and the Morgantown, W. Va., omnirange 021° true radials.

(11) New Alexandria Intersection - The intersection of the Pittsburgh, Pa., omnirange 067° true and the Johnstown, Pa., omnirange 290° true radials.

(12) Turnpike Intersection - The intersection of the Pittsburgh, Pa., omnirange 354° true and the Wheeling, W. Va., omnirange 034° true radials.

(13) Altoona Intersection - The intersection of the Johnstown, Pa., omnirange 092° true and the Philipsburg, Pa., omnirange 202° true radials.

✓ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are designated, changed, redescribed or cancelled as indicated:

DESIGNATED:

(1) PORT KENYON, OHIO INTSXN- the intersection Columbus, Ohio, VOR en route radial on Victor 43 with Mansfield, Ohio, VOR 181° magnetic radial.

(2) OLD CONCORD, PA. INTSXN - the intersection Pittsburgh, Pa., VOR en route radial on Victor 35 with Wheeling, W. Va., VOR en route radial on Victor 75 and/or a bearing from this intsxn to a Wheeling, W. Va., "MH" facility.

(3) VANDERGRIFT, PA. INTSXN - the intersection Pittsburgh, Pa., VOR en route radial on Victor 119 with Johnstown, Pa., VOR 303° magnetic radial and/or a bearing from this intsxn to the New Alexandria, Pa., "MH" facility.

(4) FLATBUSH, N.Y. "MH" facility.

(5) SILVER SPRING VOR INTSXN - the intersection of VOR 096° magnetic radial and the 008° magnetic radial of the Washington TVOR.

(6) SILVER SPRING L/MF INTSXN - the intersection of a 339° magnetic bearing from Riverdale radio beacon and 082° magnetic bearing from Arcola L/MF range station.

(7) PAPALOTE INTSXN - the intersection of the SE course of the Navy Chase LF range and the SW course of the Navy Refugio LF range.

(8) ELOISE INTSXN - the intersection of the NW course of the Bryan LF range and the NE course of the Austin LF range.
